

# INSTALLATION INSTRUCTIONS

## Part Number 33-2773

This filter fits:      **See catalog for current listings**

Congratulations, you have purchased the finest air filter that money can buy. With proper care, this filter will last 1 million miles or more. This filter is a direct replacement for the stock air filter, and no modifications will be required. However the following procedure **MUST** be followed to ensure a proper fit and seal of the K&N Air Filter.

### INSTALLATION

- 1) Remove the stock filter from the airbox tray.
- 2) Gently place the K&N Air Filter into airbox tray, making sure it is fully seated.
- 3) Using the supplied K&N Sealing grease, lube the backside of the air filter tray cartridge, (Fig.1), to ease in the installation of the air filter tray cartridge.

**NOTE: The lid will be a little harder to push close than with the OEM filter but will completely close with firm pressure.**

**THESE INSTRUCTIONS MUST BE FOLLOWED EVERY TIME THE FILTER IS SERVICED, OTHERWISE THE FILTER MAY NOT SEAL, AND DAMAGE TO THE ENGINE COULD RESULT.**
