

Installation guide

LP Adventure Bumper guard

(small & big)

Subaru Crosstrek - 2018

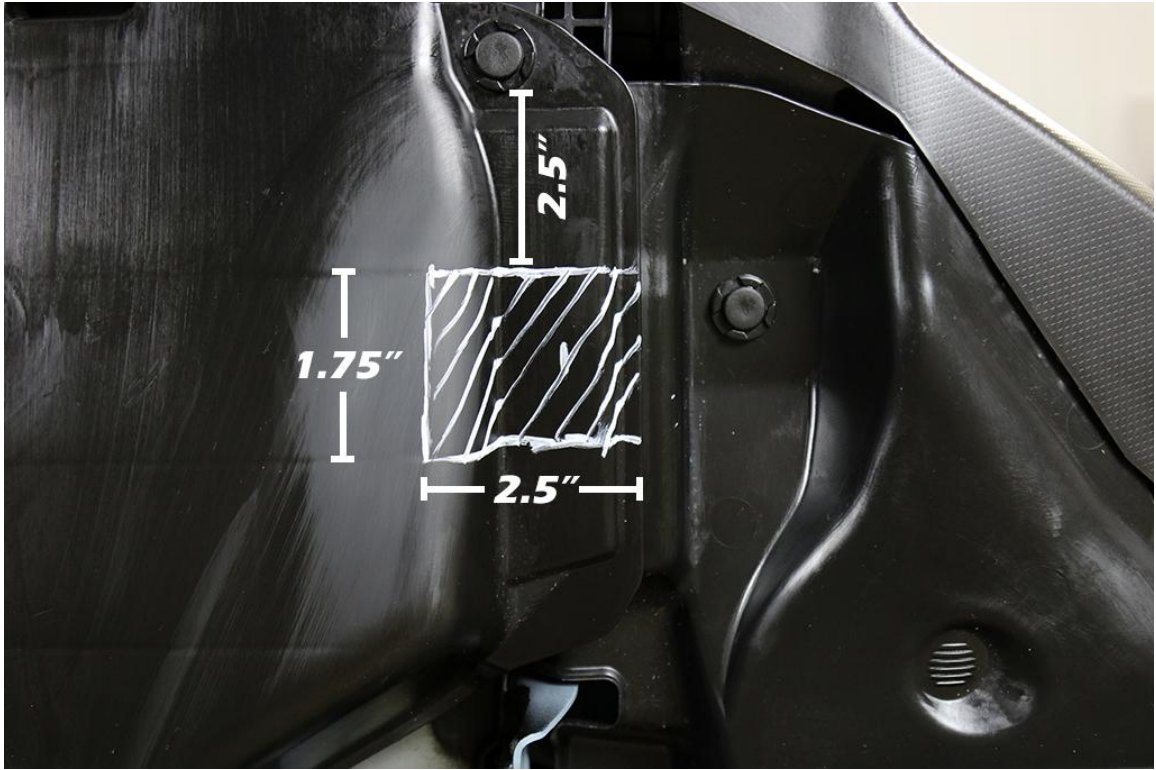

Necessary tools :

