LIMBSAVER

INDUSTRY LEADERS

Always pursuing advancement, we are constantly researching, testing, and evaluating technologies, materials, and designs to ensure that we produce the most effective sound and vibration-dampening products possible.

Well-known companies from around the world come to us to have their products tested, evaluated, and improved by our engineers.

OUR ROOTS

We believe that the best products are born from hard work and determination. From the very beginning, here at LimbSaver®, we have been committed to engineering the most advanced products utilizing the most state-of-the-art technology.

Throughout the years, we have been trail-blazers in the industry, producing the most effective noise and vibration-dampening technology.

AMERICAN MADE

The vast majority of our products are made right here in Shelton, WA. For two decades we have been making the highest quality and best performing archery and firearms products in the world.

We have always employed teams of industry experts and engineers that design, test, and perfect every single product, ensuring that what is produced is the best in the world.

We are avid sportsmen, competition shooters, and hunters and we make products that we are excited to use.

Customer Reviews

★★★★★
Utility Knife of Holsters

Bought two as they're versatile, modular, comfortable, both IWB and OWB. Retention is great, and it completely covers the trigger. Wear was something I was concerned about when I purchased the first one. After form fitting it I used it plenty of times and long enough that I felt comfortable getting a second and doing the same.

★★★★★
One of the Best Holsters I Own

The CrossTech is very comfortable and very concealable; I can barely feel it and it doesn't weigh me down. My FN509 has finally found a home... This is one very nicely crafted, tough holster. It's amazing how easy it is to maneuver from OWB to IWB, and it saves money and shopping time searching for extra holsters.

CROSSTECH™

A CUSTOM FIT HOLSTER *for nearly every pistol*

Fits Glock, Smith & Wesson, Ruger, HK, Sig Sauer, FN Herstal, Colt, Kel-Tec, Kahr Arms, Kimber, Taurus, Steyr Arms, Walther, Springfield, Beretta, CZ, all 1911 handguns, and many others.

EDC COMFORT *at its finest*

The CrossTech Holster is flexible and comfortable enough for every day carry (EDC).

The CrossTech is a revolutionary **HEAT ACTIVATED** *custom holster* *system*

Conforms to your handgun in minutes using a heat gun or oven.

CUSTOMIZE IT *your way*

Adapt this holster to meet your needs: Choose from IWB or OWB, right-hand or left-hand, gun angle, shallow or deep concealment, and customize it to fit almost any handgun.

OWB

IWB

CUSTOMIZATION

From full frame to subcompact and semi auto to revolver, the CrossTech Holster can be easily customized at home to fit nearly any handgun.

For a custom, comfortable fit, just reconfigure the Adjustment Bolts and then use a heat gun or oven to conform the holster to your handgun. It only takes a few minutes!

TOP COMFORT

The CrossTech Holster is comfortable enough to wear all day, and reliable enough to be the holster you choose to use for daily carry.

It is made out of a soft, flexible material that eliminates pinching, pressure points, and uncomfortable digging-in associated with hard-shell holsters, yet stiff enough to ensure proper trigger guard.

The new smaller, more compact size makes comfortable concealment even easier for micro-compact, subcompact, compact, and some full-size pistols

FEATURES

- Smaller size is perfect for micro-compact to compact handguns as well as some full frame sizes
- Designed for maximum comfort
- Adjustment Bolt System makes it easy to customize the fit of the holster
- Heat-activated material forms to the general shape of your pistol when a heat gun or oven is used
- Ultra-strong belt clips convert from IWB to OWB in minutes
- Ambidextrous, adjustable cant, shallow to deep concealment, multiple carry positions

COMPACT VS. ORIGINAL size comparison

CROSSTECH HOLSTER COMPACT 12507

Customize at home for optimum comfort and to fit virtually any handgun

FEATURES

- Ambidextrous, adjustable cant, shallow to deep concealment, multiple carry positions
- Ultra-strong belt clips convert from IWB to OWB in minutes
- Designed for maximum comfort
- Adjustment Bolt System makes it easy to customize the holster to fit nearly any handgun
- Heat-activated material forms to the general shape of your pistol when a heat gun or oven is used
- **SECURE STRAP** (on 12504/12506) wraps around the top of the handgun and snaps into place - providing retention and security

CROSSTECH HOLSTER 12501
CROSSTECH HOLSTER W/ SECURE STRAP 12504

Optional Secure Strap

Designed to be worn on top of your outer layer and is great for hunters and outdoor enthusiasts

FEATURES

- Durable, adjustable belt has an easy-to-use buckle - maximum belt length: 65"
- Adjustment Bolt System makes it easy to customize the holster to fit nearly any handgun
- Heat-activated material forms to the general shape of your pistol when a heat gun or oven is used
- Ambidextrous, adjustable cant
- Secure Strap wraps around the top of the handgun and snaps into place - providing retention and security

CROSSTECH HOLSTER - BELTED W/ SECURE STRAP 12506

*This holster must be used with attached belt

CROSSTECH™ HOLSTER

LEATHER - COMFORT AND CLASS

The Leather CrossTech Holster marries comfort and class. We designed the leather CrossTech to have the same universal fit and customization of the original CrossTech, but now with a traditional look and feel.

This premium holster is made from high-quality, genuine leather for maximum durability and comfort. It only gets better with age.

EASY ADJUSTMENT

Watch installation

From full frame to subcompact and semi-auto to revolver, the CrossTech Leather Holster can be easily customized at home to fit any handgun.

The Adjustment Bolt System allows you to change the fit of the holster. Water-activated forming method causes leather to shape around your pistol in minutes.

RECOIL PADS

Customer Reviews

Great Recoil Pad

Installed on a Tikka T3 in 7mm Rem Mag. Recoil pad makes a big difference and allows for all day shooting with a lightweight magnum. Felt recoil is reduced to feel just slightly heavier than my .270.

Problem Solved

I Highly recommend the [AirTech® Slip-On] recoil pad for the Mosin-Nagant M44. My only problem (with my rifle) is the horse-like kick and the bruised shoulder the next day. Problem solved.

