

#48110

1. Attach the colored wires on the 4-wire flat to the SAME FUNCTIONS on the trailer.

LOCATE WIRES BY FUNCTION ONLY

White – ground (GD)

Yellow – left turn (LT)

Green – right turn (RT)

Brown – the taillight (TM)

2. Plug completed unit into the tow vehicle and check the lighting system for proper operation. Step on the brake to check brake lights, turn on headlamps to check tail / parking lights and operate directional signals to check right / left turn.

TIPS:

Grease applied to the trailer wiring terminals on a regular basis will help prevent corrosion.

A heavy duty flasher may be required to eliminate rapid flashing.

Always unplug boat trailer connector before backing trailer into the water.