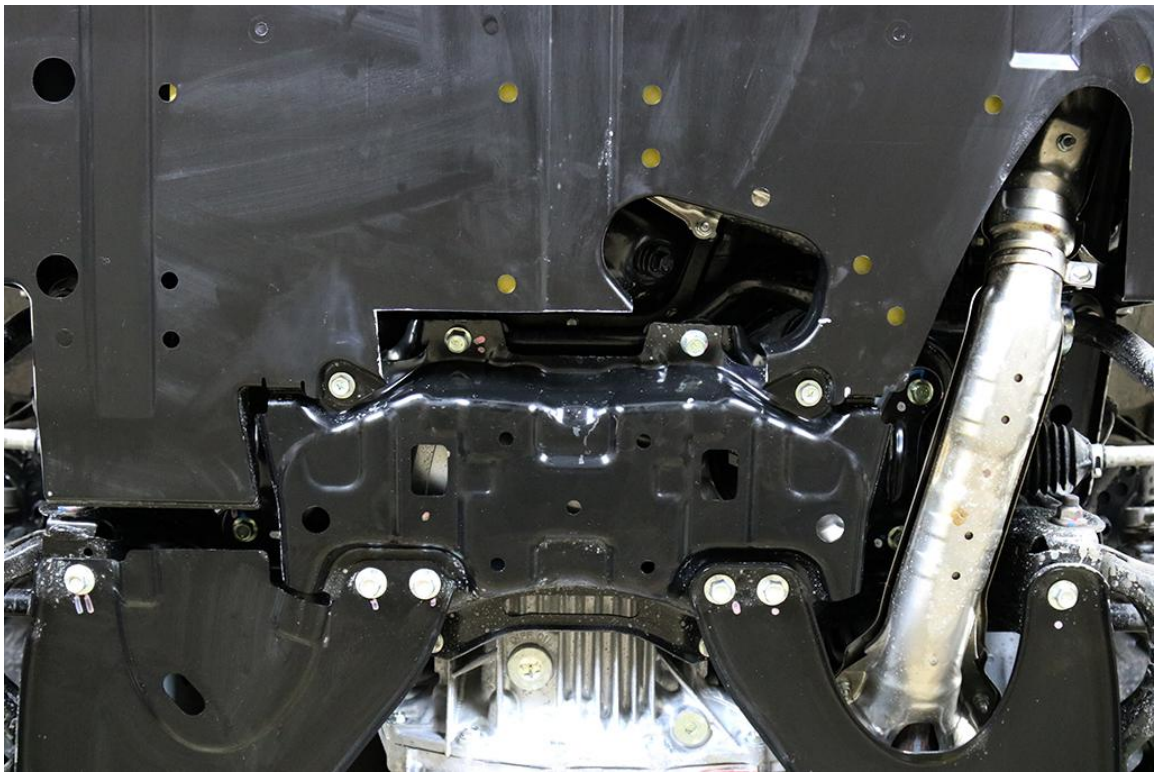

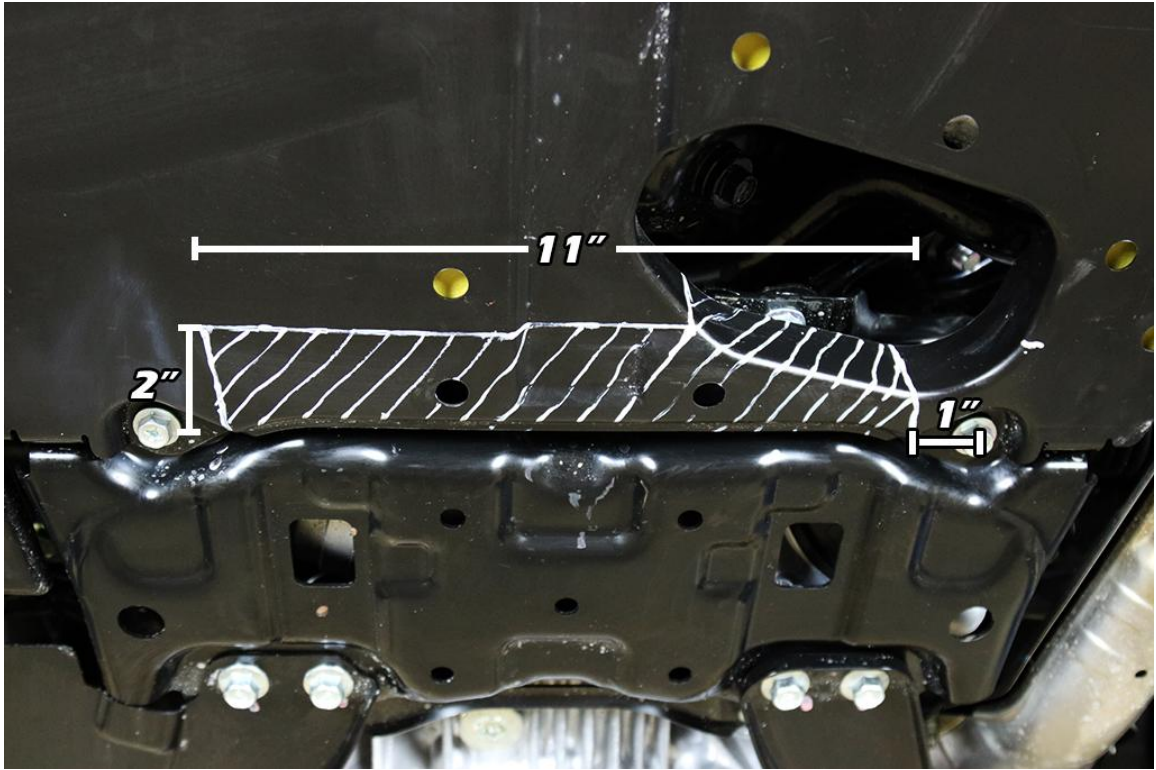

- Ratchet
- 12mm Socket
- 14mm Socket
- 12mm wrench
- 14mm wrench
- Long nose pliers
- A small knife, or a dremel

Please note that you can keep the original skid plate, you just have to cut it.

