HÜCO electronic GmbH

Almost 30 years ago, HÜCO electronic GmbH in Espelkamp set itself the task of producing high-quality replacement parts for the international automotive electronics market – and has done so successfully ever since. Whatever you need – regulators, relays or rectifier assemblies, glow plug relays or throttle position sensors, ignition modules, ignition coils or ignition cables – HÜCO products are sure to get your vehicle back on the road again.

As one of the largest international manufacturers on the replacement parts aftermarket for European and Asian vehicles, our top priorities are the quality of our products and our responsibility towards our customers.

Comprehensive quality assurance and absolute delivery reliability are just two of the strategies HÜCO uses to meet this responsibility. For many years our production facilities have been certified according to DIN EN ISO 9001:2000. Additionally, since 2007 our plant in India and now also our Headquarters in Germany since 2009 were certified according to TS 16949:2002.

We set new standards for the automotive aftermarket. In order to meet both our own and your high quality requirements, we have been offering an extended warranty of five years since 02.01.2009 covering the electronics in all our products (in accordance with our warranty conditions) which are supplied under the HÜCO brand.

HÜCO is a global player as an OES and Aftermarket supplier: We have been a member of the German VDA (Automotive Industry Association) for many years. Since March 2009, HÜCO has been a member of the GVA (Association of Automotive Parts Traders) which represents the interests of commercial enterprises trading in Germany in automotive spare parts (passenger and commercial vehicles) and in the aftermarket for replacement parts. The GVA is a member of the FIGIEFA (Automotive Aftermarket Distributors) and seeks to promote the independent aftermarket at European levels. Furthermore, we are also a member of the Automotive Aftermarket Industry Association (AAIA) and the Automotive Parts Rebuilders Association (APRA).

The preservation of the environment is fundamental to HÜCO's company philosophy. HÜCO fulfils these objectives as a partner of the „PARTSLIFE" initiative which encourages the environmentally-friendly disposal of our packaging materials.

No Child Labor Compliance – HÜCO also takes responsibility on the international stage. We introduced an own code of conduct some years ago, which also applies explicitly to all our suppliers. Today, together with 100 % of our suppliers, we have undertaken to ensure that HÜCO products are manufactured under decent working conditions and that under no circumstances child labor is used.

As of October 2009, HÜCO electronic GmbH will feature in the TecDoc catalogue, the industry's leading information system, supplying the replacement parts market with up-to-date product data. HÜCO has been part of the DVSE/TecCat system since 2007 and the Lester Catalog, covering exclusively the North American spare parts market, since 2006.

Importent note
The information provided in the HÜCO catalogue, CD-Rom and in the Internet is for reference
only. HÜCO assumes no responsibility for the correctness of the indicated OE names and numbers and applications.
Photos and drawings do not always correspond to the descriptions they are assigned to. Subject to technical modifications.

Information systems
HÜCO offers you a variety of information systems that give you not only an overview of our complete product range but also contain specific information on our products.

Direct line
Just give us a call, send us a fax or email and we will respond to your queries regarding the HÜCO product range or delivery times as quickly as possible.

Internet
Fast and up-to-date - this presents our homepage . We inform you about our products and the company. In the area of the online catalogoues we implemented extensive search options for you.

Promotional Material
A variety of catalogues and brochures as well as a CD-ROM provide information about the different product lines in the automotive electronic range.

HÜCO Ignition modules
Ignition modules, as you are probably aware, form an extremely critical integral part of the Motormanagement System, consisting at least of hall systems respectiveley transmitters, ignition modules, ignition coils an ignition plugs. In some cases, if the ignition module does not function correctly, causing the engine to misfire and toxic emissions to increase, a complete breakdown of the engine management system could result. If this happens the ignition module must be replaced. A repair of the module itself is virtually impossible, as the components are extremely complex, not to mention that all these components are encapsulated within epoxy resin to prevent contamination from the environment.

Ignition modules can be subdivided into two groups, „amplifiers" and „pick-ups / hall systems":

A) Amplifiers
The amplifier consists of different internal power transistors switching the primary current feeding the ignition coil. Transistors limit both the primary current as well as the primary voltage in order to avoid defects of the ignition system.
Amplifiers are either an integral part of the the „ECU „ or alternatively, mounted within the engine compartment (mostly in combination with an ignition coil). In this location, the module must withstand enormous variations in temperature, vibration and humidity, with under bonnet temperatures reaching 50 degrees centigrade easily. Coupled with the heat naturally generated by the module itself, it must withstand this hostile environment and still perform to specifications.
The resulting heat has to be carried off quickley by cooling sheets.

B) Pick-up and hall systems
This type of pick-up based on the hall system receiving input signals from a transmitter. They recover the signal on an internal basis and then forward it to the internal amplifier or external amplifier.

Ignition modules are very complex, sensitive electronical components, which often fail due to enormous internal load rates and certain external influences. Several reasons for these failures are as follows:

1. Incorrect cross reference (OE) /incorrect Application
Often the failure of a spare part is due to an incorrect cross reference. On the one hand there might be mistakes in the reference number itself and on the other hand many spare parts have the same configuration with different electrical characteristics within the circuit. If these parts are used on the wrong vehicle, they will be destroyed by the impulses, which do not correspond to them. In the worst case, this can also affect other parts of the ignition system causing permanent damage.

2. High voltage peaks in mains power supply due to:
Inductive consumers (e.g. ignition coils, motors etc.)
Cable break, perhaps results in a short-circuit, failure in ground connection
Insufficient contact of e.g. B+ clamp
Electronic motors (electrical sliding roof, electrically operated windows, starters etc.
bridging (using jump leads) when giving starting assistance etc.
Voltage peaks can damage the electrical components of the ignition module. Even though the module is protected against those peaks, it can nevertheless happen under extreme situations.

3. Mechanical influence
Incorrect installation (engine torque). The internal hybrids and/or components can be damaged, if the clamping bolts are tightened too strongly when replacing an ignition module or having a routine inspetion. For this reason, it has to be observed that the clamps must be at the correct torque.
External mechanical influence such as humidity or abnormal vibrations etc.
Most vehicle manufacturers safeguard that these components are placed in strategic under-bonnet locations to ensure the protection of

these parts. However there are always exceptions to the rule where module housings or plugs can be damaged causing the humidity to gain access to components causing failure. The older the vehicle gets, the more vibrations evolve from the engine also resulting in failures.

4. Excessive Temperatures
Defective cooling system. The consequence of a failure or reduction in power of the cooling system can temporarily lead to excessive heat to the module, in addition to the normal ambient under-bonnet temperature, will reduce the normal life of the module.
Incorrect installation (heat flow). There are some modules, where it has to be observed that the heat conducting compound supplied with the module must be applied between the module and the heatsink (normally a metal plate). It optimises the heat flow, increasing the life of the ignition module.
Incorrect Location (external heat). The module could have been installed by the vehicle manufacturer in an inadequate place, ie close to the exhaust or may have been replaced by a mechanic to the wrong location during a service or repair.

5. Other reasons for failures
Distributor
Transmitter
Modulator unit
Spark plugs
Ignition leads
It is extremely difficult to distinguish any of the above components with intermittent faults with that of a defective ignition module. All of these reasons can have the same characteristics as a faulty module. If any of these components are defective and the existing fault is not detected when a new module is fitted, this will almost certainly result in the destruction of the new module caused by the existing undetected fault.

6. Possible Production Faults
Soldering tails: These would lead to a short-circuit and would be dentified during final inspection.
Dry joints. These appear rarely today, because of „double wave" soldering process or soldering robots, eradicating the probability of dry points
Contact problems. The internal switching electronics must be connected by an external connection plug. If there is contamination of this soldered connection an intermittent fault could develop. There is a difference between an immediate failure (detection during final examination) and a field failure (failure during operation). The latter is the most common cause of modules to fail. These failures are under guarantee during the warranty period given by us as the manufacturer.

Defect of components = failure of a selected component, used in the manufacture of our modules is extremely rare because of the high specification demanded from all our components suppliers.

All ignition modules produced by HÜCO are developed with the latest state of the art technology, with extensive life and field testing against original equipment perimeters. These tests involve vibration, temperature, salt water, impact etc.. In our final test all parts are verified 100% before dispatch. We guarantee all products are performing to specifications before leaving our stock.

We hope that this short product presentation gives you an insight into the complex structure of an ignition module. Should you have any further questions regarding this subject, please do not hesitate to contact us, we will be only too pleased to assist you.

HÜCO Air Flow Meters

An important criterion for the development of an automobile is the compliance with the legal emission standards. In order to adhere to these emission standards it is, amongst other things, necessary to ascertain the exact relationship between the air mass to the fuel quantity. The ascertainment of the air mass is undertaken by the so-called "Air Flow Meters".

It is used to measure the air mass flow in combustion engines (e.g. petrol and diesel motors) and provides the motor management or the fuel-injection system with relevant values via its electronic output signals. These values are needed by the motor management in order to exactly define the injected fuel quantity, dependent on the currently needed performance, the air pressure and the air temperature.

Assembly

The actual sensor is integrated in the flow channel of the pluggable sensor. These pluggable sensors are suitable for the installation in the air filter, as well as in so-called gauge tubes, which one can find in automobiles.
An electronic measuring system transforms the sensor data into corresponding measuring data for the motor management / the fuel-injection system.

