

INSTALLATION INSTRUCTIONS

Part Number 33-2225

This filter fits: See catalog for current applications

Congratulations, you have purchased the finest air filter that money can buy. With proper care, this filter will last 1 million miles or more. This filter is a direct replacement for the stock air filter, and no modification will be required. However the following procedures MUST be followed to ensure the proper fit and seal of the K&N® air filter.

INSTALLATION:

1. Remove the air box lid by un-snapping the air box lid clips, then remove the OE air filter from the air box. (Fig. 1)
2. Install K&N® air filter into air box. Fig. 2 highlights the correct installation of the air filter. The K&N® air filter must be installed into the air box so that the tabs on the air filter align with air box clips.

NOTE: The tabs on the K&N® air filter read “clip”. If installed properly, the word “clip” should be visible.

3. Ensure the K&N® air filter is properly seated into the air box.
4. Reinstall the air box lid and secure the air box lid clips.

THESE INSTRUCTIONS MUST BE FOLLOWED EVERY TIME THE FILTER IS SERVICED, OTHERWISE THE FILTER MAY NOT SEAL, AND DAMAGE TO THE ENGINE COULD RESULT.