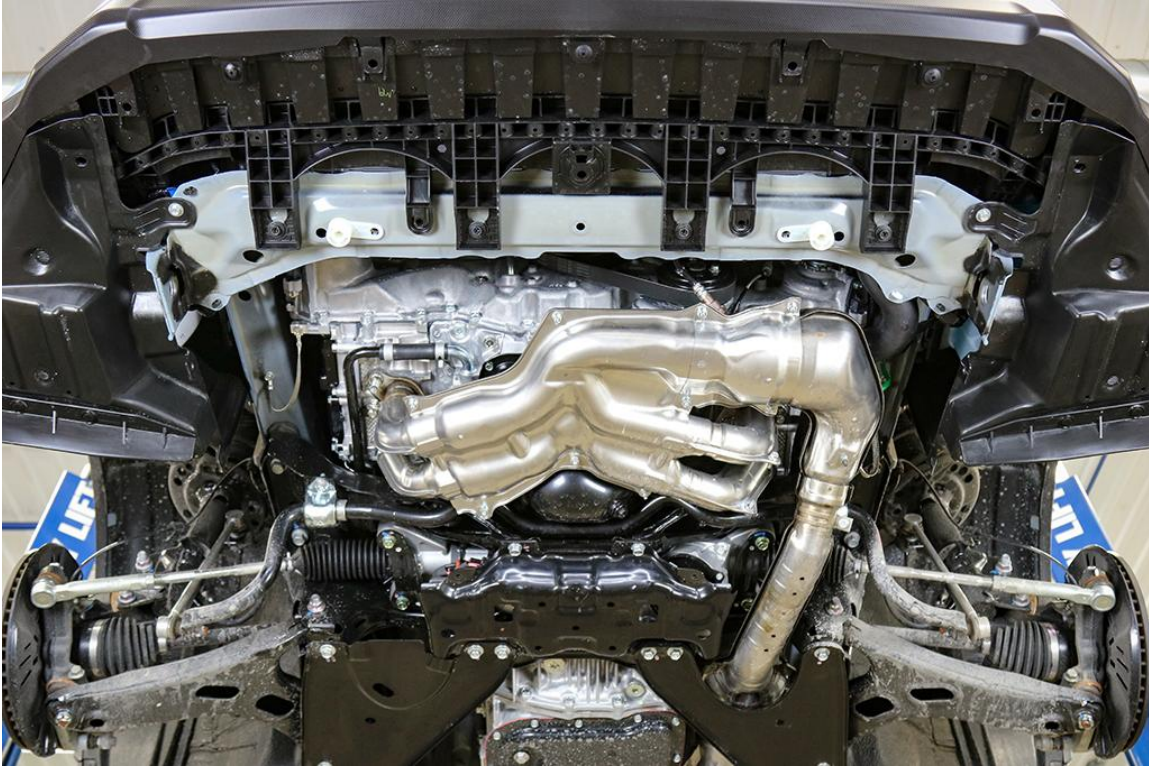

#1. Cut the OEM skid plate