Function

The functional principle is based on an indirect measurement of the air current. A heating element is supplied with power during operation and thereby heated up. The on-rushing air now causes a cooling down of the heating element. The heat that is detracted from the heating element gives information about the on-rushing air mass. The larger the air mass, the larger the cooling down of the heating element is respectively the thereby created temperature difference.
The electronics that are integrated in the pluggable sensor analyzes this data and thereby allows for a precise ascertainment of the on-rushing air quantity.

Defect / Product of sub-standard quality

What are the effects of a defective air mass flow meter for an automobile and how can one recognize an air mass flow meter of "sub-standard quality"?

- General performance loss
- Occasional performance loss
- Unsettled motor behaviour
- Heightened fuel consumption
- Bad emission values
- Malfunction of the catalytic converter
- Breakdown of the automobile

ARTICLE	HÜCO-NO.
HEAT CONDUCTING COMPOUND to be used for the mounting of HÜCO ignition modules. The heat conducting compound, contacting silicon, improves the heat transfer and does not any electricity. Weight: 70g	**13 8099**

MOUNTING INSTRUCTIONS

1. Before beginning work disconnect the earth cable (-) from the battery
2. Remove the defective ignition module from the distributor
3. Coat module contact plate and mounting-surface with heatconducting paste.
4. Screw ignition module to distributor (see drawing).
   Recommended torque 1,0 - 1,5 Nm
5. When mounting is complete reconnect earth cable (-).

Key characteristics
Throttle position sensors are connected to the throttle-valve spindle and control the angular aperture of the throttle valve.

The engine management system receives this information and calculates the fuel quantity to be injected taking into account factors such as the engine temperature, air pressure, rate of revolutions.

There are different types of throttle position sensors:

Throttle Position Switches

Within the throttle position switch are located two switches that may be operated by a gear-shifting gate.
Via these two switches the engine management system detects if the engine is idling or under full load (idling in case of closed throttle valve, full load in case of a fixed angular aperture).
If the full load switch is closed the quantity of fuel injected is increased.

Throttle Position Potentiometer

In this case the angular aperture of the throttle valve is detected by a variable resistance. As there is a fixed ratio between the angular aperture and the resistance value, the engine management system can detect at any time the angle of the throttle valve. Furthermore, the angular velocity (i.e. the time it takes the throttle valve to change its angle) is also registered. If the angle is changed quickly, e.g. if the accelerator is pressed sharply, more fuel is injected via the engine management system.

Possible malfunctions
Throttle position sensors react to any change of the accelerator and thereby are subject to mechanical wear and tear. In addition, they are susceptible to contamination by oil film, dust and dampness.
Rubber seals will minimise the risk of damages, but other factors within the engine compartment (extreme temperature variations, vibrations, oil, cleansing agents etc.) may cause the seals to become brittle. This following malfunctions may occur when using throttle position sensors:

Difficulty in starting the engine.
Change in the rate of revolutions, even though the setting of the accelerator has not changed.
Increased fuel consumption.
Spluttering of the engine if the setting of the accelerator has changed.

Sales and Supply Conditions / Guarantee Terms 02/2009

I. General

1. The scope of deliveries and/or services (hereinafter referred to as„Supplies") shall be determined by the written declarations of both Parties. General terms and conditions of the Purchaser shall apply only if and when expressly accepted by the supplier or the provider of services (hereinafter referred to as „Supplier") in writing.
2. The Supplier herewith reserves any industrial property rights and/or copyrights pertaining to its cost estimates, drawings and other documents (hereinafter referred to as „Documents"). The Documents shall not be made accessible to third parties without the Supplier's prior consent and shall, upon request, be returned without Undue delay to the Supplier if the contract is not awarded to the Supplier. Sentences 1 and 2 shall apply mutatis mutandis to documents of the Purchaser; these may, however, be made accessible to third parties to whom the Supplier may rightfully transfer Supplies.
3. The Purchaser shall have the non-exclusive right to use standard software, provided that it remains unchanged, is used within the agreed performance parameters, and on the agreed equipment. The Purchaser may make one back-up copy without express agreement.
4. Partial Supplies shall be allowed, unless they are unreasonable to accept for the Purchaser.

II. Prices and terms of payment

1. Prices shall be ex works and exclude packaging; value added tax shall be added at the then applicable rate.
2. If the Supplier is also responsible for assembly or erection and unless otherwise agreed, the Purchaser shall pay the agreed remuneration and any incidental costs required, e. g. travel costs, costs for the transport of tools and equipment, and personal luggage as well as allowances.
3. Payments shall be made free Supplier's paying office.
4. The Purchaser may set off only those claims that are undisputed or against which no legal recourse is possible.

III. Retention of title

1. Items pertaining to the Supplies („Retained Goods") shall remain the property of the Supplier until each and every claim the Supplier has against the Purchaser on account of the business connection has been fulfilled. If the combined value of the security interests of the Supplier exceeds the value of all secured claims by more than 20 %, the Supplier shall release a corresponding part of the security interest if so requested by the Purchaser.
2. For the duration of the retention of title, the Purchaser may not pledge the Retained Goods or use them as security, and resale shall be possible only for resellers in the ordinary course of their business and only on condition that the reseller receives payment from its customer or makes the transfer of property to the customer dependent upon the customer fulfilling its obligation to effect payment.
3. The Purchaser shall inform the Supplier forthwith of any seizure or other act of intervention by third parties.
4. Where the Purchaser fails to fulfil its duties, including failure to make payments due, the Supplier shall be entitled to cancel the contract and take back the Retained Goods in the case of continued failure following expiry of a reasonable time set by the Supplier; the statutory provisions that a time limit is not needed remain unaffected. The Purchaser shall be obliged to surrender the Retained Goods.

IV. Time for supplies; delay

1. Times set for Supplies can only be observed if all Documents to be supplied by the Purchaser, necessary permits and releases, especially concerning plans, are received in time and if agreed terms of payment and other obligations of the Purchaser are fulfilled. Unless these conditions are fulfilled in time, times set shall be extended appropriately; this shall not apply where the Supplier is responsible for the delay.
2. If non-observance of the times set is due to force majeure such as mobilization, war, rebellion or similar events, e. g. strike or lockout, such time shall be extended accordingly.
3. If the Supplier is responsible for the delay (hereinafter referred to as „Delay") and the Purchaser demonstrably suffered a loss there from, the Purchaser may claim a compensation as liquidated damages of 0.5 % for every completed week of Delay, but in no case more than a total of 5 % of the price of that part of the Supplies which because of the Delay could not be put to the intended use.
4. Purchaser's claims for damages due to delayed Supplies as well as claims for damages in lieu of performance exceeding the limits specified in No. 3 above shall be excluded in all cases of delayed Supplies even upon expiry of a time set to the Supplier to effect the Supplies. This shall not apply in cases of mandatory liability based on intent, gross negligence, or due to injury of life, body or health. Cancellation of the contract by the Purchaser based on statute shall be limited to cases where the Supplier is responsible for the delay. The above provisions do not imply a change in the burden of proof to the detriment of the Purchaser.
5. At the Supplier's request the Purchaser shall declare within a reasonable period of time whether the Purchaser cancels the contract due to the delayed Supplies or insists on the Supplies to be carried out.
6. If dispatch or shipment is delayed at the Purchaser's request by more than one month after notice of the readiness for dispatch was given, the Purchaser may be charged, for every month commenced, storage costs of 0.5 % of the price of the items of the Supplies, but in no case more than a total of 5 %. The parties to the contract may prove that higher or, as the case may be, lower storage costs have been incurred.

V. Transfer of risk

1. Even where delivery has been agreed freight free, the risk shall pass to the Purchaser as follows:
a) if the Supplies do not include assembly or erection, at the time when the Supplies are shipped or picked up by the carrier. Upon request of the Purchaser, the Supplier shall insure the Supplies against the usual risks of transport at the expense of the Purchaser;
b) if the Supplies include assembly or erection, at the day of taking over in the own works or, if so agreed, after a fault-free trial run.
2. The risk shall pass to the Purchaser if dispatch, shipping, the start or performance of assembly or erection, the taking over in the own works or the trial run is delayed for reasons for which the Purchaser is responsible or if the Purchaser has other wise failed to accept the Supplies.

VI. Assembly and erection

Unless otherwise agreed in writing, assembly/erection shall be subject to the following provisions:
1. The Purchaser shall provide at its own expense and in good time:
a) all earth and construction work and other ancillary work outside the scope of the Supplier, including the necessary skilled and unskilled labour, construction materials and tools,
b) the equipment and materials necessary for assembly and commissioning such as scaffolds, lifting equipment and other devices as well as fuels and lubricants,
c) energy and water at the point of use including connections, heating and lighting,
d) suitable dry and lockable rooms of sufficient size adjacent to the site for the storage of machine parts, apparatus, materials, tools, etc. and adequate working and recreation rooms for the erection personnel, including sanitary facilities as are appropriate in the specific circumstances. Furthermore, the Purchaser shall take all measures it would take for the protection of its own possessions to protect the possessions of the Supplier and of the erection personnel at the site,
e) protective clothing and protective devices needed due to particular conditions prevailing on the specific site.
2. Before the erection work starts, the Purchaser shall make available of its own accord any information required concerning the location of concealed electric power, gas and water lines or of similar installations as well as the necessary structural data.
3. Prior to assembly or erection, the materials and equipment necessary for the work to start must be available on the site of assembly/erection and any preparatory work must have advanced to such a degree that assembly/erection can be started as agreed and carried out without interruption. Access roads and the assembly/ erection site itself must be level and clear.
4. If assembly, erection or commissioning is delayed due to circumstances for which the Supplier is not responsible, the Purchaser shall bear the reasonable costs incurred for idle times and any additional travelling of the Supplier or the erection personnel.
5. The Purchaser shall attest to the hours worked by the erection personnel towards the Supplier at weekly intervals and the Purchaser shall immediately confirm in writing if assembly, erection or commissioning has been completed.
6. If, after completion, the Supplier demands acceptance of the Supplies, the Purchaser shall comply therewith within a period of two weeks. In default thereof, acceptance is deemed to have taken place. Acceptance is also deemed to have been effected if the Supplies are put to use, after completion of an agreed test phase, if any.

