

JMS[®]

BoostMAX[®]

Designed to work with all Ford[®] EcoBoost engines to vastly increase horsepower and torque, up to 50+WHP depending on the application. The plug and play design is easy to install, connecting to your factory MAP and TIP sensors with an included knob for on-the-fly boost adjustment. You'll feel increased throttle response across the entire power band, with no aftermarket OBDII programming required. For the ultimate in power and control, pair with the PedalMAX[®].

- › Fuel economy increases at normal operation
- › Increase performance across entire RPM band
- › Fine tune boost output with included knob
- › Designed to stack with PedalMAX[®]
- › High quality OEM-style connectors
- › Made in the USA with a lifetime warranty
