

INSTALLATION INSTRUCTIONS

Part Number: VF2037

This filter fits:

SEE CATALOG FOR CURRENT APPLICATIONS

K&N® Cabin Air Filters replace your vehicle's stock cabin filter with a reusable design that cleans and freshens incoming air. They are electrostatically charged to grab and hold dust particles. K&N® cabin air filters help control odors while they help capture most mold, mildew, fungus, spores, bacteria and germs. When they get dirty they can be cleaned and reused and best of all, they come with a 10 year/100,000 mile limited warranty.

When applicable, refer to owner's manual for manufactures installation/removal instructions. The following are helpful steps when replacing/servicing cabin air filter with K&N® cabin air filter.

1. Open glove box and locate glove box stop features. These will be on the inside of the glove box on the left and right side. Fig. 1
2. Turn stop feature to remove from glove box. Fig. 2.
3. Locate glove box shock. Remove fastener holding glove box shock. Depending on your vehicle, the fastener may be a screw or a clip. Allow shock to hang free. Fig. 3
4. Lower the glove box. Locate cabin air filter housing behind the glove box and remove the cover to locate cabin filter. Fig. 4
5. Remove dirty cabin filter from housing. Remove any debris that might be present in the cabin filter housing. Fig. 5
6. Install K&N® Cabin Filter. Fig. 6
7. Reverse steps 1-4 to complete cabin filter installation. With the cabin filter installed, clean an area on the cowl and apply the K&N® Stop Decal. The decal will help notify others that this is a re-usable cabin filter.