VII. Receiving of supplies

The Purchaser shall not refuse to receive Supplies due to minor defects.

VIII. Defects as to quality

The Supplier shall be liable for defects as to quality („Sachmängel", hereinafter referred to as „Defects",) as follows:
1. All parts or services where a Defect becomes apparent within the limitation period shall, at the discretion of the Supplier, be repaired, replaced or provided again free of charge irrespective of the hours of operation elapsed, provided that the reason for the Defect had already existed at the time when the risk passed.
2. Claims based on Defects are subject to a limitation period of months. These provisions shall not apply where longer periods are prescribed by law according to Sec. 438 para. 1 No. 2 (buildings and things used for a building), Sec. 479 para. 1 (right of recourse), and Sec. 634a para. 1 No. 2 (defects of a building) German Civil Code („BGB"), as well as in cases of injury of life, body or health, or where the Supplier intentionally or grossly negligently fails to fulfil its obligation or fraudulently conceals a Defect. The legal provisions regarding suspension of expiration („Ablaufhemmung"), suspension („Hemmung") and recommencement of limitation periods remain unaffected.
3. The Purchaser shall notify Defects to the Supplier in writing and without undue delay.
4. In the case of notification of a Defect, the Purchaser may withhold payments to a reasonable extent taking into account the Defect occurred. The Purchaser, however, may withhold payments only if the subject-matter of the notification of the Defect occurred is justified beyond doubt. Unjustified notifications of Defect shall entitle the Supplier to have its expenses reimbursed by the Purchaser.
5. The Supplier shall first be given the opportunity to supplement its performance („Nacherfüllung") within a reasonable period of time.
6. If supplementary performance is unsuccessful, the Purchaser shall be entitled to cancel the contract or reduce the remuneration, irrespective of any claims for damages it may have according to Art. XI.
7. There shall be no claims based on Defect in cases of insignificant deviations from the agreed quality, of only minor impairment of usefulness, of natural wear and tear or damage arising after the transfer of risk from faulty or negligent handling, excessive strain, unsuitable equipment, defective workmanship or from particular external influences not assumed under the contract, or from non-reproducible software errors. Claims based on defects attributable to improper modifications or repair work carried out by the Purchaser or third parties and the consequences thereof shall be likewise excluded.
8. The Purchaser shall have no claim with respect to expenses incurred in the course of supplementary performance, including costs of travel and transport, labour, and material, to the extent that expenses are increased because the subject-matter of the Supplies was subsequently brought to another location than the Purchaser's branch office, unless doing so complies with the intended use of the Supplies.
9. The Purchaser's right of recourse against the Supplier pursuant to Sec. 478 BGB is limited to cases where the Purchaser has not concluded an agreement with its customers exceeding the scope of the statutory provisions governing claims based on Defects. Moreover, No. 8 above shall apply mutatis mutandis to the scope of the right of recourse the Purchaser has against the Supplier pursuant to Sec. 478 para. 2 BGB.
10. Furthermore, the provisions of Art. XI (Other Claims for Damages) shall apply in respect of claims of damages. Any other claims of the Purchaser against the Supplier or its agents or any such claims exceeding the claims provided for in this Art. VIII, based on a Defect, shall be excluded.

VIII a) Guarantee

Our guarantee terms apply. They are available upon request.

IX. Industrial property rights and copyright; defects in title

1. Unless otherwise agreed, the Supplier shall provide the Supplies free from third parties' industrial property rights and copyrights (hereinafter referred to as „IPR") with respect to the country of the place of destination. If a third party asserts a justified claim against the Purchaser based on an infringement of an IPR with respect to the Supplies made by the Supplier and then used in conformity with the contract, the Supplier shall be liable to the Purchaser within the time period stipulated in Art. VIII No. 2 as follows:
a) The Supplier shall choose whether to acquire, at its own expense, the right to use the IPR with respect to the Supplies concerned or whether to modify the Supplies such that they no longer infringe the IPR or replace them. If this would be unreasonable to demand from the Supplier, the Purchaser may cancel the contract or reduce the remuneration pursuant to the appli-cable statutory provisions.
b) The Supplier's liability to pay damages shall be governed by Art. XI.
c) The above obligations of the Supplier shall only apply if the Purchaser
(i) immediately notifies the Supplier of any such claim asserted by the third party in writing, (ii) does not concede the existence of an infringement and (iii) leaves any protective measures and settlement negotiations to the discretion of the Supplier. If the Purchaser stops using the Supplies in order to reduce the damage or for other good reason, it shall be obliged to point out to the third party that no acknowledge- ment of the alleged infringement may be inferred from the fact that the use has been discontinued.
2. Claims of the Purchaser shall be excluded if it is itself responsible for the infringement of an IPR.
3. Claims of the Purchaser shall also be excluded if the infringement of the IPR is caused by specifications made by the Purchaser, to a type of use not foreseeable by the Supplier or to the Supplies being modified by the Purchaser or being used together with products not provided by the Supplier.
4. In addition, with respect to claims by the Purchaser pursuant to No. 1 a) above, Art VIII Nos. 4, 5, and 9 shall apply mutatis mutandis in the event of an infringement of an IPR.
5. Where other defects in title occur, Art. VIII shall apply mutatis mutandis.
6. Any other claims of the Purchaser against the Supplier or its agents or any such claims exceeding the claims provided for in this Art. IX, based on a defect in title, shall be excluded.

X. Impossibility of performance; adaption of contract

1. To the extent that Supplies are impossible to be carried out, the Purchaser shall be entitled to claim damages, unless the Supplier is not responsible for the impossibility. The Purchaser's claim for damages shall, however, be limited to an amount of 10 % of the value of the part of the Supplies which, owing to the impossibility, can not be put to the intended use. This limitation shall not apply in the case of mandatory liability based on intent, gross negligence or injury of life, body or health; this does not imply a change in the burden of proof to the detriment of the Purchaser. The right of the Purchaser to cancel the contract shall remain unaffected.
2. Where unforeseeable events within the meaning of Art. IV No. 2 substantially change the economic importance or the contents of the Supplies or considerably affect the Supplier's business, the contract shall be adapted taking into account the principles of reasonableness and good faith. Where doing so is economically unreasonable, the Supplier shall have the right to cancel the contract. If the Supplier intends to exercise its right to cancel the contract, it shall notify the Purchaser thereof without undue delay after having realised the repercussions of the event; this shall also apply even where an extension of the delivery period had previously been agreed with the Purchaser.

XI. Other claim es for damages

1. Any claims for damages and reimbursement of expenses the Purchaser may have (hereinafter referred to as „Claims for Damages"), based on whatever legal reason, including infringement of duties arising in connection with the contract or tort, shall be excluded.
2. The above shall not apply in the case of mandatory liability, e. g. under the German Product Liability Act („Produkthaftungsgesetz"), in the case of intent, gross negligence, injury of life, body or health, or breach of a condition which goes to the root of the contract („wesentliche Vertragspflichten"). However, Claims for Damages arising from a breach of a condition which goes to the root of the contract shall be limited to the foreseeable damage which is intrinsic to the contract, unless caused by intent or gross negligence or based on liability for injury of life, body or health. The above provision does not imply a change in the burden of proof to the detriment of the Purchaser.
3. To the extent that the Purchaser has a valid Claim for Damages according to this Art. XI, it shall be timebarred upon expiration of the limitation period applicable to Defects pursuant to Art. VIII No. 2. In the case of claims for damages under the German Product Liability Act, the statutory provisions governing limitation periods shall apply.

XII. Venue and applicable law

1. If the Purchaser is a businessperson, sole venue for all disputes arising directly or indirectly out of the contract shall be the Supplier's place of business. However, the Supplier may also bring an action at the Purchaser's place of business.
2. Legal relations existing in connection with this contract shall be governed by German substantive law, to the exclusion of the United Nations Convention on Contracts for the International Sale of Goods (CISG).

XIII. Severability clause

The legal invalidity of one or more provisions of this contract shall in no way affect the validity of the remaining provisions. This shall not apply if it would be unreasonable for one of the parties to continue the contract.

XIV. Catalogue information

Only the catalogue valid at the time of the conclusion of the contract shall apply. All previous catalogues and the information therein shall be rendered invalid by the catalogue applicable at the time of concluding the contract.
All technical values of the supplier's product stated in the catalogue are average values determined from electronically-held operational data.

Guarantee Terms 02/2009

1. The following guarantee terms shall apply to any products supplied by the Supplier. Statutory warranty rights (supplementary performance, rescission or reduction of the purchase price, damages) are not affected by this guarantee. This guarantee shall be considered as a voluntary promise by the Supplier towards the purchaser and shall not affect the seller´s warranty obligation under the contract of sale with the purchaser.

2. From the date of delivery to the purchaser, Supplier grants a 60 months´ guarantee period for products labelled „HÜCO" and with HÜCO branded package, and a 36 months´ guarantee period for any other of Supplier´s products. Wear and tear parts, which may be components of Supplier´s products, are excluded from this guarantee.

