

Innovative Mounts

92-95 Honda Civic 3 Bolt & 2 Bolt Post Mount Setup Options

You may have an option on what driver mount to purchase depending on your model of Civic. Typically most 92-95 Honda Civics come equipped with a driver side mount with a 2 bolt post mount. 3 bolt post mounts are usually found on 94-95 Civic EX/Si/VX and also 94-01 Acura Integras. May vary upon engine or transmission swap.

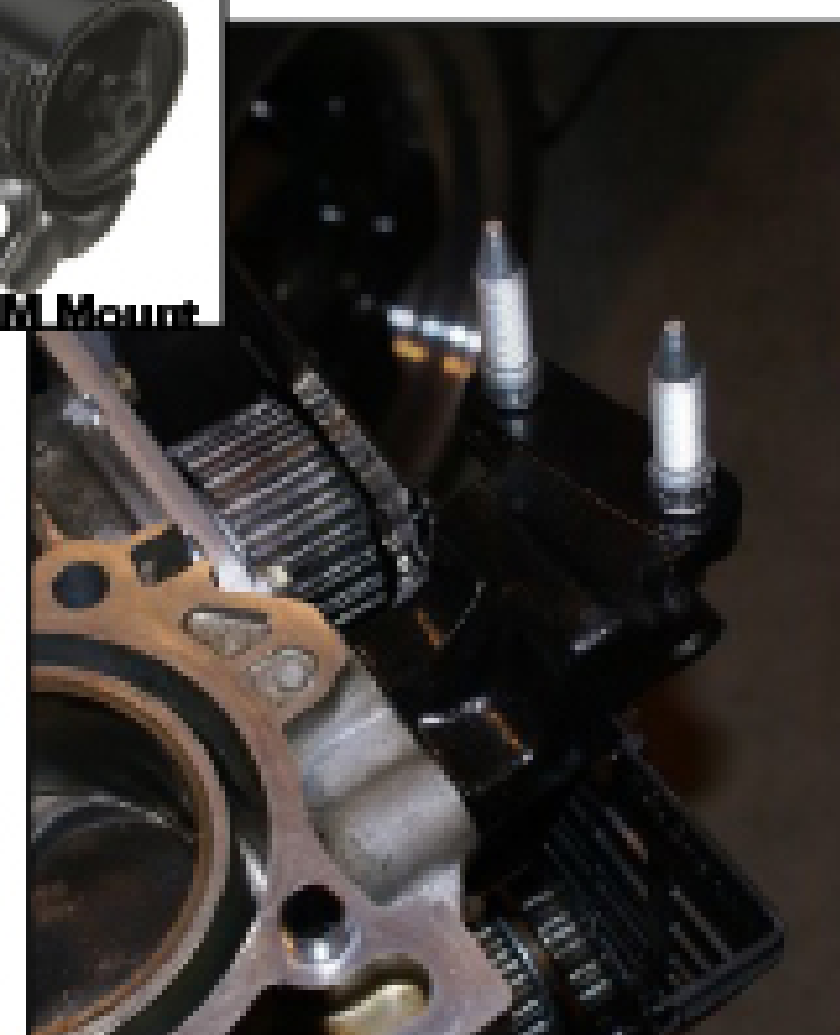

94-95 Civic & 94-01 Integra 3 Bolt Post Driver Side Mount - 10110 / B10110

Innovative Mounts also offers Billet 2 & 3 Bolt Post Mounts for your Civic and Integra

92-95 Civic 2 Bolt Post Driver Side Mount - 19510 / B19510

Smog Certified Engine Transplants

Many states have different laws concerning what you can and cant do as far as engine transplants are concerned. Before jumping into any type of engine conversion on your vehicle, it's always best to first check with your local DMV to find out what the law says in your area. Unfortunately, for folks who live in stricter states such as California, your engine swap choices are very limited.

Examples of previously certified engine transplants are listed below along with the corresponding Innovative Engine Mount Kit. This is not a complete listing of what is possible, but it does cover those that have been done and what is street legal.

