# INSTALLATION INSTRUCTIONS
# Part Number: VF2033

**This filter fits:**          SEE CATALOG FOR CURRENT APPLICATIONS

**K&N® Cabin Air Filters** replace your vehicle's stock cabin filter with a reusable design that cleans and freshens incoming air. They are electrostatically charged to grab and hold dust particles. K&N® cabin air filters help control odors while they help capture most mold, mildew, fungus, spores, bacteria and germs. When they get dirty they can be cleaned and reused and best of all, they come with a 10 year/100,000 mile limited warranty.

**When applicable, refer to owner's manual for manufactures installation/removal instructions.  The following are helpful steps when replacing/servicing cabin air filter with K&N® cabin air filter.**

1. Open glove box compartment.  Fig. 1
2. Apply pressure to the sides of the glove box pushing into the center. This will allow the glove box to hang free allowing access to the cabin filter housing.  Fig. 2, 3
3. Remove cabin filter tray from cabin filter housing.  Fig. 4
4. Remove dirty cabin filter from tray. Remove any debris that might be present on cabin filter tray and inside the cabin filter housing. Fig. 5
5. Install K&N® cabin air filter into tray. **NOTE: Cabin filter will only fit in one direction, line up the rails in tray with the cut out features on the filter. Once filter is installed correctly the filter will sit flush inside of tray.** Fig. 6, 7 & 8
6. Reverse steps 1-4 to complete cabin filter installation. With the cabin filter installed, clean an area on the housing and apply the K&N® Stop Decal. The decal will help notify others that this is a reusable cabin filter.
