## JP GROUP COMPANY

### A STRONG FAMILY

Based in Viborg, Denmark, JP Group a/s has been a 100 % family-owned company since the foundation in 1975. Today, JP Group is one of the world's leading companies on the aftermarket, producing and selling high-quality spare parts and accessories for European and Asian cars to customers in more than 90 countries. Our product range covers more than 30.000 item numbers, which all follow strict OE quality standards. Moreover, we are one of the preferred suppliers of exclusive spare parts and accessories for classic cars from VAG and Porsche.

### EXTENSIVE PRODUCT RANGE

**Our product range covers high-quality components for a very wide spectrum of vehicles as e.g. brakes, filters, steering and suspension parts, rubber metal parts, electrical parts, starters, turbo chargers, water pumps and many others. Furthermore, we produce high-quality exhaust systems and body parts in a Viborg-based factory of our associate company Johs. Pedersen a/s. Apart from own production, we import spare parts from major manufacturers in more than 45 different countries.**

### FOCUS ON QUALITY

To meet the expectations of our customers and to ensure a high quality of all our products, we have established quality departments in Denmark and China. We also conduct sample tests and provide long-term installation in cars. **Last but not least our quality system is certified with ISO 9001.**

### CONSTANT DEVELOPMENT

With a total of more than 42.000 m<sup>2</sup> for production and warehouse facilities, we can guarantee a high delivery rate within all product categories. As a major step towards our future development and to be as close to our customers as possible, we have expanded our international sales team. Today, we have 17 highly-trained sales managers around the world. We also support our customers with a variety of different sales and marketing materials. We offer brochures for all product categories as print and online version – including the possibility to generate personal catalogues. The complete assortment is also available on our own webshop.

## AIRCOOLED EXHAUST VERSIONS

### OE/ECONOMY/HD AIRCOOLED EXHAUST VERSIONS

Our original Jopex air cooled exhausts are developed, produced and tested by JP Group, Denmark.

We have done our utmost to get as close to OE standards as possible regarding in- and outside construction: These exhausts are characterized by our short JP part number ending with "OE" such as for example VW-35020OE.

As an „standard“ alternative, we also carry exhausts without casted flanges and a slight different interior construction. The short JP part number is characterized by for example VW 35020. The weight is always 0,8 kg or 15% less than the OE version.

Finally, we produce a heavy duty (HD) version with a smooth black powder coated heat resistant finish. These exhausts are characterized by a short JP part number, ending with "HD" such as for example VW-35021HD.

**With casted OEM flange on one side.  
We have made new and improved tooling for a perfect fit.**
