

Part #: 61607

Description: F150 Pro-Series Helper Spring

Application: 2015 Ford F150 2/4wd

The newest addition to the Hellwig Pro-Series helper spring line is the 61607 for the 2015 Ford F150. This 2 leaf spring is rated for up to 2500 lbs (never exceed the vehicle GVWR) and improves tow/haul performance by leveling the vehicle. The springs easily install on top of the factory leaf pack with just basic hand tools. The customer or installer can adjust the outer U-bolts to tune the rate of the spring as well. This allows the spring to be adjusted to your specific rate or even to let the vehicle be leveled left to right if the load is uneven.