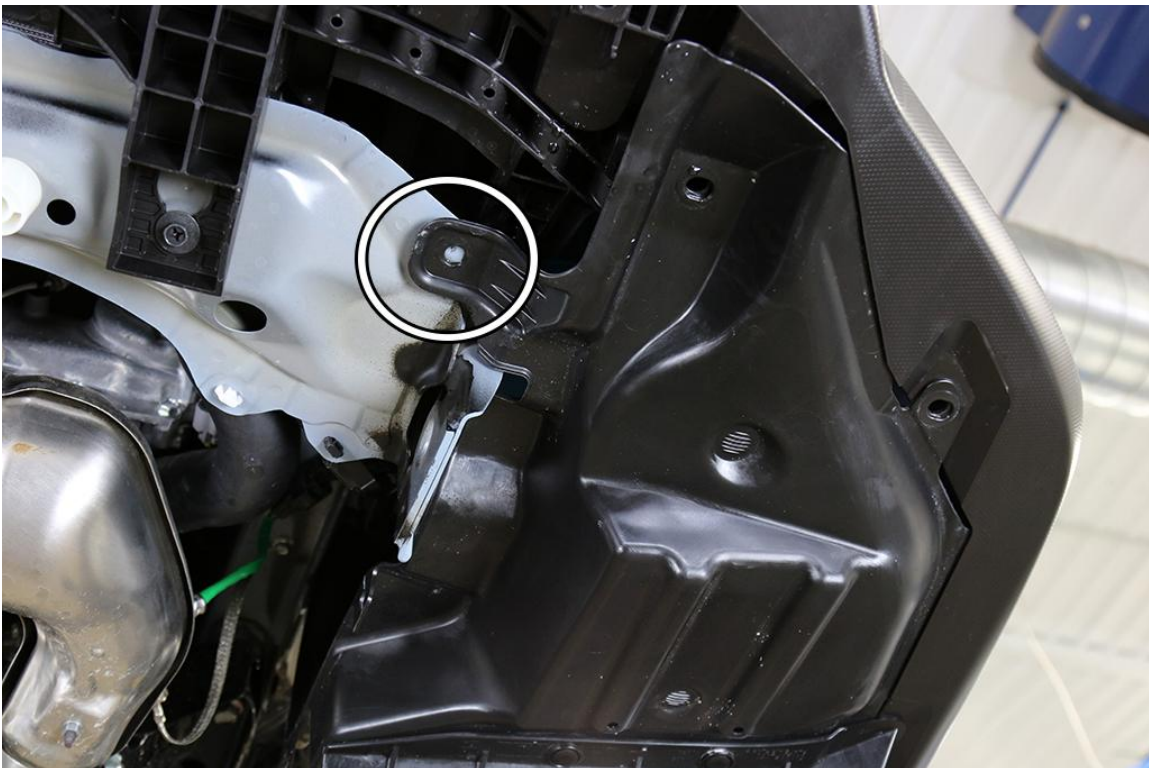

#2. Remove the OEM skid plate

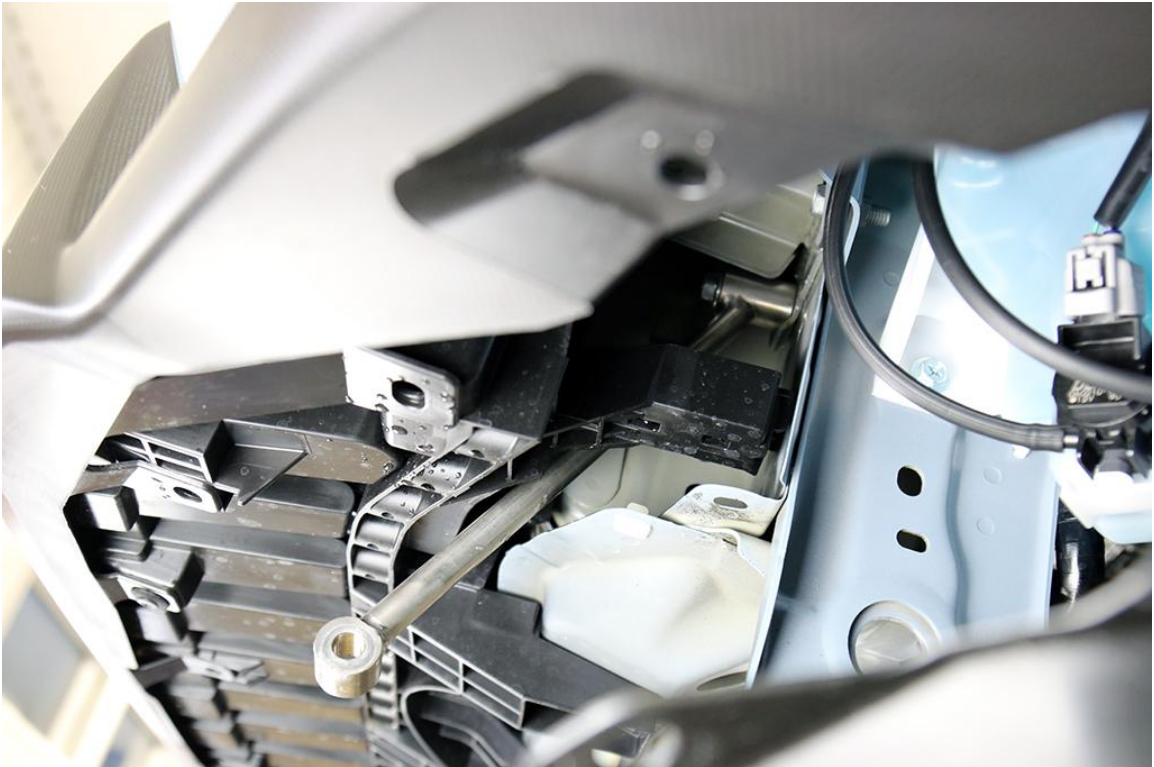

