"Total Exhaust Tuning" for S2000 by Super Sound Master and newly released HKS Exhaust Manifold & Metal Catalyzer!

HKS recommends "Total Exhaust Tuning" for S2000 owners; installing HKS Exhaust Manifold and Metal Catalyzer in addition to "SUPER SOUND MASTER" allows further improvement of driving performance. Performance improvement is particularly noticeable at 4000rpm and when the camshaft is switched to high-speed profile.

HKS Metal Catalyzer utilizes 150cpsi cell design compared to the factory 400cpsi design. Pressure loss reduction and high emissions standard are implemented together. Pressure loss reduction particularly affects at high engine RPM range providing sharp engine feeling and response.

TEST DATA

Exhaust manifold (pink line) shows its advantage at low to mid speed range. CAT (blue line) shows its advantage at mid to high speed range. When used in combination of these two items have a beneficial effect on all speed ranges.

Vehicle	Model	Engine	Model Year	Pipe Size	Code No.	Price	Remarks
S2000	GH-AP1	F20C	99/04-00/03	φ60-φ60	33005-AH002		Not fot to LA-AP1 & ABA-AP2
