

# INSTALLATION INSTRUCTIONS

## Part Number: VF1000

This filter fits:

SEE CATALOG FOR CURRENT APPLICATIONS

K&N® Cabin Air Filters replace your vehicle's stock cabin filter with a reusable design that cleans and freshens incoming air. They are electrostatically charged to grab and hold dust particles. K&N® cabin air filters help control odors while they help capture most mold, mildew, fungus, spores, bacteria and germs. When they get dirty they can be cleaned and reused and best of all, they come with a 10 year/100,000 mile limited warranty.

When applicable, refer to owner's manual for manufactures installation/removal instructions. The following are helpful steps when replacing/servicing cabin air filter with K&N® cabin [air filter](#).

1. Locate cabin air filter below the glove box and remove bolts holding fascia in place. Fig. 1 & 2
2. With fascia removed from vehicle, locate the door with one screw that holds it in place and remove. Fig 3, 4 & 5
3. When door is removed, pull the first cabin filter straight down and remove. Reach inside and slide the second cabin filter over to location of first cabin filter and remove. Fig 6 & 7
4. Once dirty cabin filter is removed clean any debris that might be present on the cabin filter housing.
5. Install 1st K&N® Cabin Filter in opening and slide to back of cabin filter air box. Now install the 2nd Cabin filter straight up into air box. Fig 8
6. Reinstall air box lid. Fig 9 **NOTE: You may need to hold filter in place while installing air box lid.**
7. With the cabin filter installed, clean an area on the housing and apply the K&N® Stop Decal. The decal will help notify others that this is a reusable cabin filter.
8. Reverse steps 1-4 to complete cabin filter installation.
