

SMART MUTT® TRAILER TESTER

A Portable Tester For Commercial Trailer Repair

Features And Benefits

- Powers lights individually or all at once via auto scan or by remote control
- Detects bad grounds, open and crossed circuits
- Pulses power to shorted and overloaded circuits (patented Pulsar® technology)
- ABS fault codes via auxiliary and brake circuit activation (i.e. Wabco/Bendix tab-6 systems)
- 7-way “pigtail” cable testing

Specifications

- Connection Type: 7-Way Round Pin
 Power: 12/24V DC
 Power Input: Internal Battery (optional) or External 12 Volt Power Source
 Battery Req's: Yuasa #YTX4 or Similar
 Battery Compartment Dimensions: L: 5 7/8 in. x W: 33/8 in. x H: 53/4 in.
 Output: 20A @ 12V DC (10A Max. Charge Rate)
 Controls: Manual, Remote, Automatic
 Materials: Powder Coated Steel Construction
 Weight: 20 lbs.
 Body Dimensions: L: 91/2 in. x W: 161/4 in. x H: 9 in.

Optional battery not included on #9007A

Includes

Remote Control, 500mA 12V Battery Charger, 7 Round Pin Cable, Chassis Ground Cable, External Battery Connector
