K-1356

16-1/2" Brake Drum Puller

KIENE wheel pullers (the *Wheel Grabber* and *Wheel Whiz*) are the proven, safe way to remove a seized wheel.

Now with the addition of the **K-1356 Brake Drum Puller**, both tools have become the safe way to remove a seized 16-1/2" brake drum.

Using a large hammer to release a frozen drum may cause damage to the drum *and* the mechanic.

The **K-1356 Brake Drum Puller** gives you the option of re-using both!

K-1356 Brake Drum Puller shown with K-1350 Wheel Grabber

Adjusting screws
(two on top, one
at the bottom)
keep the puller
centered on drum

Welded Steel
Construction

Three chain assemblies
provide even pulling
force