Angels Were Singing...

Holy smokes! I recently bought a Turkish Girsan MC312 HDT (Heavy Duty Tactical) semi-auto shotgun... Shooting magnum turkey loads or magnum buckshot was utter punishment. It was even harsh with the 2 3/4" shells.

I went to the range yesterday after installing the AirTech® pad, and it was a totally different experience. I ended up wanting to spend the afternoon shooting the shotgun! I have to say, I'd go online and sing a song about this AirTech pad, because it **turned my shotgun from harsh to comfy!**

Find the perfect recoil pad to protect your shoulder

Up to 70% felt-recoil reduction
on wood, synthetic, laminate, and composite stocks!

AIRTECH® PRECISION-FIT HIGH-TECH SHOULDER PROTECTION

SHOOT MORE ACCURATELY

AirTech® pads help to increase your accuracy by giving you a stable shooting platform that grips to your shoulder and stays in place even in the rain. They incorporate **anti-muzzle-jump technology** for quick and accurate follow-up shots.

Additionally, by reducing felt recoil and pain, you will be **less likely to flinch**, which will make you a more consistent shooter overall.

Classic Recoil Pads

RECOIL REDUCTION

LimbSaver® Classic Recoil Pads protect your shoulder from the pain of recoil. They enable you to shoot longer without discomfort and bruising, while also helping to increase accuracy of follow-up shots and provide improved control for maximum stability.

Pads are made from LimbSaver's proprietary NAVCOM® technology (Noise and Vibration Control Material), which effectively absorbs a wide range of frequencies to dissipate energy and vibration.

GRIND TO FIT

Recoil Pads

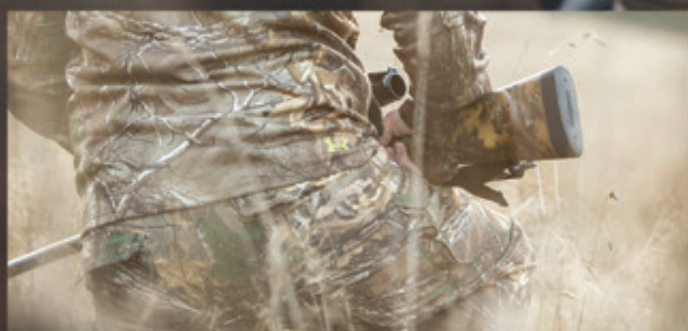

PERFECT FIT

Our Grind-to-Fit® Recoil Pads are the ideal solution for people who want that perfect, custom fit, and also for those who have a stock for which we do not have a Precision-Fit match.

Grind-to-Fit® recoil pads offer the greatest customization of any LimbSaver® recoil pad. They are designed to be perfectly tailored to fit your stock using a belt grinder. We recommend that professional shops modify and install these pads.

UNIQUE STYLES

In addition to the traditional 1"-thick pad, we provide our customers with some unique recoil pad styles that are offered exclusively in our Grind-to-Fit® line. Many shooters prefer the specialized designs, such as the Low Profile, Speed Mount, Trap, or Nitro Pads due to their different needs.

Please see page 32 for special order Grind-to-Fit® styles.

- Reduces up to 70% of felt recoil
- Anti-muzzle jump technology
- Flinch less and shoot more accurately
- 1-inch thick (LOP)

TACTICAL Recoil Pads

NEW FOR 2019

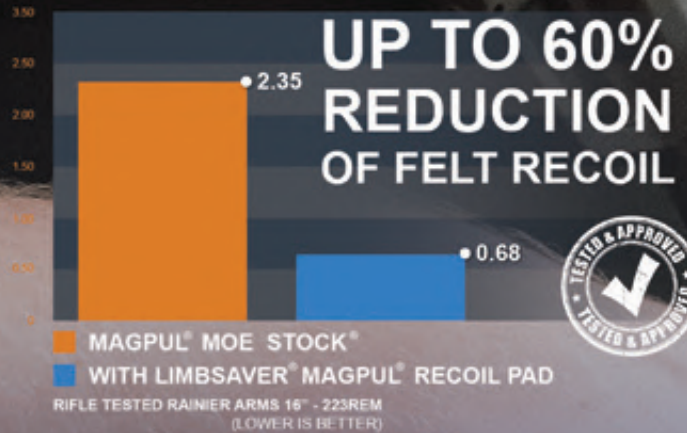

Here to fulfill popular demand is our brand new Magpul® V2 Precision-Fit Recoil Pad for MOE SL stocks.

BETTER PRECISION

LimbSaver® recoil pads for Magpul® stocks give you a stable shooting platform. Each of our tactical buttstock accessories incorporate anti-muzzle jump technology that allows for faster target re-acquisition and helps increase accuracy of follow-up shots. You will enjoy heightened control and maximum stability.

It's no secret that flinching results in poor accuracy. A comfortable shooting experience is key to your precision. If you are feeling discomfort or pain while putting a lot of rounds down range, this may cause undesirable groupings.

LimbSaver® tactical pads protect your shoulder from recoil. Made from our proprietary NAVCOM® technology (Noise and Vibration Control Material), the recoil pads reduce up to 60% of felt recoil for comfortable shooting. Flinch less, shoot better.

Customer Reviews

★★★★★
Most Comfortable

I ordered this recoil pad to replace the stock butt pad on a Magpul CTR milspec carbine stock. Installation was fast and straight forward. This replacement recoil pad is well made and is the most comfortable butt stock pad I have used. Definitely a worth while investment.

★★★★★
Great Value for the Money!

In my view these are the best recoil pads available for the AR-15 platform! When used in conjunction with a good muzzle break, muzzle jump is eliminated allowing unbelievably fast follow-up shots.

