## APPLICATIONS

## ADDITIONAL INFORMATION

J.W. Speaker’s Model 9800 is best suited for normal snow plowing, not “high speed” plowing on highways. Consult with your J.W. Speaker salesperson for more information.

The Model 9800 is not designed to be a plug and play for Boss snow plows. If you have a Boss snow plow please see your local Boss dealer for information on the right product to use.

Lamp design integrates acceptance of mating connector Delphi #1205848

## A SMART HEATING SYSTEM

The Model 9800 offers a smart heating system that senses ambient temperature and turns the integrated heating system in the lens on & off. This system only uses 15-18 watts of power, exceeds strict military standards for de-icing, and actually clears ice & snow twice as fast as conventional halogen lamps.

### When does the heater turn on?

Heater turns on or off according to temperature changes and vehicle power:

- Heater will turn on when temperatures drop, generating enough heat to prevent ice build-up
- Heater will turn on when powering up, de-icing the light as rapidly as possible
