

INSTALLATION INSTRUCTIONS

Part Number 33-2123

This filter fits:

See current K&N catalog for complete listing

Congratulations, you have purchased the finest air filter that money can buy. With proper care, this filter will last 1 million miles or more. This filter is a direct replacement for the stock air filter, and no modifications will be required. However the following procedure **MUST** be followed to ensure a proper fit and seal of the air filter.

- 1) Remove the airbox lid.
- 2) Remove the filter element from the airbox base.
- 3) Wipe out any dust or dirt from the airbox lid with a damp cloth.
- 4) Double-check that the expanded wire is properly seated into the groove at each side of the filter.
CAUTION: Do not remove this wire when servicing the K&N Filtercharger.
- 5) Install the pre-oiled K&N Filtercharger into the airbox base. Be certain that the filter is properly seated into the base.
- 6) Slide the airbox lid into the three slots on the airbox base and carefully hinge it closed.
- 7) Reset the restriction gauge by pushing the button on its top. Service the filter at or before 15" of restriction.

These instructions must be followed every time the filter is serviced, otherwise the filter may not seal and damage to the engine could result.
