

2021 CATALOGUE
MADE IN THAILAND

INTRODUCTION

With a rapid growth for more than 8 years, Landspider Group has become one of the most professional tire suppliers. Our global marketing network covers over 150 countries and regions with a total turnover of around 200 million US Dollars during year 2020, and aiming for 300 million US Dollars in year 2021.

With a clear intention to become a strong player in the US market, Landspider decided to establish its US subsidiary in Los Angeles, California, which lies in one of the hearts of the modern US automotive industry.

- Quality tires from Thailand produced by advanced equipment with high level of services;
- Experienced professionals with deep knowledge and understanding of your needs;
- US marketing department for your support;
- Convenient logistic solutions available;

EXCELLENT GRIP

Large tread blocks with biting edge provides traction in a variety of conditions. Multi-directional grooves and sipes design creates better traction in any direction.

Bionic claw-shape design provides extra grip on mud and loose soil; the thick sidewall shield and specialized compound helps guard against sharp objects from any angle approaching.

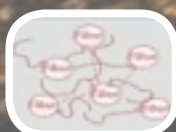

ZIGZAG SIPE DESIGN

High density sipes design produces a better performance on water evacuation and constant grip with better traction.

Reinforced carcass by stimulation optimization provides excellent impact resistance, durability and handling performance.

LONG DURABILITY COMPOUND

With the application of extended tread life with a durable tread compound, it stands up to the stress of tough road conditions, while not compromising to a comfort ride experience.

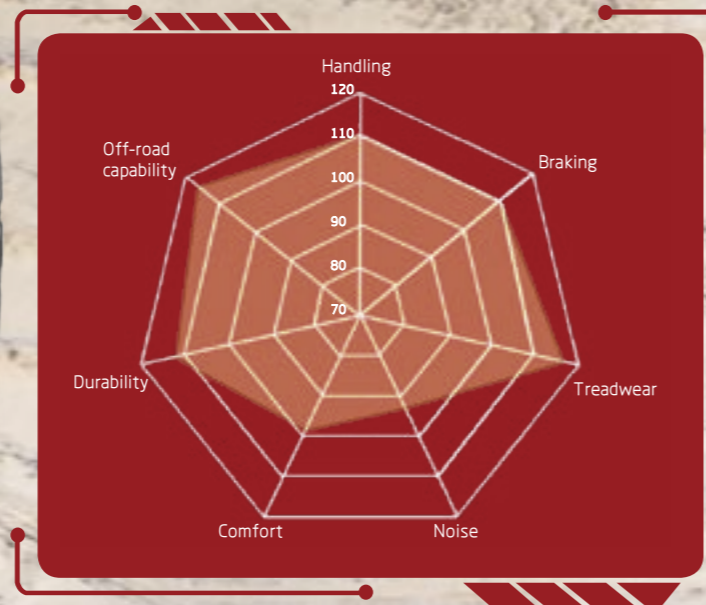

The block-chain control system produces better handling performance with long treadwear life.

WILDTRAXX R/T

WILDTRAXX R/T

AGGRESSIVE BLOCKS

The bold aggressive design with large tread blocks provides more contact area, the block-chain control system produces better handling performance with quiet and comfortable ride experience.

Thick tyre side protection design, effectively avoid tyre side damage; Eagle claw and gravel side modeling, the appearance of more robust prominent.

ZIGZAG GROOVE

High density zigzag steel groove effectively removes water on wetland pavement to provide continuous and stable grip.

New wear - resistant formula, can be suitable for some of the more stringent road surface, ultra-long driving range to ensure the life of the tire.

STRONG GRIP

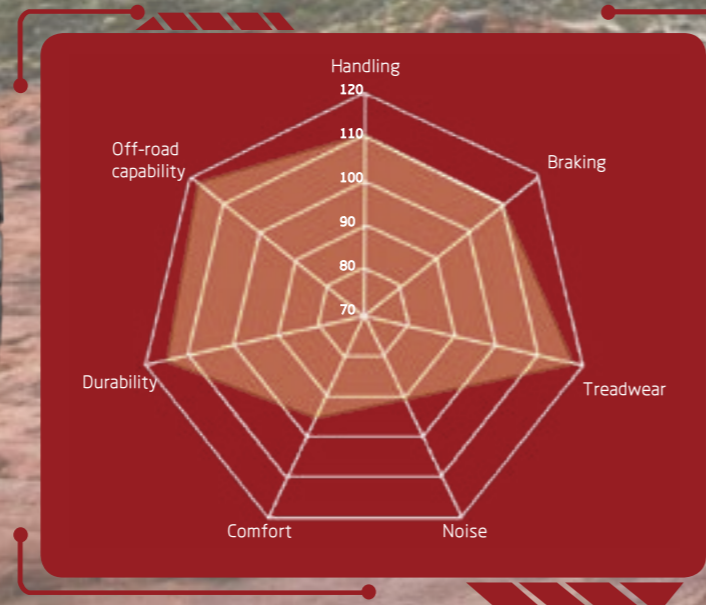

Block edge and tire shoulder step design to provide extra grip performance during driving and turning.

