

# INSTALLATION INSTRUCTIONS

## Part Number: VF1013

This filter fits: SEE CATALOG FOR CURRENT APPLICATIONS

**K&N® Cabin Air Filters replace your vehicle's stock cabin filter with a reusable design that cleans and freshens incoming air. They are electrostatically charged to grab and hold dust particles. K&N® cabin air filters help control odors while they help capture most mold, mildew, fungus, spores, bacteria and germs. When they get dirty they can be cleaned and reused and best of all, they come with a 10 year/Million mile limited warranty.**

**When applicable, refer to owner's manual for manufacturers installation/removal instructions. The following are helpful steps when replacing/servicing cabin air filter with K&N® cabin air filter.**

1. Locate the glove box on the passenger side dashboard.
2. Squeeze the sides of the glove box to release the tabs on each side and access the cabin filter housing. (Fig. 1)
3. Unclip the lid and remove the dirty cabin filter. Remove any debris that might be present inside the cabin filter housing.  
**NOTE: Some vehicles will be equipped with a plastic tray. For models with a plastic tray see Fig. 2. For models without a plastic tray see Fig. 3.**
4. Install the K&N® cabin filter into the cabin filter housing.  
**NOTE: The cabin filter can only be installed one way. For models with a plastic tray see Fig. 4. For models without a plastic tray see Fig. 5.**
5. Close the lid on the housing to complete the cabin filter installation. (Fig. 6) With the cabin filter installed, clean an area on the housing and apply the K&N® Stop Decal. The decal will help notify others that this is a reusable cabin filter.
