

# INSTALLATION INSTRUCTIONS

## Part Number 33-2449

This filter fits: See catalog for current applications

Congratulations, you have purchased the finest air filter that money can buy. With proper care, this filter will last 1 million miles or more. This filter is a direct replacement for the stock air filter, and no modification will be required. However the following procedures **MUST** be followed to ensure the proper fit and seal of the K&N® air filter.

### INSTALLATION:

1. Remove the stock air filters according to the service manual.
2. Wipe away any dust and debris from the inside of the airbox and all sealing surfaces.
3. Install the K&N® air filters into each airbox cavity. Each air filter is engraved with "This side up" on the top of the air filter. Ensure the top side of the air filter is facing upward when installed in the airbox. **Fig 1.**
4. To ensure proper sealing, make sure each K&N® air filter is properly seated in the airbox, the top of the air filters should be flush with the airbox edge. **Fig 2.**
5. Reassemble each airbox and install into the vehicle according to the service manual.

**THESE INSTRUCTIONS MUST BE FOLLOWED EVERY TIME THE FILTER IS SERVICED, OTHERWISE THE FILTER MAY NOT SEAL, AND DAMAGE TO THE ENGINE COULD RESULT.**