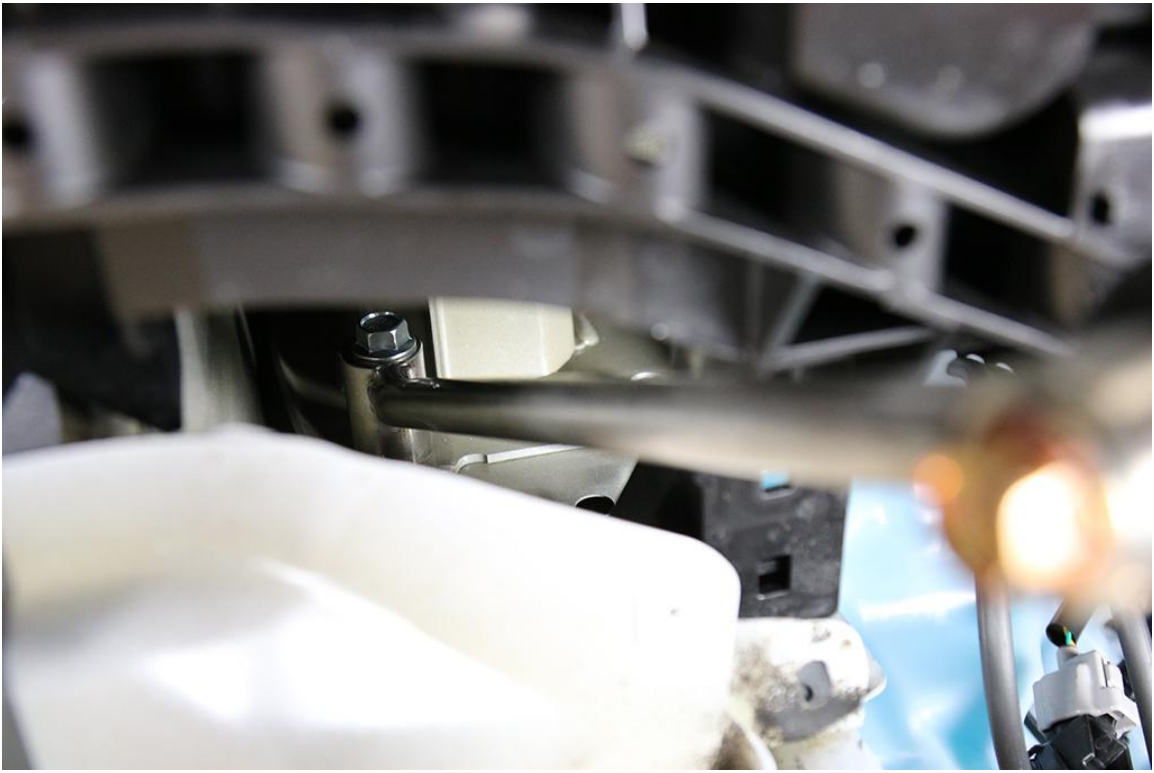

Unscrew this bolt