3. This guarantee covers solely defects as to quality, i.e. material defects or manufacturing defects. Wear and tear is excluded from the guarantee, as are insignificant deviations from the agreed quality, only minor impairment of usefulness, damage arising after the transfer of risks from faulty or negligent handling, excessive strain, unsuitable equipment, defective workmanship and from particular external influences not assumed under the contract. Furthermore, the guarantee does not cover components which were not integrated and/or not approved by Supplier and the consequences thereof. Defects or damage arising from repair work carried out by third parties – i.e. by anybody else than Supplier or his authorized contractors – or from other unauthorized interventions shall be likewise excluded, as well as defects due to chemical or electrochemical exposure, inappropriate utilization, defective installation or connection, extreme atmospheric exposure, non-observance of installation instructions or maintenance guidelines and damage in transit.

4. In case of a defect, the purchaser is obliged to inform Supplier of the defect in writing and without unduly delay, describing the alleged defect. If the defect is covered by this guarantee, Supplier will, in his discretion, provide subsequent performance or repair the defect product. In case of no defect coverd by this guarantee, purchaser is obliged to compensate Supplier for his expenses induced by the notice of defects.

5. This guarantee does not cover transport costs for sending the defect product to the supplier, nor the risks of loss and damage during this transport.

6. Other or further claims, in particular claims for compensation beyond the damage to the product, shall be excluded unless the law or contractual terms provide for mandatory liability.

Made in Japan

An important criterion for the development of an automobile is the compliance with all legal emission standards. In order to adhere to these emission standards it is, amongst other things, necessary to ascertain the exact relationship between the air mass to the fuel quantity. The ascertainment of the air mass is undertaken by a so-called “Air Flow Sensor”.

It is used to measure the air mass flow in combustion engines (in both petrol and diesel motors) and provides the motor management or the fuel-injection system with relevant values via its electronic output signals. These values are needed by the motor management in order to exactly define the injected fuel quantity, dependent on the currently needed performance, the air pressure and the air temperature.

Assembly

The actual sensor is integrated in the flow channel of the pluggable sensor. These pluggable sensors are suitable for the installation in the air filter, as well as in so-called gauge tubes, which one can find in automobiles. An electronic measuring system transforms the sensor data into corresponding measuring data for the motor management / the fuel-injection system.

Function

The functional principle is based on an indirect measurement of the air current. A heating element is supplied with power during operation and thereby heated up. The on-rushing air now causes a cooling down of the heating element. The heat that is detracted from the heating element gives information about the on-rushing air mass. The larger the air mass, the larger the cooling down of the heating element is respectively the thereby created temperature difference.
The electronics that are integrated in the pluggable sensor analyzes this data and thereby allows for a precise ascertainment of the on-rushing air quantity.

Defect / Product of sub-standard quality

What are the effects of a defective air mass flow meter for an automobile and how can one recognize an air mass flow sensor of “sub-standard quality”?

- General performance loss
- Occasional performance loss
- Unsettled motor behavior
- Heightened fuel consumption
- Bad emission values
- Malfunction of the catalytic converter
- Breakdown of the automobile

Modern driver assistance systems give the driver assistance in dangerous situations and optimize the safety in traffic.
Under the aspect of the driving safety, especially wheel speed sensors (commonly known as ABS sensors) are important, which is shown through their usage in different vehicle systems. Within driver assistance system such as ABS, TCS or ESC they are used by the control units to detect the wheel speed. The wheel speed information is supplied by the ABS control unit also to other systems (engine-, transmission-, navigation and suspension control systems)

Based on the positioning of the sensors they are highly stressed due to high temperatures, brake dust and mechanical impacts. A further cause of damage can occur during general maintenance works on the braking system.

The following problems can occur when a sensor is damaged:

- ABS warning lamp turns on
- Breakdown of the ABS system

General terms and conditions of HÜCO Automotive GmbH as on 01.04.2013

I. General

1. The scope of deliveries and/or services (hereinafter referred to as„Supplies") shall be determined by the written declarations of both Parties. General terms and conditions of the Purchaser shall apply only if and when expressly accepted by the supplier or the provider of services (hereinafter referred to as „Supplier") in writing.
2. The Supplier herewith reserves any industrial property rights and/or copyrights pertaining to its cost estimates, drawings and other documents (hereinafter referred to as „Documents"). The Documents shall not be made accessible to third parties without the Supplier's prior consent and shall, upon request, be returned without Undue delay to the Supplier if the contract is not awarded to the Supplier. Sentences 1 and 2 shall apply mutatis mutandis to documents of the Purchaser; these may, however, be made accessible to third parties to whom the Supplier may rightfully transfer Supplies.
3. The Purchaser shall have the non-exclusive right to use standard software, provided that it remains unchanged, is used within the agreed performance parameters, and on the agreed equipment. The Purchaser may make one back-up copy without express agreement.
4. Partial Supplies shall be allowed, unless they are unreasonable to accept for the Purchaser.

II. Prices and terms of payment

1. Prices shall be ex works and exclude packaging; value added tax shall be added at the then applicable rate.
2. If the Supplier is also responsible for assembly or erection and unless otherwise agreed, the Purchaser shall pay the agreed remuneration and any incidental costs required, e. g. travel costs, costs for the transport of tools and equipment, and personal luggage as well as allowances.
3. Payments shall be made free Supplier's paying office.
4. The Purchaser may set off only those claims that are undisputed or against which no legal recourse is possible.

III. Retention of title

1. Items pertaining to the Supplies („Retained Goods") shall remain the property of the Supplier until each and every claim the Supplier has against the Purchaser on account of the business connection has been fulfilled. If the combined value of the security interests of the Supplier exceeds the value of all secured claims by more than 20 %, the Supplier shall release a corresponding part of the security interest if so requested by the Purchaser.
2. For the duration of the retention of title, the Purchaser may not pledge the Retained Goods or use them as security, and resale shall be possible only for resellers in the ordinary course of their business and only on condition that the reseller receives payment from its customer or makes the transfer of property to the customer dependent upon the customer fulfilling its obligation to effect payment.
3. The Purchaser shall inform the Supplier forthwith of any seizure or other act of intervention by third parties.
4. Where the Purchaser fails to fulfil its duties, including failure to make payments due, the Supplier shall be entitled to cancel the contract and take back the Retained Goods in the case of continued failure following expiry of a reasonable time set by the Supplier; the statutory provisions that a time limit is not needed remain unaffected. The Purchaser shall be obliged to surrender the Retained Goods.

IV. Time for supplies; delay

1. Times set for Supplies can only be observed if all Documents to be supplied by the Purchaser, necessary permits and releases, especially concerning plans, are received in time and if agreed terms of payment and other obligations of the Purchaser are fulfilled. Unless these conditions are fulfilled in time, times set shall be extended appropriately; this shall not apply where the Supplier is responsible for the delay.
2. If non-observance of the times set is due to force majeure such as mobilization, war, rebellion or similar events, e. g. strike or lockout, such time shall be extended accordingly.
3. If the Supplier is responsible for the delay (hereinafter referred to as „Delay") and the Purchaser demonstrably suffered a loss there from, the Purchaser may claim a compensation as liquidated damages of 0.5 % for every completed week of Delay, but in no case more than a total of 5 % of the price of that part

of the Supplies which because of the Delay could not be put to the intended use.

4. Purchaser's claims for damages due to delayed Supplies as well as claims for damages in lieu of performance exceeding the limits specified in No. 3 above shall be excluded in all cases of delayed Supplies even upon expiry of a time set to the Supplier to effect the Supplies. This shall not apply in cases of mandatory liability based on intent, gross negligence, or due to injury of life, body or health. Cancellation of the contract by the Purchaser based on statute shall be limited to cases where the Supplier is responsible for the delay. The above provisions do not imply a change in the burden of proof to the detriment of the Purchaser.
5. At the Supplier's request the Purchaser shall declare within a reasonable period of time whether the Purchaser cancels the contract due to the delayed Supplies or insists on the Supplies to be carried out.
6. If dispatch or shipment is delayed at the Purchaser's request by more than one month after notice of the readiness for dispatch was given, the Purchaser may be charged, for every month commenced, storage costs of 0.5 % of the price of the items of the Supplies, but in no case more than a total of 5 %. The parties to the contract may prove that higher or, as the case may be, lower storage costs have been incurred.

V. Transfer of risk

1. Even where delivery has been agreed freight free, the risk shall pass to the Purchaser as follows:
   a) if the Supplies do not include assembly or erection, at the time when the Supplies are shipped or picked up by the carrier. Upon request of the Purchaser, the Supplier shall insure the Supplies against the usual risks of transport at the expense of the Purchaser;
   b) if the Supplies include assembly or erection, at the day of taking over in the own works or, if so agreed, after a fault-free trial run.
2. The risk shall pass to the Purchaser if dispatch, shipping, the start or performance of assembly or erection, the taking over in the own works or the trial run is delayed for reasons for which the Purchaser is responsible or if the Purchaser has other wise failed to accept the Supplies.