MAGPUL® V2 PRECISION-FIT RECOIL PAD

NEW FOR 2019
5/8" THICK PAD

Upgraded performance for Magpul® MOE SL Carbine Stocks

MAGPUL® V2 PRECISION FIT
10829 Black

FEATURES

- Easy-to-install recoil pad helps reduce up to 60% of felt recoil and increase stability for improved control
- Incorporates anti-muzzle jump technology for faster target re-acquisition
- Non-slip surface ideal for use in all harsh weather conditions and helps keep stock securely positioned on your shoulder
- Fits Magpul® MOE SL stocks

MAGPUL® PRECISION-FIT RECOIL PAD

5/8" THICK PAD

Adds comfort and performance to Magpul® stocks

MAGPUL® PRECISION FIT
10025 Black

FEATURES

- Easy-to-install recoil pad helps reduce up to 60% of felt recoil and increase stability for improved control
- Incorporates anti-muzzle jump technology for faster target re-acquisition
- Non-slip surface ideal for use in all harsh weather conditions and helps keep stock securely positioned on your shoulder
- Fits Magpul® Stocks including STR®, ACS™, ACS-L™, and UBR®, MOE® (MAG400) and Com/Mil-Spec CTR® (MAG310).

TACTICAL Recoil Pads

TACTICAL COMFORT

All of our tactical recoil pads make shooting your tactical rifles more comfortable and more accurate.

The LimbSaver AR-15/M4 Snap-On Recoil Pad securely snaps onto most six-position adjustable stocks to reduce felt recoil by up to 60% while reducing muzzle jump. The recoil pad helps increase the accuracy of follow-up shots and you'll enjoy increased control for maximum stability.

ADAPTABLE

The Tac-10 is designed as a drop-in replacement for AR-15 / M4 adjustable rifle stocks utilizing carbine-length buffer tubes. It is engineered with an unheard of ten length-of-pull adjustment positions in increments of one-half inch. The Tac-10 buttstock features two unique dual integral receiver mounting points for standard quick-detach hardware, perfect for right or left hand use. A standard sling attachment point is also included.

A LimbSaver recoil pad is mounted to the Tac-10. It will reduce up to 60% of felt recoil and substantially reduce muzzle jump for heightened accuracy. Its snag-free design won't hinder quick rifle positioning. It truly is an impeccable design. Quick detach hardware not included.

AR-15 RECOIL PAD - TACTICAL SNAP-ON

3/4" THICK PAD

A popular upgrade that fits most mil-spec tactical stocks

AR-15 RECOIL PAD

10019 Black
10020 Tan

FEATURES

- Reduces up to 60% of felt recoil, increase stability for improved control
- Non-slip material helps keep rifle securely positioned against your shoulder; can be used in all harsh weather conditions
- Reduces muzzle jump allowing for faster target re-acquisition
- The easy-to-install pad is made of semi-flexible material which is designed to slip over the stock of the gun without any tools or modifications required

AR-15 ACCESSORY KIT

3-PIECE KIT

This kit includes three products to give you excellent control and heightened accuracy from your tactical rifles

FEATURES

- **A) AR-15 Recoil Pad:** reduces recoil and muzzle jump, and helps keep your rifle securely positioned against your shoulder
*See above for more details
- **B) Tactical Pro Grip:** gives you maximum comfort and grip for a smoother, more controlled shot
*See pages 28-29 for more details
- **C) Sharpshooter X-Ring:** improves your accuracy while dampening barrel whip
*See pages 30-31 for more details

12301 Black

SLINGS

Customer Reviews

★★★★★
American Made

This [Kodiak-Lite Sling] is the best sling I've ever purchased. Nice quiet swivels, easily adjustable, stays on your shoulder without the fatigue of other slings and made in USA.

★★★★★

Great!
[The Kodiak-Air is a] good fit for me on my .270. Very comfortable, breathable, and actually fit me. (6'3" 310 lbs). The hand hold is a very nice touch.

★★★★★
A bear of a rifle sling

I field tested the Kodiak-Air sling on my Elk hunt in Idaho. We averaged 6 miles a day hiking. It worked great... We had rain, snow, sleet, and sunshine every day we hunted. The sling stayed on my shoulder even when wet. It dried quickly, stayed pliable with the icy weather. I will be replacing the leather and nylon straps I have on my other rifles with the Kodiak Air.

When you need to carry your rifle, carry it comfortably and securely.

HANDGUN GRIPS

COMFORT

The Pro Handgun and AR-15 Rifle Grips are designed to provide maximum reduction of muzzle jump and felt recoil for a smoother, more accurate shot.

Multiple impact nodes are located on the inside of the grip, isolating the shooter's hand from the firearm and reducing the pain and discomfort associated with handgun recoil.

It features a protection lip that shields your thumb from the hammer guard contact point during recoil.

FIT

The Pro Grip has a universal-fitting stretch design that conforms to finger grooves and ensures it stays in place during use.

Pro Grips are not recommended for handguns with grip safeties.

★★★★★
Reduced Recoil

I bought this [LimbSaver Pro Grip] after reading reviews of people using it on a Walther PPS 10 MM handgun. It worked much better than my expectations. It made my gun much more stable in the hand while shooting with minimal movement and a much reduced recoil.

PRO HANDGUN GRIP

4 SIZES

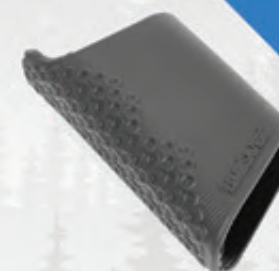

Protects your hands and helps you grip your pistol better

FEATURES

- Provides maximum reduction of muzzle jump and felt recoil for smoother, more accurate shot
- Reduces the pain and discomfort associated with firearm recoil
- Made from LimbSaver's proprietary vibration-dampening NAVCOM® material
- Universal-fitting stretch contour design
- Made in USA

SHOOTING ACCESSORIES

TIGHTER GROUPS

The LimbSaver® Sharpshooter X-Ring barrel dampener allows you to tune and minimize the barrel harmonics of your rifle, thereby improving accuracy.

Simply adjusting the position of the X-Ring on the barrel to its "sweet spot" allows the user to achieve sub-MOA (minute of angle) groups with factory ammunition. With the X-Ring, you can dramatically affect the accuracy of your rifle without the need to hand load your own ammunition!

WITH

SHARP SHOOTER X-RING TIGHTENS GROUPS

★★★★★
Worked great for me!

