

Part #: 1252

Description: Colorado/Canyon EZ-1000 Helper Spring

Application: 2015-16 Chevy Colorado/GMC Canyon 2/4wd

P/N 1252 is the newest member of Hellwig's EZ-1000 line. The EZ-1000 is our medium duty helper spring rated up to 1000lbs. This kit includes four single leaf springs which easily bolt onto the top of the factory leaf pack on either side of the axle U-bolts. It is designed to fit both 2 and 4 wheel drive Colorado/Canyon pickups. The U-bolt can be adjusted to change the rate of the helper spring allowing the user to match it to their specific load or to level the vehicle left to right. Keeping your truck level while towing or hauling has many benefits such as improved handling, braking, less wear on the suspension, better ride and aesthetics. The springs are powdercoated and made from heat treated, 5160 spring steel at Hellwig's factory in Visalia, CA. The kit includes everything necessary to install the leaves and does not require any modification of the vehicle's original suspension. Never exceed the vehicle's GVWR. **Product Attributes:**

Made in the USA

Hammertone Powdercoated Leaf Springs

Easy, Bolt On Installation
