

Installation Instructions

Part Number 33-2487

Congratulations, you have purchased the finest air filter that money can buy. With proper care, this filter will last 1 million miles or more. This filter is a direct replacement for the stock air filter, and no modifications will be required. However the following procedure **MUST** be followed to ensure a proper fit and seal of the K&N® Air Filter.

INSTALLATION

1. Remove the stock air filter from the air box.
2. Clean all sealing surfaces of the air box.
3. Install the K&N Air Filter into air box.

NOTE: For ease of installation of the air box lid, make sure K&N air filter sits against rail of the air box, and is centered as best as possible from left to right. (Fig. 1)

4. Reinstall air box lid and tighten screws.

THESE INSTRUCTIONS MUST BE FOLLOWED EVERY TIME THE FILTER IS SERVICED, OTHERWISE THE FILTER MAY NOT SEAL, AND DAMAGE TO THE ENGINE COULD RESULT.

* Pictures in this instruction sheet are for reference only. Your vehicle may look different. *

Center air filter as best as possible from left to right in air box before installing air box lid.
