## Huf IntelliSens Universal Sensors

---

In addition to the OE sensors, Huf has specifically developed a universal sensor of equivalent quality which contains the full OE functionality. IntelliSens universal sensors are available in just a few versions that replace nearly all common OE TPMS sensors. The reduced variations allows for lower inventory requirements and makes it easier to have the sensor you need, when you need it.

Protocols are already installed on the IntelliSens sensor so setting the sensor is easy and fast taking only seconds to set using a TPMS diagnostic tool. With Huf's valve and sensor configuration, you can install the sensors on both OE and Aftermarket rims without a problem, without the issue of working under the rim.

\*Note: Valves must be tightened using a torque wrench to 35in.lbs. (4Nm). IntelliSens must be configured using a TPMS tool or it will not register with the vehicle when doing the relearn process.