I have a 22 cal. Cz 452 American that shot best with wolf match extra ammo. Average groups from different lots of wolf was about .5 inch 5 shot groups at 50 yds. Found the sweet spot [for the Sharpshooter X-Ring] and now averages .3 inch groups. Last night it was calm so I tried the gun at 100 yds. Only had time to shoot 2 groups before getting dark. The groups were .62 and .7 inch. I'm sure the groups would have been well over an inch without the de-resonator. I also found the sweet spot on a marlin 17 hmr VS. I was averaging 1.1 inch 100 yd. groups before putting on the X-Ring. With the same box of ammo I averaged .4 inch groups after a little experimentation. This is a great product and for the price you may want to try one on you gun.

Customer Reviews

★★★★★
It works

This [Sharpshooter X-Ring] is a great product. You have to take some time to find the sweet spot. Every rifle will be different. I had a very unruly .22wmr that would not deliver better than a 3" group at 100 yards. After installing and adjusting this product I can now put bullets through the same hole. If you take the time to tune this in it will improve your rifles accuracy.

SHARPSHOOTER X-RING

BARREL
DERESONATOR

Improves accuracy and tightens groups

SHARP SHOOTER X-RING
12051 Standard - Black
12052 Bull Barrel - Black

FEATURES

- Improves accuracy while also dampening barrel whip
- Consistently control muzzle movement during lock-up time for greater accuracy
- Made from LimbSaver's proprietary NAVCOM® material to dampen vibration
- Tunes the vibration waves that affect shot grouping

SIZING:

Available for standard & bull barrels. Bull barrel size also works on scoped slug shotguns.

Standard Size Fits ½" to ¾" Barrel Diameter
Bull Barrel Size Fits ¾" - 1¼" Barrel Diameter

PROTECTIVE SHOOTING PAD

SHOOTING VEST

Easy-to-wear vest protects your shoulder from felt recoil

FEATURES

- Reduces up to 60% of felt recoil to help prevent pain while shooting
- Ideal for those who are especially sensitive to firearm kickback; can be used in addition to LimbSaver recoil pads for maximum protection
- Shoulder pad made from LimbSaver's proprietary NAVCOM® material to reduce felt recoil
- Useful for extended shooting sessions
- Fully adjustable sizing; reversible for right or left-handed shooters
- Built for use in all weather conditions, rain or shine

PROTECTIVE SHOOTING PAD
90102 Black
90100 Additional Protective Shooting Pad Insert (for extra padding)

RIFLE LUBRICANT PEN W/ NEEDLE

GUN OIL

Protects your gear from rust and corrosion, even in the harshest climates

RIFLE LUBRICANT PEN W/ NEEDLE
8005 .25 oz

FEATURES

- It keeps your firearm shooting smoothly and helps prevent rust
- The needle applicator allows you to get the oil in the tightest spots with no mess, saving you cleanup and money
- Cleans all gun parts (and more) while lubricating
- Rifle Lubricant is environmentally safe, non-toxic, non-flammable, odorless, and silicon-free

RECOIL PAD TEMPLATES

WHY WE RECOMMEND USING TEMPLATES:

Many manufacturers modify their stock dimensions yearly, making it difficult for us to keep one specific model available for one specific manufacturer. You may also have a less common gun that we do not list in our Recoil Pad Reference Guide, but you may find a pad that works great. For those reasons we have provided these templates to help you match your buttstock.

OTHER OPTIONS:

If you have a stock that one of our [Precision-Fit Recoil Pads](#) will not fit, you can utilize our [SLIP-ON Recoil Pads](#) which deliver the same felt recoil reduction as the Precision-Fit Pad. Removal of existing pad is recommended, but not required. You may also utilize our [GRIND-TO-FIT® Recoil Pads](#), but these may require a visit to your local gunsmith.

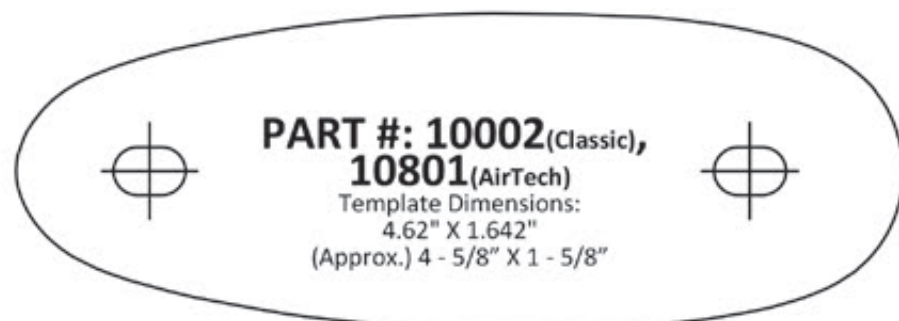

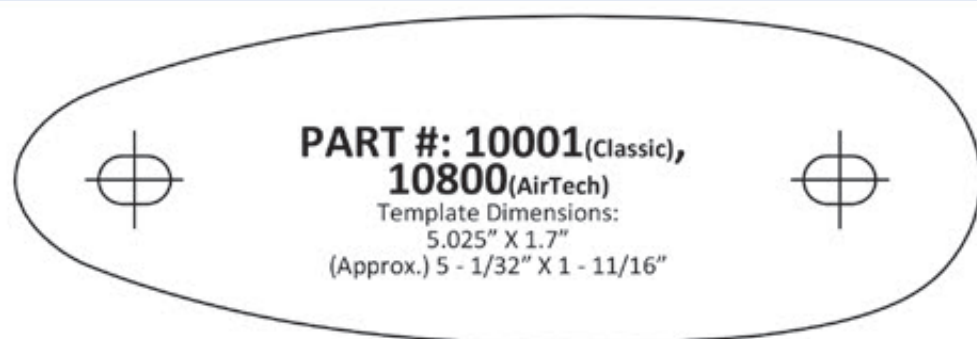

TEMPLATE INSTRUCTIONS:

Simply remove the existing recoil pad or plate from your butt stock by unscrewing. If your recoil pad is glued on, it may require gunsmithing.