VI. Assembly and erection

Unless otherwise agreed in writing, assembly/erection shall be subject to the following provisions:

1. The Purchaser shall provide at its own expense and in good time:
   a) all earth and construction work and other ancillary work outside the scope of the Supplier, including the necessary skilled and unskilled labour, construction materials and tools,
   b) the equipment and materials necessary for assembly and commissioning such as scaffolds, lifting equipment and other devices as well as fuels and lubricants,
   c) energy and water at the point of use including connections, heating and lighting,
   d) suitable dry and lockable rooms of sufficient size adjacent to the site for the storage of machine parts, apparatus, materials, tools, etc. and adequate working and recreation rooms for the erection personnel, including sanitary facilities as are appropriate in the
   specific circumstances. Furthermore, the Purchaser shall take all measures it would take for the protection of its own possessions to protect the possessions of the Supplier and of the erection personnel at the site, e) protective clothing and protective devices needed due to particular conditions prevailing on the specific site.
2. Before the erection work starts, the Purchaser shall make available of its own accord any information required concerning the location of concealed electric power, gas and water lines or of similar installations as well as the necessary structural data.
3. Prior to assembly or erection, the materials and equipment necessary for the work to start must be available on the site of assembly/erection and any preparatory work must have advanced to such a degree that assembly/erection can be started as agreed and carried out without interruption. Access roads and the assembly/ erection site itself must be level and clear.
4. If assembly, erection or commissioning is delayed due to circumstances for which the Supplier is not responsible, the Purchaser shall bear the reasonable costs incurred for idle times and any additional travelling of the Supplier or the erection personnel.
5. The Purchaser shall attest to the hours worked by the erection personnel towards the Supplier at weekly intervals and the Purchaser shall immediately confirm in writing if assembly, erection or commissioning has been completed.
6. If, after completion, the Supplier demands acceptance of the Supplies, the Purchaser shall comply therewith within a period of two weeks. In default thereof, acceptance is deemed to have taken place. Acceptance is also deemed to have been effected if the Supplies are put to use, after completion of an agreed test phase, if any.

VII. Receiving of supplies

The Purchaser shall not refuse to receive Supplies due to minor defects.

VIII. Defects as to quality

The Supplier shall be liable for defects as to quality („Sachmängel", hereinafter referred to as „Defects",) as follows:

1. All parts or services where a Defect becomes apparent within the limitation period shall, at the discretion of the Supplier, be repaired, replaced or provided again free of charge irrespective of the hours of operation elapsed, provided that the reason for the Defect had already existed at the time when the risk passed.
2. Claims based on Defects are subject to a limitation period of months. These provisions shall not apply where longer periods are prescribed by law according to Sec. 438 para. 1 No. 2 (buildings and things used for a building), Sec. 479 para. 1 (right of recourse), and Sec. 634a para. 1 No. 2 (defects of a building) German Civil Code („BGB"), as well as in cases of injury of life, body or health, or where the Supplier intentionally or grossly negligently fails to fulfil its obligation or fraudulently conceals a Defect. The legal provisions regarding suspension of expiration („Ablaufhemmung"), suspension („Hemmung") and recommencement of limitation periods remain unaffected.
3. The Purchaser shall notify Defects to the Supplier in writing and without undue delay.
4. In the case of notification of a Defect, the Purchaser may withhold payments to a reasonable extent taking into account the Defect occurred. The Purchaser, however, may withhold payments only if the subject-matter of the notification of the Defect occurred is justified beyond doubt. Unjustified notifications of Defect shall entitle the Supplier to have its expenses reimbursed by the Purchaser.
5. The Supplier shall first be given the opportunity to supplement its performance („Nacherfüllung") within a reasonable period of time.
6. If supplementary performance is unsuccessful, the Purchaser shall be entitled to cancel the contract or reduce the remuneration, irrespective of any claims for damages it may have according to Art. XI.
7. There shall be no claims based on Defect in cases of insignificant deviations from the agreed quality, of only minor impairment of usefulness, of natural wear and tear or damage arising after the transfer of risk from faulty or negligent handling, excessive strain, unsuitable equipment, defective workmanship or from particular external influences not assumed under the contract, or from non-reproducible software errors. Claims based on defects attributable to improper modifications or repair work carried out by the Purchaser or third parties and the consequences thereof shall be likewise excluded.
8. The Purchaser shall have no claim with respect to expenses incurred in the course of supplementary performance, including costs of travel and transport, labour, and material, to the extent that expenses are increased because the subject-matter of the Supplies was subsequently brought to another location than the Purchaser's branch office, unless doing so complies with the intended use of the Supplies.
9. The Purchaser's right of recourse against the Supplier pursu-

ant to Sec. 478 BGB is limited to cases where the Purchaser has not concluded an agreement with its customers exceeding the scope of the statutory provisions governing claims based on Defects. Moreover, No. 8 above shall apply mutatis mutandis to the scope of the right of recourse the Purchaser has against the Supplier pursuant to Sec. 478 para. 2 BGB.

10. Furthermore, the provisions of Art. XI (Other Claims for Damages) shall apply in respect of claims of damages. Any other claims of the Purchaser against the Supplier or its agents or any such claims exceeding the claims provided for in this Art. VIII, based on a Defect, shall be excluded.

VIII a) Guarantee

Our guarantee terms apply. They are available upon request.

IX. Industrial property rights and copyright; defects in title

1. Unless otherwise agreed, the Supplier shall provide the Supplies free from third parties' industrial property rights and copyrights (hereinafter referred to as „IPR") with respect to the country of the place of destination. If a third party asserts a justified claim against the Purchaser based on an infringement of an IPR with respect to the Supplies made by the Supplier and then used in conformity with the contract, the Supplier shall be liable to the Purchaser within the time period stipulated in Art. VIII No. 2 as follows:
   a) The Supplier shall choose whether to acquire, at its own expense, the right to use the IPR with respect to the Supplies concerned or whether to modify the Supplies such that they no longer infringe the IPR or replace them. If this would be unreasonable to demand from the Supplier, the Purchaser may cancel the contract or reduce the remuneration pursuant to the applicable statutory provisions.
   b) The Supplier's liability to pay damages shall be governed by Art. XI.
   c) The above obligations of the Supplier shall only apply if the Purchaser (i) immediately notifies the Supplier of any such claim asserted by the third party in writing, (ii) does not concede the existence of an infringement and (iii) leaves any protective measures and settlement negotiations to the discretion of the Supplier. If the Purchaser stops using the Supplies in order to reduce the damage or for other good reason, it shall be obliged to point out to the third party that no acknowledgement of the alleged infringement may be inferred from the fact that the use has been discontinued.
2. Claims of the Purchaser shall be excluded if it is itself responsible for the infringement of an IPR.
3. Claims of the Purchaser shall also be excluded if the infringement of the IPR is caused by specifications made by the Purchaser, to a type of use not foreseeable by the Supplier or to the Supplies being modified by the Purchaser or being used together with products not provided by the Supplier.
4. In addition, with respect to claims by the Purchaser pursuant to No. 1 a) above, Art VIII Nos. 4, 5, and 9 shall apply mutatis mutandis in the event of an infringement of an IPR.
5. Where other defects in title occur, Art. VIII shall apply mutatis mutandis.
6. Any other claims of the Purchaser against the Supplier or its agents or any such claims exceeding the claims provided for in this Art. IX, based on a defect in title, shall be excluded.

X. Impossibility of performance; adaption of contract

1. To the extent that Supplies are impossible to be carried out, the Purchaser shall be entitled to claim damages, unless the Supplier is not responsible for the impossibility. The Purchaser's claim for damages shall, however, be limited to an amount of 10 % of the value of the part of the Supplies which, owing to the impossibility, can not be put to the intended use. This limitation shall not apply in the case of mandatory liability based on intent, gross negligence or injury of life, body or health; this does not imply a change in the burden of proof to the detriment of the Purchaser. The right of the Purchaser to cancel the contract shall remain unaffected.
2. Where unforeseeable events within the meaning of Art. IV No. 2 substantially change the economic importance or the contents of the Supplies or considerably affect the Supplier's business, the contract shall be adapted taking into account the principles of reasonableness and good faith. Where doing so is economically unreasonable, the Supplier shall have the right to cancel the contract. If the Supplier intends to exercise its right to cancel the contract, it shall notify the Purchaser thereof without undue delay after having realised the repercussions of the event; this shall also apply even where an extension of the delivery period had previously been agreed with the Purchaser.

XI. Other claim es for damages

1. Any claims for damages and reimbursement of expenses the Purchaser may have (hereinafter referred to as „Claims for Damages"), based on whatever legal reason, including infringement of duties arising in connection with the contract or tort, shall be excluded.
2. The above shall not apply in the case of mandatory liability, e. g. under the German Product Liability Act („Produkthaftungsgesetz"), in the case of intent, gross negligence, injury of life, body or health, or breach of a condition which goes to the root of the contract („wesentliche Vertragspflichten"). However, Claims for Damages arising from a breach of a condition which goes to the root of the contract shall be limited to the foreseeable damage which is intrinsic to the contract, unless caused by intent or gross negligence or based on liability for injury of life, body or health. The above provision does not imply a change in the burden of proof to the detriment of the Purchaser.
3. To the extent that the Purchaser has a valid Claim for Damages according to this Art. XI, it shall be time-barred upon expiration of the limitation period applicable to Defects pursuant to Art. VIII No. 2. In the case of claims for damages under the German Product Liability Act, the statutory provisions governing limitation periods shall apply.

XII. Venue and applicable law

1. If the Purchaser is a businessperson, sole venue for all disputes arising directly or indirectly out of the contract shall be the Supplier's place of business. However, the Supplier may also bring an action at the Purchaser's place of business.
2. Legal relations existing in connection with this contract shall be governed by German substantive law, to the exclusion of the United Nations Convention on Contracts for the International Sale of Goods (CISG).

XIII. Severability clause

The legal invalidity of one or more provisions of this contract shall in no way affect the validityof the remaining provisions. This shall not apply if it would be unreasonable for one of the parties to continue the contract.