#3 : Install the 2 rods

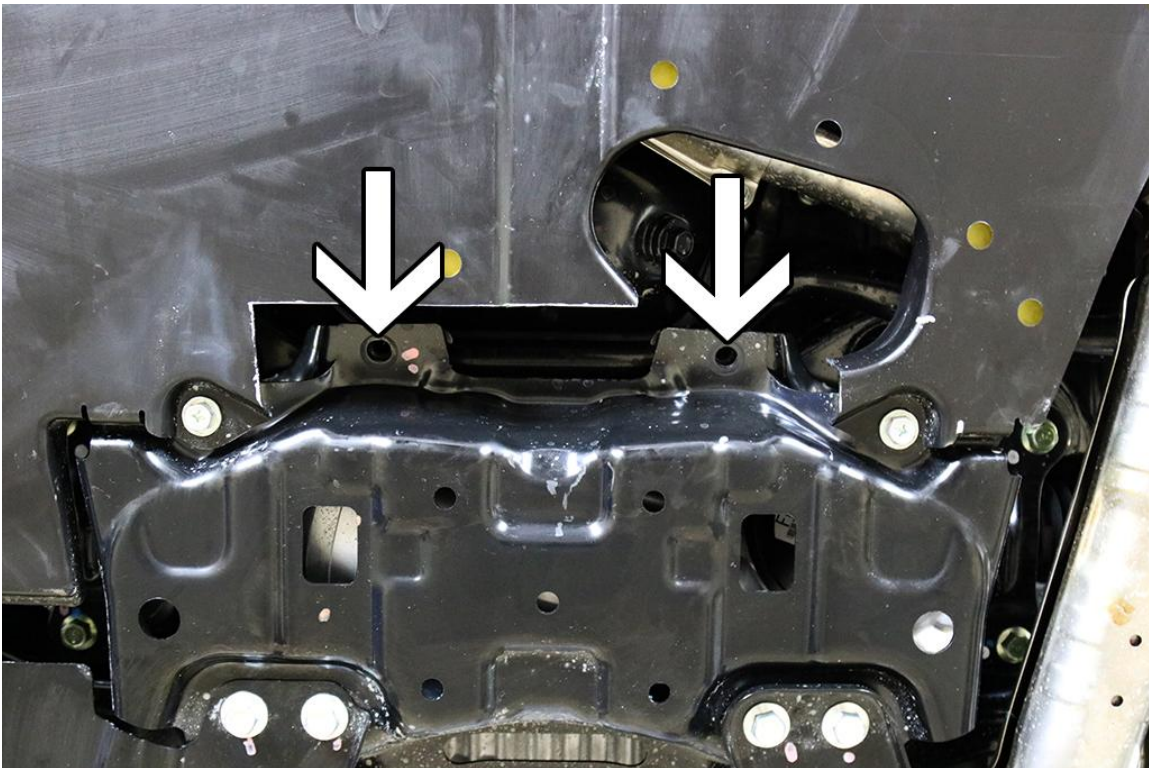

#4 : Reinstall the OEM skid plate