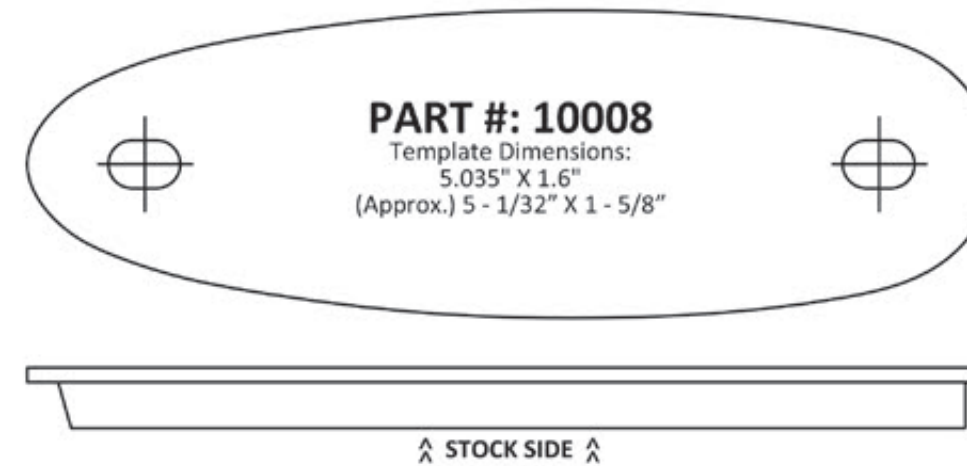

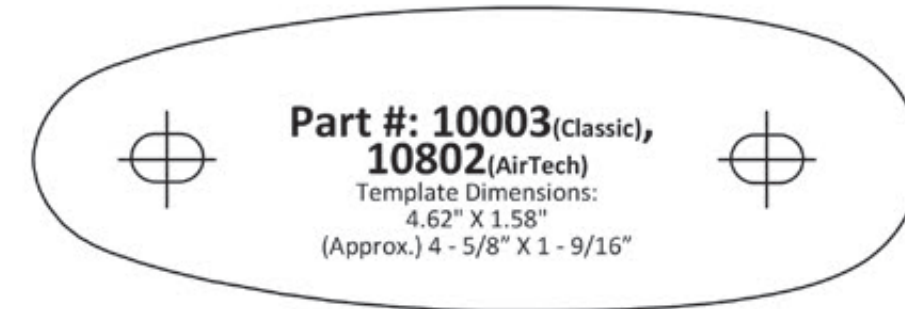

Place the gun stock on top of each template until you have found a match. Cut template out and place on stock to check for perfect fit and to determine screw hole location. If the screw holes do not line up, you can slot or elongate the screw holes on the bottom of our plate an additional 3/16" or more towards the heel or the toe and 1/16" towards the center of the pad (use a Dremel® tool with sanding attachment) to match the holes in your stock. This is regardless of wood or synthetic stocks. Please note: This only refers to the template recoil pads that are not already elongated or slotted.

Once a match is found, the product number will be on that specific template so you will know which one to order.

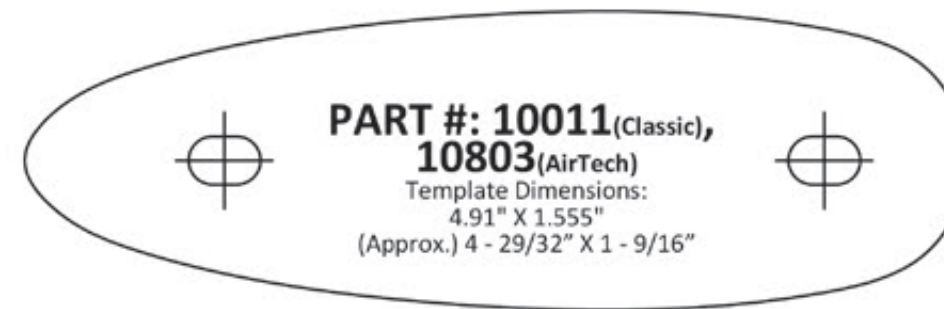

PRECISION-FIT RECOIL PAD TEMPLATES

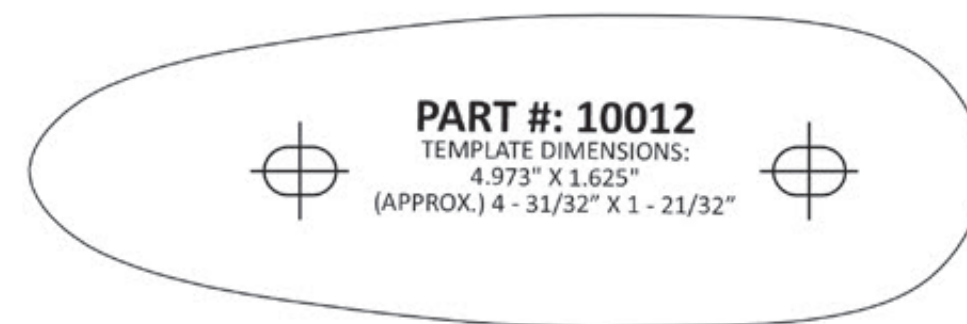

PRECISION-FIT RECOIL PAD TEMPLATES

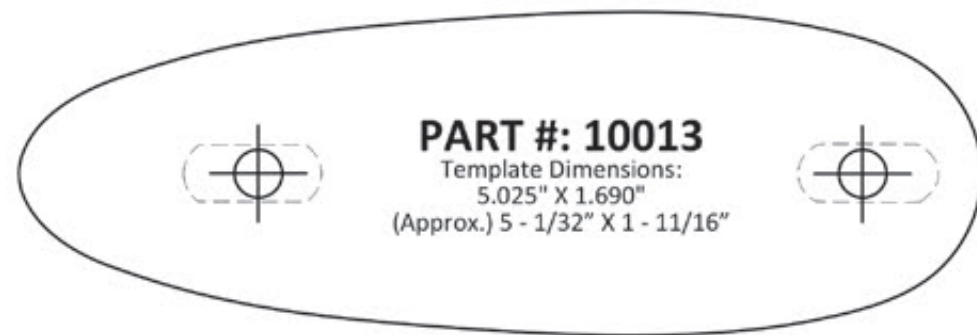

+ This pad fits a specific make of synthetic stock. To accomplish as accurate a fit as possible, many of the synthetic recoil pad plates have profiles that snap inside the cavities of the stock. While most plates can be altered by grinding off protruding plastic on the plate, this plate CANNOT be altered.