1984-1987 Civic/CRX

- **D-Series (ZC Style)**
- **B-Series (OBD conversion may be required for certification)**
 - Part Number: 18750

1988-1991 Civic/CRX

- **D-Series (SOHC)(OBD conversion)**
 - Part Number: B19151, 19151, 19153, 49152, 49151
- **B-Series (OBD conversion may be required for certification)**
 - Part Number: B19150, 19150, 19152, B49150, 49150

1992-1995 Civic

- **B-Series (OBD I)**
 - Part Number: B19350, 19350, 40150, B10150, 10150, 40156, 40153, 49553, 19550, 10150, B40152, 40152, B49550, 49550, 49552, 19552

1996-2000 Civic

- **B-Series (OBD II)**
 - Part Number: B10050, 10050, B10051, 10051

2001-2005 Civic

- **K-Series (OBD II)**
 - Part Number: 90550

2001-2005 Civic Si

- **K-Series (OBD II)**
 - Part Number: B90650, 90650, 90651

1990-1991 Integra

- **B-Series (OBD conversion may be required for certification)**
 - Part Number: B19350, 19350, B19351, 19351, 19353, 19354, 49350, 49351, 49353, 49354, 49355

1992-1993 Integra

- **B-Series (OBD I)**
 - Part Number: B19350, 19350, B19351, 19351, 19353, 19354, 49350, 49351, 49353, 49354, 49355

1994-1995 Integra

- **B-Series (OBD I)**
 - Part Number: 10150, B19550, 19550, 40150, 40153, 40155, B40154, 40154, 40156, B49550, 49551, 49553,

1996-2001 Integra

- **B-Series (OBD II)**
 - Part Number: 10150, B19550, 19550, 40150, 40153, 40155, B40154, 40154, 40156, B49550, 49551, 49553,

1986-1989 Accord

- **B-Series (OBD conversion may be required for certification)**
 - Part Number: 18950

1990-1993 Accord

- **H-Series (OBD I)**
 - Part Number: 29350, 29351, 29352, 29357,

1994-1995 Accord

- **H-Series (OBD I)**
 - Part Number: 29750, 29751, 29752, 29753, 29756

1996-1997 Accord

- **H-Series (OBD II)**
 - Part Number: 29750, 29751, 29752, 29753, 29756

1988-1991 Prelude

- **H-Series (OBD conversion required)**
 - Part Number: 29152

1992-1995 Prelude

- **H-Series (OBD I)**
 - Part Number: 29650, 29651

1996 Prelude

- **H-Series (OBD II)**
 - Part Number: 29650, 29651

1997-1999 CL

- **H-Series (OBD II)**
 - Part Number: 29756

Some basic guidelines regarding the certification process of engine transplant vehicles that apply to most states are listed below:

- 1.)** Donor engines and emissions equipment must be of the same year of the vehicle or newer.
- 2.)** Be sure to have a purchase receipt for the engine and transmission before going through the process of certification.
- 3.)** USDM engines are always easier to have certified compared to their JDM counterparts.
- 4.)** Vehicles originally bought and registered in California may only swap a California registered engine. This applies to some other states as well. However, JDM or any other engines may be used as long as the engine block code is the same as the engine block code on the USDM engine. This is why JDM B16A engines are legal transplants; they refer to the USDM Del Sol DOHC VTEC B16A3. However, if a B16A is to be certified into an OBD 0 chassis, plan on a full OBD I conversion, since the B16A3 is OBD I. OBD 0 B16As do not exist as far as the state referee is concerned. Many times, the vehicle will be required to install the Del Sol intake manifold and exhaust manifold in addition to the entire OBD conversion.
- 5.)** Emissions equipment from the donor engine must be installed on the vehicle along with the new engine. This includes the catalytic converter, oxygen sensors, and evaporative emissions components.
- 6.)** Vehicles receiving an engine that is a newer OBD type must upgrade to the OBD level of the new engine. This includes the computer and all of the electrical components.
- 7.)** Once you visit a state referee and pass a visual and emissions test, you'll be given a certification sticker. From that point on, you may have your vehicle smog tested in a normal manner at any smog station.

HONDA & ACURA

Engine Codes

Use this engine code chart to help find out what vehicles have the engine you want. In order to avoid confusion, the vehicles are listed by their U.S. model year. Keep in mind that the JDM model years are usually a year earlier (USDM '94 Integra is actually a '93 JDM Integra).

Engine Code	Donor Vehicle	Market Origin
