

MICROWAVE BLIND SPOT DETECTOR

CELEBRATING
70
YEARS
OF INNOVATION

TE-BSM **IBEAM MICROWAVE BLIND SPOT DETECTOR**

PRODUCT OVERVIEW

Our iBeam microwave blind spot detector installs easily, without the need for drilling, and is universally applicable to most vehicles on the market. Activated by turn signal triggers, the system's two microwave sensors will warn the driver of vehicles in their blind spots via LED visual indicators on either side of the vehicle - and also with an audible alert. Microwave sensors are more accurate and have better range than most sensors on the market, and offer performance that is comparable to a factory OEM part. This blind spot detector is a quick and easy way to increase the safety of any vehicle.

- **Monitors blind spots for hazards via 2 microwave sensors**
- **System utilizes a no-drill installation**
- **Includes LED warning indicators for both sides of the vehicle**
- **Audible warnings are activated in addition to LED indicators with turn signal triggers**
- **OBDII plug included in kit**
