1 Keep your struts clean! Just like your shifters and derailleurs, dirt, dust, and grime can work themselves into the mechanism resulting in sub-par performance. Periodically run a cloth around each Piston™ Pro X tube to keep your rack looking good and functioning smoothly.

2 Ensure tire cradles make contact with tires. Insufficient contact could result in bicycles becoming loose during travel. Each arm requires at least 1 click of engagement to ensure safe transport.

3 To solve any interference issues, bikes can be loaded in the same direction, or asymmetrically, as well adjusted left and right on their individual trays.

OneTap™ Operation

Deploying Piston™ Pro X Add-On arms provides easier access to tray bolt and tray nut locations.

- 1 Your Piston™ Pro X Add-On arrived with security tabs beneath each OneTap™ lever to ensure safe shipping. Pull each tab upward to remove them and operate the levers.

! Dispose of tabs after assembly.

- 2 Open each arm by tapping the OneTap™ levers.

Tray Assembly - Part 1

- 1 Each Piston™ Pro X Add-On tire tray features an EasyClip™ tab that will hook into a slot on the centerbeam, allowing the tire tray to hang in place during assembly.

 **Angle tire tray to help guide tab as it clips into slot.**

Tray Assembly - Expanded View

- 2 Hook labeled **A** tray to **A** position on centerbeam.
Hook labeled **B** tray to **B** position on centerbeam.

Tray Assembly - Part 2

- 1 Opening Piston™ Pro X arms provides easier access to tray bolt and tray nut locations.
- 2 With trays secured, insert M10 nut into **B** tray.

- 3 With M10 nut in place, insert M10x165 into A tray, through centerbeam, and into M10 nut. Tighten with 8mm hex key. **(Torque to 40-50Nm - Do not exceed 50Nm)**

It may be necessary to lift **B** Tray slightly to align bolt holes. Holding **B** Tray M10 Nut in place helps to ensure it stays secured during M10x165 installation and initial tightening.

Installation

- 1 Unlock built-in 8mm security hex key and use to remove center bolt on endcap. Once bolt is removed, pull endcap from the end of main Piston™ Pro X centerbeam.

- 2 Insert Add-On into Piston™ Pro X. For a much easier installation, we recommend inserting the Add-On with Piston™ Pro X already installed into your vehicle hitch.

- 3 Using the built-in 8mm security hex key, alternate tightening each bolt fully to **20-30Nm**. (**Do not exceed 30Nm**)

- 4 Reinstall Piston™ Pro X Add-On endcap and tighten endcap bolt to **20-30Nm**. Install and secure security hex key into the new Add-On endcap.

Store original Piston™ Pro X Endcap and bolt in a safe place should you choose to revert the Piston™ Pro X back to original capacity.

Using Pivot System

- 1 Raise and lower the rack using the lever with your foot or hand to release the pivoting hub.

Disassembly

- 1 To revert your Piston™ Pro X to the 2 bike configuration, disassemble and remove Piston™ Pro X endcap assembly.
- 2 Using the built-in 8mm security hex key, completely loosen both M10 bolts located beneath endcap assembly.

- 3 Lift Add-On up and out of Piston™ Pro X base unit.

Disassembly - Continued

- 4 Reinstall Piston Pro X™ endcap and tighten endcap bolt to **20-30Nm**. Install and secure security hex key into Piston™ Pro X endcap.

OneTap™ Operation

- 1 Open each arm by tapping the OneTap™ levers.
Stand back and watch! Each arm will fully open automatically.

! Stand clear of automatic arms to avoid impact.

- 2 To close, simply push arms back down into stowed position. There is no need to re-engage the OneTap™ lever.

! Refer to Piston™ Pro X Two-Bike instructions for lock and over-center arm function.
