

INSTALLATION INSTRUCTIONS

Part Number: VF1012

K&N® Cabin Air Filters replace your vehicle's stock cabin filter with a reusable design that cleans and freshens incoming air. They are electrostatically charged to grab and hold dust particles. K&N® cabin air filters help control odors while they help capture most mold, mildew, fungus, spores, bacteria and germs. When they get dirty they can be cleaned and reused and best of all, they come with a 10 year/100,000 mile limited warranty.

When applicable, refer to owner's manual for manufactures installation/removal instructions. The following are helpful steps when replacing/servicing cabin [air filter](#) with K&N® cabin air filter.

1. Open glove box compartment. Fig. 1
2. Locate stop rod feature on side of glove box and remove. Fig. 2 & Fig. 3
3. Locate and remove stop features on the left and right side of glove box. Fig. 4 & Fig. 5
4. With stop features removed, lower glove box.
5. Locate cabin filter housing cover/tray and remove by pressing on tabs pulling tray from cabin filter housing. Fig. 6
6. Remove dirty cabin filter from tray. Fig. 7
7. Once dirty cabin filter is removed clean any debris that might be present on the cabin filter tray or inside the housing.
8. Install K&N® cabin filter into tray. Fig. 8
9. Reverse steps 1-5 to complete cabin filter installation. With the cabin filter installed, clean an area on the housing and apply the K&N® Stop Decal. The decal will help notify others that this is a reusable cabin filter.