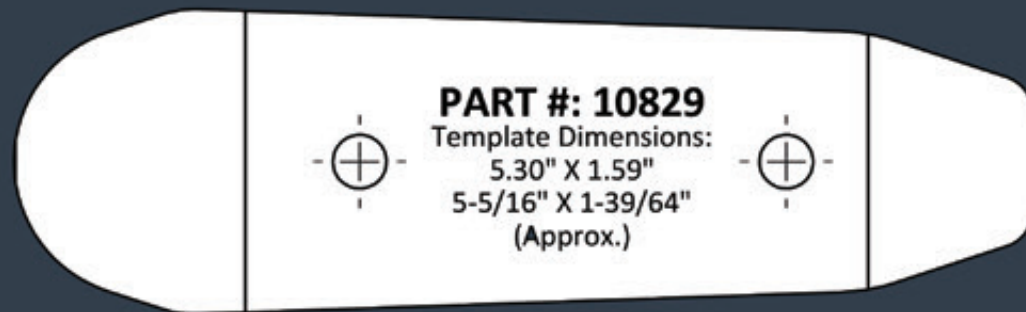

+ Contact LimbSaver® for free adaptor plate to fit Ruger Skeleton.

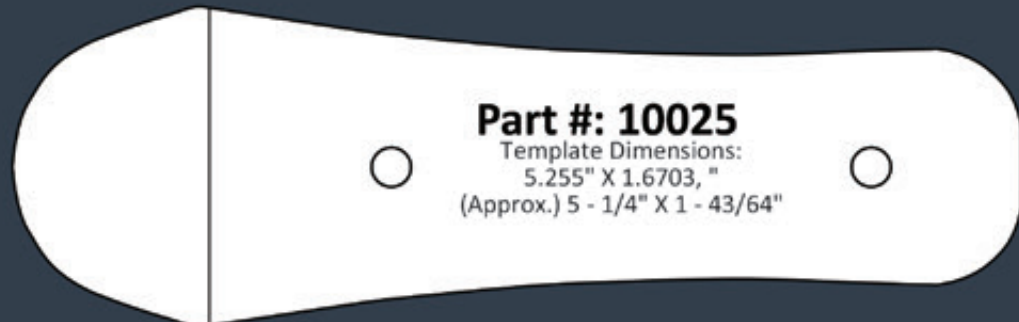

PRECISION-FIT RECOIL PAD TEMPLATES

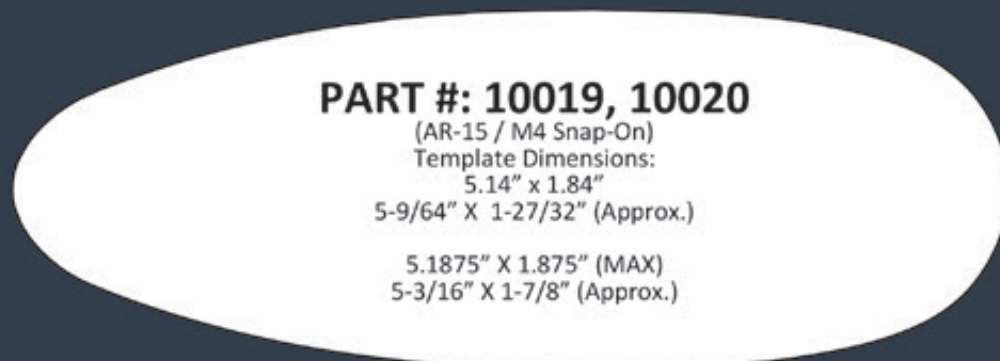

TACTICAL STOCK RECOIL PADS

About Grind-to-Fit® Recoil Pads

The following Grind-to-Fit® Recoil Pads are shown with two profile lines. The outer line is the actual size of the pad. The inner line is the "Max" Grind line. In order for our technology to function properly, the interior air chamber must remain intact with enough wall thickness to contain the pressure during the firing of the weapon. By not grinding past this line, you ensure your pad will be in perfect working order.

To determine which Grind-to-Fit® Recoil Pad is right for you, remove your existing pad, and place your flat stock on the templates. Choose the pad that shows the full outer line of the template, and none of the interior line. For further instructions, go to www.LimbSaver.com.

LIMBSAVER

INDUSTRY LEADERS

Always pursuing advancement, we are constantly researching, testing, and evaluating technologies, materials, and designs to ensure that we produce the most effective sound and vibration-dampening products possible.

Well-known companies from around the world come to us to have their products tested, evaluated, and improved by our engineers.

OUR ROOTS

We believe that the best products are born from hard work and determination. From the very beginning, here at LimbSaver, we have been committed to engineering the most advanced products utilizing the most state-of-the-art technology.

Throughout the years, we have been trail-blazers in the industry, producing the most effective noise and vibration-dampening technology.

AMERICAN MADE

The vast majority of our products are made right here in Shelton, WA. For two decades we have been making the highest quality and best performing archery and firearms products in the world.

We have always employed teams of industry experts and engineers that design, test, and perfect every single product, ensuring that what is produced is the best in the world.

We are avid sportsmen, competition shooters, and hunters and we make products that we are excited to use.

BOW DAMPENERS

Customer Reviews

Now my Bear is Quieter Than Ever!

I purchased these [TwistLox Limb Dampeners] a little over a week ago and just put them on my Bear. I LOVE THEM! I was really surprised at the difference it made when my arrow left my bow. That tedious ping sound was no longer there, and now my Bear is quieter than ever. I honestly see these helping eliminate the "arrow ducking" that all white-tails are notorious for. Will definitely be recommending these to all of my friends!