Self-cleaning grooves design ensures good aquaplaning resistance and reducing tire damage by hindering stones from getting caught.

WILDTRAXX M/T

BOLD & AGGRESSIVE DESIGN

The bold aggressive design with large tread blocks provides more contact area, the block-chain control system produces better handling performance with quiet and comfortable ride experience.

With alternating convex and concave sipes on the tread blocks and bionic claw-shape design, it provides extra grip on mud and loose soil; the thick sidewall shield and specialized compound helps guard against any sharp objects.

EXTREME GRIP

Highly angled center tread blocks enhance traction and lateral stability while reducing road noise.

Self-cleaning grooves design ensures good aquaplaning resistance and reducing tire damage by hindering stones from getting caught.

TEAR-RESISTANT COMPOUND

With the application of new tear-resistant compound, it provides the durability to conquer any dirt, gravel, grass or mud conditions with better treadwear life.

3 layers reinforced carcass with stimulation optimization provides excellent impact resistance, durability and handling performance.

CITYTRAXX G/P

COMFORTABLE AND QUIET

With more blocks of different sizes, simulation optimization, the noise band is tended to be evenly dispersed into a wider frequency range, preventing harmonic tread pattern sound.

Four main longitudinal grooves combined with high density lateral sipes improves water evacuation for excellent resistance to hydroplaning.

EFFICIENCY

High siping density design increases braking and wet grip performance; Interlocking grooves and sipes design prevents warping effect while braking, provides even distribution on the pressure against road.

Stimulation optimization produces impressive traction in dry condition along with extreme wet grip performance.

STIMULATION OPTIMIZATION

Stimulation optimization design provides enhanced tread stiffness with excellent steering precision and stability in high speed.

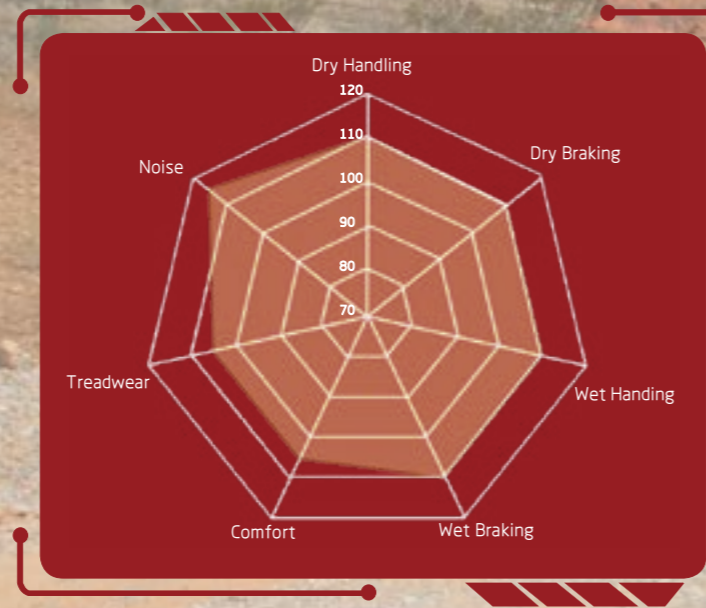

Abrasion resistance and low rolling resistance tread compound provides impressive mileage, extended tread life and improved fuel efficiency.

CITYTRAXX H/P

ASYMMETRIC PATTERN

Asymmetric pattern design provides water evacuation ability for the inner side, while the big blocks for the outer side produces precise steering with impressive cornering stability.

High density sipe design provides more road contact with improved braking capability and wet grip; Zigzag sipe design provides comfort and stable ride experience.

COMFORT AND QUIET

With more blocks of different sizes, simulation optimization, the noise band is tended to be evenly dispersed into a wider frequency range, preventing harmonic tread pattern sound, providing a more comfort ride.

