

INSTALLATION INSTRUCTIONS

Part Number: VF2010

This filter fits: SEE CATALOG FOR CURRENT APPLICATIONS

K&N® [Cabin Air Filters](#) replace your vehicle's stock cabin filter with a reusable design that cleans and freshens incoming air. They are electrostatically charged to grab and hold dust particles. K&N® cabin air filters help control odors while they help capture most mold, mildew, fungus, spores, bacteria and germs. When they get dirty they can be cleaned and reused and best of all, they come with a 10 year/100,000 mile limited warranty.

When applicable, refer to owner's manual for manufactures installation/removal instructions. The following are helpful steps when replacing/servicing cabin air filter with K&N® cabin air filter.

1. Open glove box compartment and locate glove box stop feature. Fig. 1
2. Remove fasteners holding stop feature. Depending on your vehicle, the fastener may be a screw or a clip. Fig. 2
3. Locate glove box shock and release from glove box. On certain models, the glove box shock maybe located inside the fuse box compartment. Fig. 3 To release glove box shock, squeeze the tabs securing to glove box. Fig. 4
(NOTE: Depending on vehicle, glove box shock may have screw or fastener that will need to be removed)
4. Locate cabin filter housing behind glove box compartment and unfasten clips on the cabin filter cover. Fig. 5
5. Remove dirty cabin filter. Remove any debris that might be present on cabin filter tray and inside the cabin filter housing. Fig. 6
6. Install K&N® Cabin Filter. Fig. 7
7. Reinstall cabin filter housing cover onto cabin filter housing; ensure the cover is locked into place.
8. Reverse steps 1-4 to complete cabin filter installation. With the cabin filter installed, clean an area on the housing and apply the K&N® Stop Decal. The decal will help notify others that this is a re-usable cabin filter.