LimbSaver Makes the Best Dampening Products!

LimbSaver makes the best dampening products and these [Broadband Limb Dampeners and Everlast String Leeches] are no different. They do make a difference in generated noise level regardless of which bow you shoot. One of the nice things about these is that you can change the color of the rings to adapt to new strings or for whatever reason you feel need for a change.

Bow dampeners are essential. Find out which are best for you.

Split-limb dampeners

TWISTLOX

Split-Limb Dampener

EASIEST INSTALLATION

Simply twist to lock in position for a secure fit in wide or narrow-spaced limb gaps

BROADBAND

Split-Limb Dampener

SECURES WITH BRACKET

Great for all split-limb bows, including bows with tapered limb gaps

SUPERQUAD

Split-Limb Dampener

UNIVERSAL FIT

Two orientations securely install between wide or narrow-spaced limb gaps

ALPHASHOX

Split-Limb Dampener

DESIGNED FOR HOYT BOWS

Securely installs on Hoyt bows with 3/4-inch gap between limbs

Solid-limb dampeners

BROADBAND

Solid-Limb Dampener

EASY, STICK-ON INSTALLATION

Industrial-strength 3M adhesive keeps product fixed in place

BROADBAND RECURVE

Solid-Limb Dampener

GREAT FOR NARROWER LIMBS

The smaller adhesive base and overall size is perfect for narrow-width recurve or youth size solid-limb compound bows

Vibration Dampening Accessories

MINI ULTRAQUAD

Bow and Gear Dampeners

SMALLEST SIZE DAMPENERS

Stick these tiny, lightweight dampeners anywhere on your bow or gear for added vibration and noise control

INSULATOR STRIPS

Bow Grip Dampeners

INSULATES YOUR HAND

Adds comfort while gripping your bow, especially in cold temperatures

TENTACLE GRIP WRAP

Bow Grip

COMFORT AND GRIP

Isolates your hand from vibration, bow shock, cold and heat

TWISTLOX

TOP VIBRATION DAMPENING

Made from our proprietary NAVCOM® technology (Noise and Vibration Control Material), TwistLox noticeably dampen noise and vibration by up to 75% when shooting your compound bow.

TwistLox limb dampeners for split-limb bows are a result of extensive development and testing.

FEATURES

- Isolates your hand from vibration and bow shock
- Non-slip material ensures consistent grip even while wet
- Insulates against cold and heat
- Quickly and securely wraps around your bow grip

STABILIZERS

Customer Reviews

★★★★★

Liked Mine so Well I Bought One for my Son-in-Law

My bow came with a solid hard stabilizer that only helped balance the bow. I had read about these LimbSaver S-Coil Stabilizers and thought I'd give it a try. It made a terrific difference in the hand shock I felt and quieted down my bow significantly. It was the first LimbSaver product I tried and it made such a big difference I added other LimbSaver products to my compound bow and my cross-bow. This fall I bought my son-in-law a used bow and the first thing I did when it arrived was buy him a LimbSaver S-Coil.

★★★★★

Best Decision Yet!

Before this purchase [LS Hunter Micro] I was sceptic about longer stabalizers about why you would need one only because I have never shot with one before. After the decision to upgrade from the S-Coil to this, I was sold and proven wrong. Now I'm able to shoot tighter groups [at] longer distances compared to before [the] the S-Coil.

Find the right bow stabilizer for your shooting style

STRING DAMPENERS

Customer Reviews

Works Great, Easy to Install, Easy to Tune

[String Decelerator] Needed one that installs on the front stabilizer mount, as my bow is a bit older. Easy to install, easy to adjust. I adjusted it to "just touch" the string and took a couple shots. Then I backed it off about 1/16" and tried it again. For my bow, the 1/16" gap was about perfect. Yours may be different, so it might take a little tweaking to get it right, but it definitely helps reduce the "twang" (even though I have string silencers), and it tightened up my arrow groups. Money well spent!

These Work!!!

I was using "Monkey Tails" but they were breaking off and didn't stay in place. These [Everlast String Leeches] WORK!!!

EVERLAST STRING LEECH®

EXTRA DURABLE

Quiets your strings and is built to last

FEATURES

- Designed to reduce string oscillation and reduce string noise
- Helps to keep your shots quiet and smooth
- Built to last - provides unparalleled performance and unsurpassed durability
- Installs between the strands of bow strings; bow press required for installation

SILENT QUIVER

DEADLY SILENCE

The hood and double grippers on the Silent Quiver, made out of NAVCOM®, ensure absolute silence. The flexible properties of the hood and grippers ensure that you do not accidentally make noise when removing your arrow from your quiver.

UNIVERSAL FIT

Its universal design fits most fixed and expandable broadheads, as well as a wide spectrum of shaft sizes. Never lose another arrow! The positionable double grippers securely hold 5 arrows, sizes from .240" - .360".

Gripper inserts are available to adapt the Silent Quiver to fit micro-diameter arrows as thin as .166"!

Customer Reviews

★★★★★
Great Quiver

Easy to install, and arrows stay locked in place. I also like the fact that the quiver does not have foam in the hood that wears out over time.

★★★★★

Quiet, Safe, Stable and Light

The arrows are held securely, and they come out with very little noise. There is never any question of an arrow falling out of the quiver either. I used this quiver on a 9 day hunt in which I covered several miles on foot every day, no arrows ever got close to coming loose, until I wanted one, then it popped out with ease.

After I had had mine for a few months and a couple hunts, I purchased the same quiver for a friend who has a completely different setup than me. He loves the quiver too.

If you are looking for an affordable, reliable, quiet quiver, you've found it.

SILENT QUIVER

NOW AVAILABLE WITH FIBER OPTICS!

