NEW PRODUCT RELEASE

Hotchkis Sport Suspension (2292) 2015+ Chevrolet Suburban, Tahoe, Cadillac Escalade/ESV and GMC Yukon, XL, & Denali Sway Bar Set from Hotchkis Sport Suspension. Control the roll and improve towing control of your 2015+ Chevrolet Suburban and Tahoe, Cadillac, Escalade/ESV and GMC Yukon, XL, & Denali sport utility vehicles with our performance Sway Bar packages. Our sway bars dramatically reduce sway and enhance towing safety without sacrificing ride comfort. Your GM SUV will also be more stable and controllable when using a roof rack or when the vehicle is loaded due to the increased roll stiffness provided by the sway bar package. Features: Lightweight durable 1.50 in tubular steel front sway bar Lightweight durable 1.25 in tubular steel rear sway bar. The front bar is 30% stiffer than stock for all platforms while the rear is 80% stiffer than stock for Tahoe, Yukon and Escalade and 45% for Suburban, Yukon XL and Escalade ESV. Rear end-links feature precision TIG-welded construction with easy to lubricate polyurethane bushings. Front are upgraded original style end links. Premium mounting hardware including upgraded brackets greasable polyurethane bushings heavy duty bolts and washers. Gloss black powder coat finish. Benefits: Improves stability and safety especially when loaded or during towing maintains excellent ride quality Improve turning response.