XIV. Catalogue information

Only the catalogue valid at the time of the conclusion of the contract shall apply. All previous catalogues and the information therein shall be rendered invalid by the catalogue applicable at the time of concluding the contract.

All technical values of the supplier's product stated in the catalogue are average values determined from electronically-held operational data.

Guarantee Terms 04/2013

1. The following guarantee terms shall apply to any products supplied by the Supplier. Statutory warranty rights (supplementary performance, rescission or reduction of the purchase price, damages) are not affected by this guarantee. This guarantee shall be considered as a voluntary promise by the Supplier towards the purchaser and shall not affect the seller´s warranty obligation under the contract of sale with the purchaser.

2. From the date of delivery to the purchaser, Supplier grants a 60 months´ guarantee period for products labeled „HÜCO" and with HÜCO branded package, and a 36 months´ guarantee period for any other of Supplier´s products. Wear and tear parts (including, but not limited to e.g. diodes, carbon brushes, bearings, complete alternators, starters, water pumps and turbo chargers) , which may also be components of Supplier´s products, are categorically excluded from this guarantee.

3. This guarantee covers solely defects as to quality, i.e. material defects or manufacturing defects. Wear and tear is excluded from the guarantee, as are insignificant deviations from the agreed quality, only minor impairment of usefulness, damage arising after the transfer of risks from faulty or negligent handling, excessive strain, unsuitable equipment, defective workmanship and from particular external influences not assumed under the contract. Furthermore, the guarantee does not cover components which were not inte-grated and/or not approved by Supplier and the consequences thereof. Defects or dam-age arising from repair work carried out by third parties – i.e. by anybody else than Sup-plier or his authorized contractors – or from other unauthorized interventions shall be likewise excluded, as well as defects due to chemical or electrochemical exposure, inappropriate utilization, defective installation or connection, extreme atmospheric exposure, non-observance of installation instructions or maintenance guidelines and damage in transit.

4. In case of a defect, the purchaser is obliged to inform Supplier of the defect in writing and without unduly delay, describing the alleged defect. If the defect is covered by this guarantee, Supplier will, in his discretion, provide subsequent performance or repair the defect product. In case of no defect coverd by this guarantee, purchaser is obliged to compensate Supplier for his expenses induced by the notice of defects.

5. This guarantee does not cover transport costs for sending the defect product to the supplier, nor the risks of loss and damage during this transport.

6. Other or further claims, in particular claims for compensation beyond the damage to the product, shall be excluded unless the law or contractual terms provide for mandatory lia-bility.

Function

Diesel engines are so called self-igniting engines. That means that they don't require an additional energy source to ignite the diesel/air mixture in the cylinder. The diesel/air mixture is compressed so highly within the cylinder that a high temperature results in a self-ignition of the mixture and thus an "explosion". This procedure however only occurs within an already hot or warm engine. Whenever the engine temperature is colder glow plugs ensure the ignition process can start accordingly. The glow plugs (1 per cylinder) pre-heat the temperature within the ignition chamber of the individual cylinder. The tip of the glow plug reaches a temperature of approx. 1000°C. This ensures a reliable ignition process of the air/diesel mixture even during very low temperatures.

The required time for the pre-heating of the glow plugs varies depending on which type of glow plug is used. High speed glow plugs only require a pre-heating time of a few seconds; others must be pre-heated up to 15 seconds when experiencing low ambient temperatures. The glow plug controller regulates the on/off switching of the required electricity and thus the pre-heating time itself.

Switches (power relays) located within the glow plug relay are responsible for turning the electric current of the glow plugs on and off. A current of approx. 10 Ampere is necessary for an already hot glow plug. However, in case the engine is cold, the necessary current is much higher. The power relay needs to be able to switch a current of up to 80 Ampere in case of a 4 cylinder engine. For 6 or 8 cylinder engines it's even higher.
It's often the case that the electricity is split into 2 individual circuits. In these cases the glow plug relay will contain 2 separate power relays.

During the time control several phases must be considered:

1. Pre-Heating Time

The pre-heating depends on the motor type, the used glow plugs and the ambient temperature measured with a sensor. The temperature sensors can be located in the relay – or in an external position such as within the cooling cycle. In winter months with sub-zero temperatures the pre-heating time is much longer than in summer months with temperatures up to +30°C. During the pre-heating time the pre-heating lamp in the car's dashboard is active. Some passenger cars even start the pre-heating time once the driver's door has been opened.

2. Supply Time

The supply time begins directly after the pre-heating time. The control lamp is switched off; however the glow plugs themselves remain active for a few more seconds. At this point the driver should start the car's engine.

3. Post-Heating Time

Post-Heating was established for newer car models in order to optimize the combustion sequences within the engine and thus ensure better and lower exhaust gas emissions. The glow plugs are switched on during the post-heating time while the engine is running. The duration of the post-heating time is dependent on factors such as engine temperature or the type of engine itself. Special glow plugs, so-called posting-glowing types, are required in these cases.

Variants

Even if the technical basis function is always the same, you can find glow plug controllers in many different variants. Both the sizes of the housing, the connectors and the type of mounting are different. However for the vehicles manufactured in Europe there are over 100 different relay types. There are also pre-heating systems where the function of the timing is taken over by the engine controller. Then the glow plug controller only has the function to to switch the necessary high current for the glow plugs.

Full electronic glow plug controller

With these modern types of glow plug controllers everything is different. They are diagnosticable and attached to the On Board Diagnosis (OBD). Full electronic glow plug controllers are connected with the engine

controller via data bus. The engine controller transmits the instructions for switching on or off. It is also measured if enough current is flowing after switching on a glow plug.The engine controller is informed about this via acknowledgement signal. If a current is too high (e.g. in case of a short circuit in the cable or glow plug) this should be recognized, the appropriate branch circuit is switched off in order to avoid destruction of electronic.

Another characteristic of all electronic glow plug controllers is, that there is no need for a relay to switch the glow plug controller off an on, but power transistors (electronic switches). Thus the current can not only be switched on and off but also changed in amperage. This is done via a changable duty cycle. This means the current is switched on and off during the current cycle control in short time intervalls. If the „on-time" is longer than the „out-time" the glow plug gets more power and becomes hotter. The glow plug is turned aroundl less hot if the „on-time" is shorter than the „off-time".

Glow plug controllers are mounted into different places of the car. Plug-in relays can be found in the central relay box. Relays without plug-in contact for glow plug controllers, but plug contacts to be screwed are found in the engine compartement. These relays are screwed directly at the splash guard or with special attaching brackets onto the body.

Fuel pump relays are compulsory safety units for any vehicles. They are provided with a protection circuit, because the fuel pump should not pump any fuel on the street in case of an accident or a damaged fuel pipe.
The fuel pump of the vehicle is switched on via the relay when starting the car's engine. The electronic circuit of the relay checks if the motor is running. In case the motor is suddenly switched off, e.g. in case of an accident, the relay will cut the power supply to the fuel pump within 1-2 seconds.

I. General

1. The scope of deliveries and/or services (hereinafter referred to as„Supplies") shall be determined by the written declarations of both Parties. General terms and conditions of the Purchaser shall apply only if and when expressly accepted by the supplier or the provider of services (hereinafter referred to as „Supplier") in writing.
2. The Supplier herewith reserves any industrial property rights and/or copyrights pertaining to its cost estimates, drawings and other documents (hereinafter referred to as „Documents"). The Documents shall not be made accessible to third parties without the Supplier's prior consent and shall, upon request, be returned without Undue delay to the Supplier if the contract is not awarded to the Supplier. Sentences 1 and 2 shall apply mutatis mutandis to documents of the Purchaser; these may, however, be made accessible to third parties to whom the Supplier may rightfully transfer Supplies.
3. The Purchaser shall have the non-exclusive right to use standard software, provided that it remains unchanged, is used within the agreed performance parameters, and on the agreed equipment. The Purchaser may make one back-up copy without express agreement.
4. Partial Supplies shall be allowed, unless they are unreasonable to accept for the Purchaser.

II. Prices and terms of payment

1. Prices shall be ex works and exclude packaging; value added tax shall be added at the then applicable rate.
2. If the Supplier is also responsible for assembly or erection and unless otherwise agreed, the Purchaser shall pay the agreed remuneration and any incidental costs required, e. g. travel costs, costs for the transport of tools and equipment, and personal luggage as well as allowances.
3. Payments shall be made free Supplier's paying office.
4. The Purchaser may set off only those claims that are undisputed or against which no legal recourse is possible.

III. Retention of title

1. Items pertaining to the Supplies („Retained Goods") shall remain the property of the Supplier until each and every claim the Supplier has against the Purchaser on account of the business connection has been fulfilled. If the combined value of the security interests of the Supplier exceeds the value of all secured claims by more than 20 %, the Supplier shall release a corresponding part of the security interest if so requested by the Purchaser.
2. For the duration of the retention of title, the Purchaser may not pledge the Retained Goods or use them as security, and resale shall be possible only for resellers in the ordinary course of their business and only on condition that the reseller receives payment from its customer or makes the transfer of property to the customer dependent upon the customer fulfilling its obligation to effect payment.
3. The Purchaser shall inform the Supplier forthwith of any seizure or other act of intervention by third parties.
4. Where the Purchaser fails to fulfil its duties, including failure to make payments due, the Supplier shall be entitled to cancel the contract and take back the Retained Goods in the case of continued failure following expiry of a reasonable time set by the Supplier; the statutory provisions that a time limit is not needed remain unaffected. The Purchaser shall be obliged to surrender the Retained Goods.

