MEASUREMENTS:

A small metal tape measure, or a cloth tape may be used to take your measurement. If possible, have an assistant do the measuring for a more accurate measurement. The circumference of the head should be measured from the forehead, approximately one inch above the eyebrows, or at whatever point gives the largest possible measurement.

Helmet MUST fit snugly on your head,

PLEASE DO NOT sacrifice safety for comfort.

Helmets are designed to absorb shock energy during impact, and a loose fitting helmet greatly reduces its safety.
