

Lifetime Warranty Policy

Customer satisfaction is the top priority of Innovative Mounts which is why it offers a lifetime warranty on all its products.

If a Steel or Billet Engine Mount breaks or even if urethane wears out, your mount can be replaced.

Be sure to purchase the bushings of the right urethane stiffness for your driving conditions. The 60A bushings are intended simply for daily driver applications, any track use or excessive driving will effect the life of these bushings. It is highly recommended that all H/F/J/K Series motors run 75A or higher due to the weight of the motor. Substitutions will not be made for changing mounts or bushings during a warranty claim.