IV. Time for supplies; delay

1. Times set for Supplies can only be observed if all Documents to be supplied by the Purchaser, necessary permits and releases, especially concerning plans, are received in time and if agreed terms of payment and other obligations of the Purchaser are fulfilled. Unless these conditions are fulfilled in time, times set shall be extended appropriately; this shall not apply where the Supplier is responsible for the delay.
2. If non-observance of the times set is due to force majeure such as mobilization, war, rebellion or similar events, e. g. strike or lockout, such time shall be extended accordingly.
3. If the Supplier is responsible for the delay (hereinafter referred to as „Delay") and the Purchaser demonstrably suffered a loss there from, the Purchaser may claim a compensation as liquidated damages of 0.5 % for every completed week of Delay, but in no case more than a total of 5 % of the price of that part

of the Supplies which because of the Delay could not be put to the intended use.

4. Purchaser's claims for damages due to delayed Supplies as well as claims for damages in lieu of performance exceeding the limits specified in No. 3 above shall be excluded in all cases of delayed Supplies even upon expiry of a time set to the Supplier to effect the Supplies. This shall not apply in cases of mandatory liability based on intent, gross negligence, or due to injury of life, body or health. Cancellation of the contract by the Purchaser based on statute shall be limited to cases where the Supplier is responsible for the delay. The above provisions do not imply a change in the burden of proof to the detriment of the Purchaser.
5. At the Supplier's request the Purchaser shall declare within a reasonable period of time whether the Purchaser cancels the contract due to the delayed Supplies or insists on the Supplies to be carried out.
6. If dispatch or shipment is delayed at the Purchaser's request by more than one month after notice of the readiness for dispatch was given, the Purchaser may be charged, for every month commenced, storage costs of 0.5 % of the price of the items of the Supplies, but in no case more than a total of 5 %. The parties to the contract may prove that higher or, as the case may be, lower storage costs have been incurred.

V. Transfer of risk

1. Even where delivery has been agreed freight free, the risk shall pass to the Purchaser as follows:
   a) if the Supplies do not include assembly or erection, at the time when the Supplies are shipped or picked up by the carrier. Upon request of the Purchaser, the Supplier shall insure the Supplies against the usual risks of transport at the expense of the Purchaser;
   b) if the Supplies include assembly or erection, at the day of taking over in the own works or, if so agreed, after a fault-free trial run.
2. The risk shall pass to the Purchaser if dispatch, shipping, the start or performance of assembly or erection, the taking over in the own works or the trial run is delayed for reasons for which the Purchaser is responsible or if the Purchaser has other wise failed to accept the Supplies.

VI. Assembly and erection

Unless otherwise agreed in writing, assembly/erection shall be subject to the following provisions:

1. The Purchaser shall provide at its own expense and in good time:
   a) all earth and construction work and other ancillary work outside the scope of the Supplier, including the necessary skilled and unskilled labour, construction materials and tools,
   b) the equipment and materials necessary for assembly and commissioning such as scaffolds, lifting equipment and other devices as well as fuels and lubricants,
   c) energy and water at the point of use including connections, heating and lighting,
   d) suitable dry and lockable rooms of sufficient size adjacent to the site for the storage of machine parts, apparatus, materials, tools, etc. and adequate working and recreation rooms for the erection personnel, including sanitary facilities as are appropriate in the
   specific circumstances. Furthermore, the Purchaser shall take all measures it would take for the protection of its own possessions to protect the possessions of the Supplier and of the erection personnel at the site, e) protective clothing and protective devices needed due to particular conditions prevailing on the specific site.
2. Before the erection work starts, the Purchaser shall make available of its own accord any information required concerning the location of concealed electric power, gas and water lines or of similar installations as well as the necessary structural data.
3. Prior to assembly or erection, the materials and equipment necessary for the work to start must be available on the site of assembly/erection and any preparatory work must have advanced to such a degree that assembly/erection can be started as agreed and carried out without interruption. Access roads and the assembly/ erection site itself must be level and clear.
4. If assembly, erection or commissioning is delayed due to circumstances for which the Supplier is not responsible, the Purchaser shall bear the reasonable costs incurred for idle times and any additional travelling of the Supplier or the erection personnel.
5. The Purchaser shall attest to the hours worked by the erection personnel towards the Supplier at weekly intervals and the Purchaser shall immediately confirm in writing if assembly, erection or commissioning has been completed.
6. If, after completion, the Supplier demands acceptance of the Supplies, the Purchaser shall comply therewith within a period of two weeks. In default thereof, acceptance is deemed to have taken place. Acceptance is also deemed to have been effected if the Supplies are put to use, after completion of an agreed test phase, if any.

VII. Receiving of supplies

The Purchaser shall not refuse to receive Supplies due to minor defects.

VIII. Defects as to quality

The Supplier shall be liable for defects as to quality („Sachmängel", hereinafter referred to as „Defects",) as follows:

1. All parts or services where a Defect becomes apparent within the limitation period shall, at the discretion of the Supplier, be repaired, replaced or provided again free of charge irrespective of the hours of operation elapsed, provided that the reason for the Defect had already existed at the time when the risk passed.
2. Claims based on Defects are subject to a limitation period of months. These provisions shall not apply where longer periods are prescribed by law according to Sec. 438 para. 1 No. 2 (buildings and things used for a building), Sec. 479 para. 1 (right of recourse), and Sec. 634a para. 1 No. 2 (defects of a building) German Civil Code („BGB"), as well as in cases of injury of life, body or health, or where the Supplier intentionally or grossly negligently fails to fulfil its obligation or fraudulently conceals a Defect. The legal provisions regarding suspension of expiration („Ablaufhemmung"), suspension („Hemmung") and recommencement of limitation periods remain unaffected.
3. The Purchaser shall notify Defects to the Supplier in writing and without undue delay.
4. In the case of notification of a Defect, the Purchaser may withhold payments to a reasonable extent taking into account the Defect occurred. The Purchaser, however, may withhold payments only if the subject-matter of the notification of the Defect occurred is justified beyond doubt. Unjustified notifications of Defect shall entitle the Supplier to have its expenses reimbursed by the Purchaser.
5. The Supplier shall first be given the opportunity to supplement its performance („Nacherfüllung") within a reasonable period of time.
6. If supplementary performance is unsuccessful, the Purchaser shall be entitled to cancel the contract or reduce the remuneration, irrespective of any claims for damages it may have according to Art. XI.
7. There shall be no claims based on Defect in cases of insignificant deviations from the agreed quality, of only minor impairment of usefulness, of natural wear and tear or damage arising after the transfer of risk from faulty or negligent handling, excessive strain, unsuitable equipment, defective workmanship or from particular external influences not assumed under the contract, or from non-reproducible software errors. Claims based on defects attributable to improper modifications or repair work carried out by the Purchaser or third parties and the consequences thereof shall be likewise excluded.
8. The Purchaser shall have no claim with respect to expenses incurred in the course of supplementary performance, including costs of travel and transport, labour, and material, to the extent that expenses are increased because the subject-matter of the Supplies was subsequently brought to another location than the Purchaser's branch office, unless doing so complies with the intended use of the Supplies.
9. The Purchaser's right of recourse against the Supplier pursuant to Sec. 478 BGB is limited to cases where the Purchaser has not concluded an agreement with its customers exceeding the scope of the statutory provisions governing claims based on

Defects. Moreover, No. 8 above shall apply mutatis mutandis to the scope of the right of recourse the Purchaser has against the Supplier pursuant to Sec. 478 para. 2 BGB.

10. Furthermore, the provisions of Art. XI (Other Claims for Damages) shall apply in respect of claims of damages. Any other claims of the Purchaser against the Supplier or its agents or any such claims exceeding the claims provided for in this Art. VIII, based on a Defect, shall be excluded.

VIII a) Guarantee

Our guarantee terms apply. They are available upon request.

IX. Industrial property rights and copyright; defects in title

1. Unless otherwise agreed, the Supplier shall provide the Supplies free from third parties' industrial property rights and copyrights (hereinafter referred to as „IPR") with respect to the country of the place of destination. If a third party asserts a justified claim against the Purchaser based on an infringement of an IPR with respect to the Supplies made by the Supplier and then used in conformity with the contract, the Supplier shall be liable to the Purchaser within the time period stipulated in Art. VIII No. 2 as follows:
   a) The Supplier shall choose whether to acquire, at its own expense, the right to use the IPR with respect to the Supplies concerned or whether to modify the Supplies such that they no longer infringe the IPR or replace them. If this would be unreasonable to demand from the Supplier, the Purchaser may cancel the contract or reduce the remuneration pursuant to the applicable statutory provisions.
   b) The Supplier's liability to pay damages shall be governed by Art. XI.
   c) The above obligations of the Supplier shall only apply if the Purchaser (i) immediately notifies the Supplier of any such claim asserted by the third party in writing, (ii) does not concede the existence of an infringement and (iii) leaves any protective measures and settlement negotiations to the discretion of the Supplier. If the Purchaser stops using the Supplies in order to reduce the damage or for other good reason, it shall be obliged to point out to the third party that no acknowledgement of the alleged infringement may be inferred from the fact that the use has been discontinued.
2. Claims of the Purchaser shall be excluded if it is itself responsible for the infringement of an IPR.
3. Claims of the Purchaser shall also be excluded if the infringement of the IPR is caused by specifications made by the Purchaser, to a type of use not foreseeable by the Supplier or to the Supplies being modified by the Purchaser or being used together with products not provided by the Supplier.
4. In addition, with respect to claims by the Purchaser pursuant to No. 1 a) above, Art VIII Nos. 4, 5, and 9 shall apply mutatis mutandis in the event of an infringement of an IPR.
5. Where other defects in title occur, Art. VIII shall apply mutatis mutandis.
6. Any other claims of the Purchaser against the Supplier or its agents or any such claims exceeding the claims provided for in this Art. IX, based on a defect in title, shall be excluded.