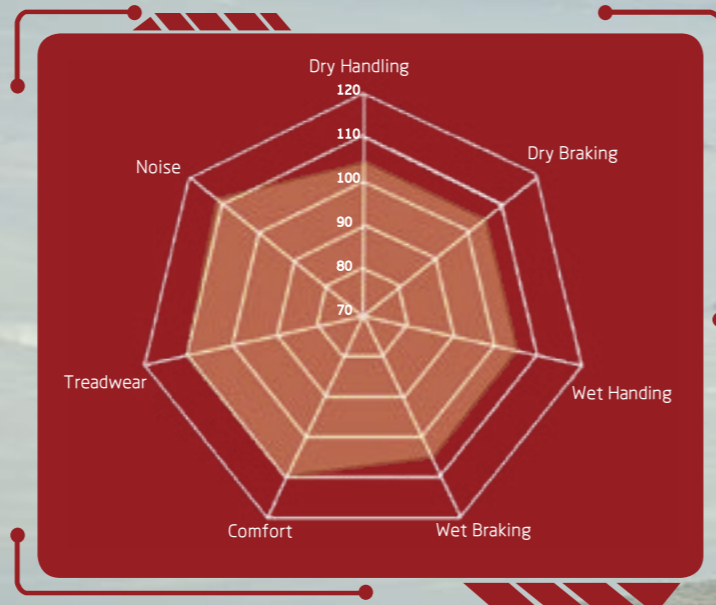

Strong outer shoulder with chamfered tread blocks reduces distortion in the tread when cornering in high speed; with stimulation optimized tread stiffness, it produces more steering precision and stability in high speed.

CITYTRAXX H/T

COMFORT AND QUIET

Multi-pitch optimized combination design allows a evenly dispersing of the noise into a wider frequency range, which produces a more quiet and comfortable ride experience.

With stronger outer shoulder with chamfered tread blocks, it reduces distortion when cornering in high speed, while produces more steering precision and stability in high speed.

PRECISE STEERING

High density sipe design provides more road contact with improved braking capability and wet grip; Interlocking grooves and sipes design prevents warping effects while braking, effectively shorten braking distance.

Bionic claw-shape design provides extra grip on mud and loose soil; the thick sidewall shield and specialized compound helps guard against sharp objects from any angel approaching.

LANDSPIDER 

2021 TBR TIRES

LONGTRAXX AP200

● Standard Wheel
 ● Permitted Wheel
 ⊗ Prohibited Wheel

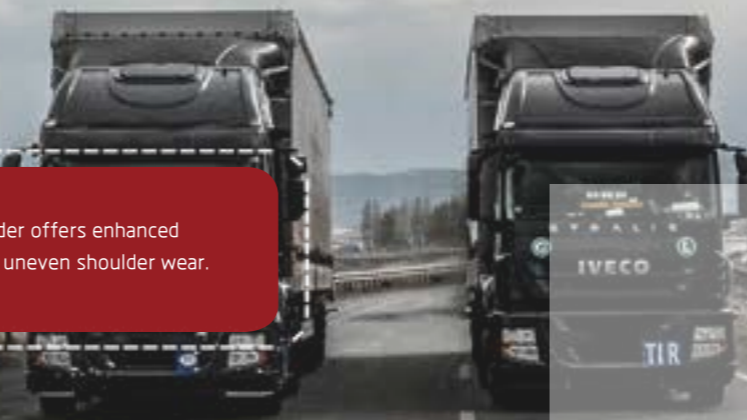

Four wide grooves provide better straight drivability for line haul service.

Strong shoulder offers enhanced resistance to uneven shoulder wear.

Wide tread optimizes footprint shape for improved handling and response in long haul service.

Wheel Diameter	Sizes Description		Tread Depth mm 1/32"	
22.5	295/75R22.5	147/144M	15.0	19.0
	11R22.5	146/143M	15.0	19.0
24.5	11R24.5	149/146M	15.0	19.0

LONGTRAXX DR220

● Standard Wheel
 ● Permitted Wheel
 ✗ Prohibited Wheel

Zig-zag grooves provide excellent traction and handling performance.

Block design to improved damage resistance.

Wide shoulders provide a stability and better performance.

Shoulder lugs design to help reduce tread temperature.

Wheel Diameter	Sizes Description		Tread Depth mm 1/32"
22.5	295/75R22.5	147/144M	21.0/26.5
	11R22.5	146/143M	21.0/26.5
24.5	11R24.5	149/146M	21.0/26.5

LONGTRAXX MS300

● Standard Wheel
 ● Permitted Wheel
 ⊗ Prohibited Wheel

Deep tread depth ensures longer tyre life.

Siped zig-zag rib helps improve traction on wet and muddy surface.

A strong shoulder block ensures a flat even wear on all types of application with shallow lug grooves on shoulder to minimize shoulder heel and toe.

Wheel Diameter	Sizes Description		Tread Depth mm 1/32"
22.5	11R22.5	146/143M	17.0 21.4
24.5	11R24.5	149/146M	17.0 21.4
