

Ultimate Digital Tire Pressure Gauge

TO TAKE PRESSURES: Turn unit on (auto-Zeros at turn on - DO NOT TURN ON

w. pressure on gauge). If Zero is needed quickly tap $\mbox{\ \ \square \ \ PFF}$ button.

To turn off hold **DN/DFF** button 1 sec. True factory calibrated pressure will be shown. **Be sure** TRUE FACTORY Calibration **is on the display in the lower right.** If not push **LDCK TEMP** button.

TO SAVE THIS PRESSURE TO THE DISPLAY: Push the STORE MEMORY button. That pressure will be stored on the display. Start at the Right Front, then the Right Rear, Left Rear, then Left Front. Once you have all 4 pressures no more can be stored without clearing. If you have stored the wrong pressure push and hold STORE MEMORY 2 seconds. The last reading will be cleared. Release button and retake pressure.

To clear all 4 continue to hold **STORE MEMORY** for 3 seconds.

Indicates actual true pressures (NOT compensated)