X. Impossibility of performance; adaption of contract

1. To the extent that Supplies are impossible to be carried out, the Purchaser shall be entitled to claim damages, unless the Supplier is not responsible for the impossibility. The Purchaser's claim for damages shall, however, be limited to an amount of 10 % of the value of the part of the Supplies which, owing to the impossibility, can not be put to the intended use. This limitation shall not apply in the case of mandatory liability based on intent, gross negligence or injury of life, body or health; this does not imply a change in the burden of proof to the detriment of the Purchaser. The right of the Purchaser to cancel the contract shall remain unaffected.
2. Where unforeseeable events within the meaning of Art. IV No. 2 substantially change the economic importance or the contents of the Supplies or considerably affect the Supplier's business, the contract shall be adapted taking into account the principles of reasonableness and good faith. Where doing so is economically unreasonable, the Supplier shall have the right to cancel the contract. If the Supplier intends to exercise its right to cancel the contract, it shall notify the Purchaser thereof without undue delay after having realised the repercussions of the event; this shall also apply even where an extension of the delivery period had previously been agreed with the Purchaser.

XI. Other claim es for damages

1. Any claims for damages and reimbursement of expenses the Purchaser may have (hereinafter referred to as „Claims for Damages"), based on whatever legal reason, including infringement of duties arising in connection with the contract or tort, shall be excluded.
2. The above shall not apply in the case of mandatory liability, e. g. under the German Product Liability Act („Produkthaftungsgesetz"), in the case of intent, gross negligence, injury of life, body or health, or breach of a condition which goes to the root of the contract („wesentliche Vertragspflichten"). However, Claims for Damages arising from a breach of a condition which goes to the root of the contract shall be limited to the foreseeable damage which is intrinsic to the contract, unless caused by intent or gross negligence or based on liability for injury of life, body or health. The above provision does not imply a change in the burden of proof to the detriment of the Purchaser.
3. To the extent that the Purchaser has a valid Claim for Damages according to this Art. XI, it shall be time-barred upon expiration of the limitation period applicable to Defects pursuant to Art. VIII No. 2. In the case of claims for damages under the German Product Liability Act, the statutory provisions governing limitation periods shall apply.

XII. Venue and applicable law

1. If the Purchaser is a businessperson, sole venue for all disputes arising directly or indirectly out of the contract shall be the Supplier's place of business. However, the Supplier may also bring an action at the Purchaser's place of business.
2. Legal relations existing in connection with this contract shall be governed by German substantive law, to the exclusion of the United Nations Convention on Contracts for the International Sale of Goods (CISG).

XIII. Severability clause

The legal invalidity of one or more provisions of this contract shall in no way affect the validityof the remaining provisions. This shall not apply if it would be unreasonable for one of the parties to continue the contract.

XIV. Catalogue information

Only the catalogue valid at the time of the conclusion of the contract shall apply. All previous catalogues and the information therein shall be rendered invalid by the catalogue applicable at the time of concluding the contract.

All technical values of the supplier's product stated in the catalogue are average values determined from electronically-held operational data.

Guarantee Terms 02/2016

1. The following guarantee terms shall apply to any products supplied by the Supplier. Statutory warranty rights (supplementary performance, rescission or reduction of the purchase price, damages) are not affected by this guarantee. This guarantee shall be considered as a voluntary promise by the Supplier towards the purchaser and shall not affect the seller´s warranty obligation under the contract of sale with the purchaser.

2. From the date of delivery to the purchaser, Supplier grants a 60 months´ guarantee period for products labeled „HÜCO" and with HÜCO branded package, and a 24 months´ guarantee period for any other of Supplier´s products. Wear and tear parts (including, but not limited to e.g. diodes, carbon brushes, bearings, complete alternators, starters, water pumps and turbo chargers) , which may also be components of Supplier´s products, are categorically excluded from this guarantee.
3. This guarantee covers solely defects as to quality, i.e. material defects or manufacturing defects. Wear and tear is excluded from the guarantee, as are insignificant deviations from the agreed quality, only minor impairment of usefulness, damage arising after the transfer of risks from faulty or negligent handling, excessive strain, unsuitable equipment, defective workmanship and from particular external influences not assumed under the contract. Furthermore, the guarantee does not cover components which were not inte-grated and/or not approved by Supplier and the consequences thereof. Defects or dam-age arising from repair work carried out by third parties – i.e. by anybody else than Sup-plier or his authorized contractors – or from other unauthorized interventions shall be likewise excluded, as well as defects due to chemical or electrochemical exposure, inappropriate utilization, defective installation or connection, extreme atmospheric exposure, non-observance of installation instructions or maintenance guidelines and damage in transit.
4. In case of a defect, the purchaser is obliged to inform Supplier of the defect in writing and without unduly delay, describing the alleged defect. If the defect is covered by this guarantee, Supplier will, in his discretion, provide subsequent performance or repair the defect product. In case of no defect coverd by this guarantee, purchaser is obliged to compensate Supplier for his expenses induced by the notice of defects.
5. This guarantee does not cover transport costs for sending the defect product to the supplier, nor the risks of loss and damage during this transport.
6. Other or further claims, in particular claims for compensation beyond the damage to the product, shall be excluded unless the law or contractual terms provide for mandatory lia-bility.

Hitachi Automotive Systems Espelkamp GmbH

EMC,EEC-directive 2009/19/EG

The European commission passed the directive 2009/19/EG (2007/104/EG) relating to electromagnetic compatibility (EMC) concerning the EMC of motor vehicles and their electric and electronic components on March 12, 2009.

This directive replaces the previous automotive EMC directive 95/54/EC. It contains in its annexes all the technical requirements necessary to demonstrate conformity with the requirements. These requirements make sure that those electronic components which correspond to the standards, do not send out any interfering electro-magnetic waves or are affected in their functions by external electro-magnetic radiation. Components which are specified according to this directive must have been tested and approved by an authorized institution.

By now, we have received EMC-certificates from the KBA for every relevant component of our product-range. Depending on the product-group the different EMC-approval numbers are combined with the corresponding identification numbers:

fuel pump relays:

e1*72/245*2009/19*6064*00, e1 identification no. = e1 036064

glow plug controllers:

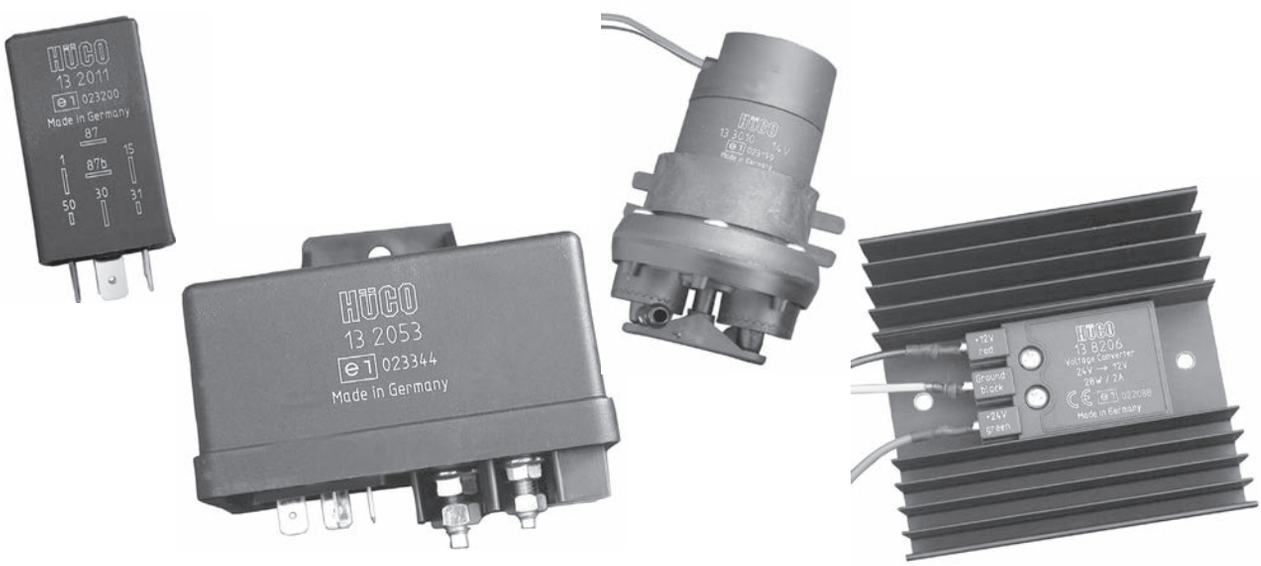
e1*72/245*2009/19*6063*00, e1 identification no. = e1 036063

fuel pumps:

e1*72/245*2009/19*6064*00, e1 identification no. = e1 036064

These e1 – identification numbers are also stated on the final products of our a. m. product groups. This gives you the guarantee that you will only receive certified products from us. This way, we provide you with a clear business advantage compared to your competitors who have no certificates.

According to the directive 2009/19/EG (2007/104/EG) the former needed type approval for aftermarket equipment by an accredited technical service is no longer necessary, if they are not related to immunity-related functions. Electronic sub-assemblies sold as typical so called aftermarket equipment are our voltage converters.



Check out the collection of ignition parts we offer.