Soft, quiet hood and grippers help you stay silent when it really counts by eliminating the risk of noise when removing arrows from your quiver

FIBER OPTIC

NO MORE FUMBLING IN LOW-LIGHT CONDITIONS!
Fiber optic inserts help you see where to place your arrow tips

FEATURES

- Five-arrow quiver with innovative low profile and lightweight design, great for bow hunting
- Quiver hood and arrow grippers are made from soft, flexible, noise and vibration dampening material to prevent noise when removing your arrows
- Positionable grippers securely hold up to five arrows sized 0.240 to 0.360 inches in diameter
- Universal design fits both fixed and expandable broadheads, as well as wide spectrum of shaft sizes
- Available with optional fiber optic hood inserts to assist with arrow placement in low-light conditions
- Quick disconnect system is operated by an easy-to-access thumb release
**compatible with most sights, will not work with HHA sights*
- Durably built to be used outdoors in harsh environments

COLORS / HD PATTERNS

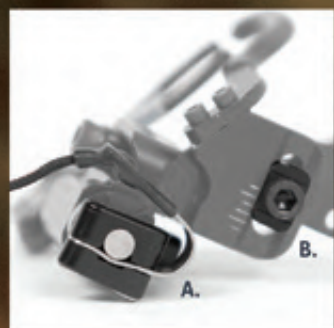

PT100

PRECISION

Flexible Spring Arm (A.) allows for the most accurate lock-up time adjustments without pulling your cables and cams out of time. **Adjustable Lock-Up Time** allows for easy and precise adjustment from 2" to 5"+ of arrow travel before the arm drops, resulting in super-straight arrow flight.

Double-Wedge Locking Clamp System (B.) eliminates marring and denting, which plagues most arrow rests and traditionally makes micro adjustment difficult.

IMPROVED CONTROL

Specially designed Pro Launcher Arm (C.) keeps your arrow in place with or without using the removable top bar, even when your bow is tilted past 90 degrees and eliminates any risk of vane collisions.

The improved and redesigned Lock System (D.) allows you to cock the launcher arm before you draw, which prevents the arrow from falling off the rest during fast or shaky draws or let downs. The improvements make this rest even smoother, quieter, more reliable, and more durable.

PT100

- IMPROVED -
ARROW REST

Customizable for any shooting style to produce straight arrow flight

FEATURES

- Flexible Spring Arm reduces or prevents common timing issues that plague most other rest designs (see pg. 22 figure A.)
- Adjustable Lock-Up Time for super-straight arrow flight
- Double-Wedge Locking Clamp System eliminates marring and denting for easy micro adjustments
- Specially designed Pro Launcher Arm keeps your arrow in place with or without using the removable top bar, even when your bow is tilted past 90 degrees and eliminates any risk of vane collisions
- The newly redesigned Lock System allows you to cock the launcher arm before you draw, which prevents the arrow from falling off the rest during fast or shaky draws or let downs - now more reliable than ever
- Can be installed and fine-tuned in minutes
- Twin-Bearing Launcher System ensures silky smooth operation, even in the harshest environments
- PTFE Arrow Sliders allows a smooth and quiet draw. Moleskin is also included for wrapping
- Includes Arrow Holder and Fall-Away Drop Pad

SLINGS

Customer Reviews

★★★★★
Fine piece of equipment

Bought this [The Kodiak-Air Crossbow Sling] for my Wicked Ridge Invader crossbow as it is fairly heavy to transport a long distance. Works great at not sliding off my shoulder. Also the quick release swivels are outstanding to remove it for hunting.

★★★★★
Comfort and Quality!!!!

Great sling! [The Kodiak-Lite Crossbow Sling is] exactly as advertised and works great in the field. No slipping or moving once it's positioned over the shoulder. The rubber is also flexible and conforms well to the shoulder, making it very comfortable.

★★★★★
Nice Sling!

This [Kodiak-Air Crossbow] sling has several advantages. It is made with a material that grips your clothing/shoulder so it will not slip off/down much (if any). The width is good for me. It is also made right here in the USA. Went onto my crossbow within about 30 seconds or so. It is also easily adjusted.

- Safe to use - it is odorless, non-toxic, non-flammable

CROSSBOW SILENCING

DEADENS NOISE

A major complaint of crossbow hunters is the horrendous amount of noise that results from the shot. Our crossbow suppression accessories reduce vibration energy to ensure every shot will be quieter, smoother, and cause less wear on your crossbow.

We use specialized NAVCOM® (Noise and Vibration Control Material) in varying durometers and configurations to isolate a wide range of vibration frequencies.

By addressing the vibration frequencies that cause audible noise, LimbSaver® crossbow suppressors will reduce the noise of your shot, helping a hunter go undetected and decreasing the chance of game jumping the shot.

Customer Reviews

★★★★★
Worth Every Penny
Tommy, Dick's Sporting Goods Customer

Placed this kit on my Barnett Wildcat c5. The sound dampening was like night and day. If you have a crossbow I highly recommend this kit as it won't disappoint!!!!

CROSSBOW SUPPRESSION KIT

SOLID AND SPLIT-LIMB OPTIONS AVAILABLE

Everything you need stop crossbow noise and vibration dead in its tracks

FEATURES

- TwistLox Suppressors (split-limb) [A] or Crossbow Broadbands (split or solid-limb) dampen limb vibration (See below for more information)
- Stirrup Dampeners [B] attach to almost any foot stirrup with slip-on design and zip tie lock down to reduce noise and vibration
- Bolt Retention Dampener [C] helps to quiet the bolt retaining spring
- Super String Leeches® [D] complete the Crossbow Silencing Kit and reduce string noise (Note: a bow press is required for leech installation)

LIMBSAVER BOWS

POSI-LOCK

The patented 7-position Posi-Lock Poundage System allows you to effortlessly adjust the poundage with just the turn of a dial. This allows you to drop down or bump up your draw weight without needing to re-tune the bow.

SIGMA CAM

Our Sigma Cams provide the smoothest draw, extra-generous valley, and rock-solid back wall that hunters and sport archers have been looking for in a bow. LimbSaver bows are very forgiving, consistent, and reliable. They are easy to tune and stay in tune unlike other bows. We offer you the confidence to take that once-in-a-lifetime shot.

ROCK-SOLID RISERS

Advanced riser designs are lightweight, super-rigid, and engineered to last a lifetime. They give you a vibration-free, forgiving shot.
