

Millennium TSAP PRO

Millennium TASP Pro is a professional diagnostic tool which integrates TPMS sensor activation, reading, learning and programming. It uses high and low radio frequency to activate and read tire pressure sensor information and uses the OBD interface to reset the TPMS modules. And it can unlimitedly program Launch sensors, covering all major OE sensors. Perfect solution kit with 4 Metal + 4 Rubber dual frequency (315MHz & 433MHz) RF sensors

- Use 125KHz modulating wave signal to activate sensor, Receive 315MHz/433MHz RF signals
- Read TPMS sensor ID, tire pressure, and temperature
- Read and write sensor ID via OBD interface
- Display status of four wheels graphically
- Wireless programming, unlimited programming
- Perfect solution kit with 4 Metal + 4 Rubber dual frequency (315MHz & 433MHz) RF sensors