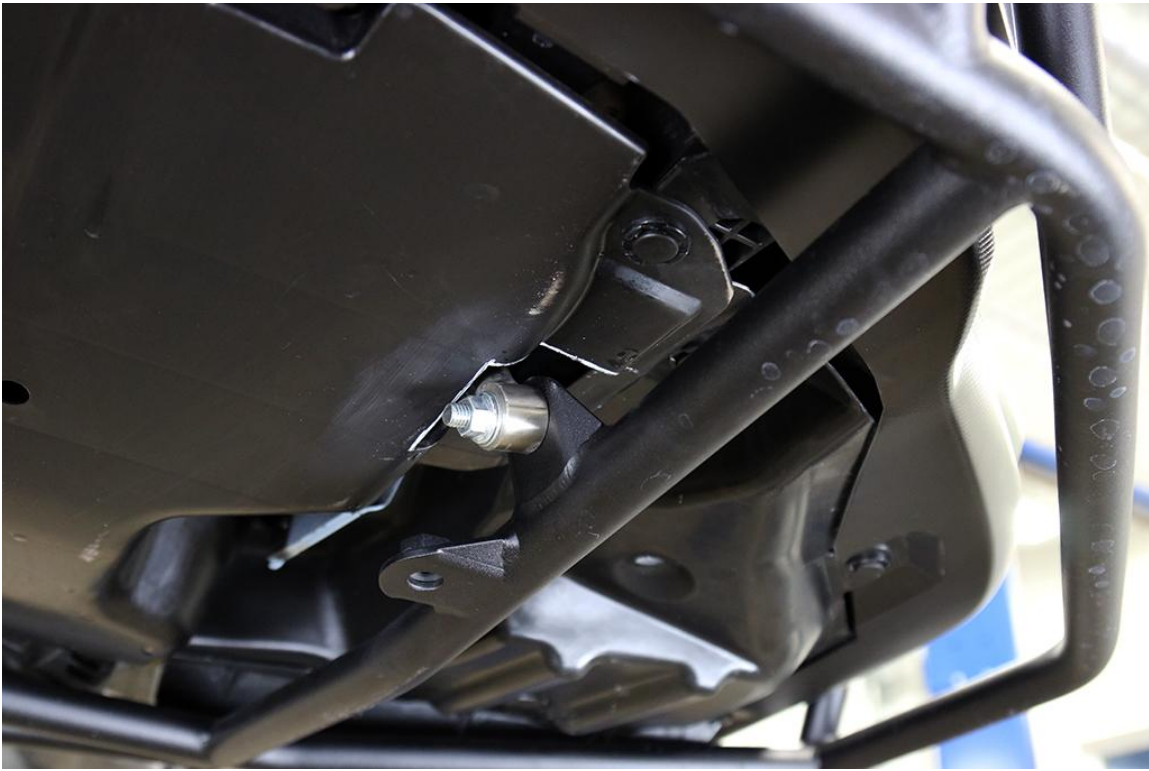

#5 : Unscrew these two bolts

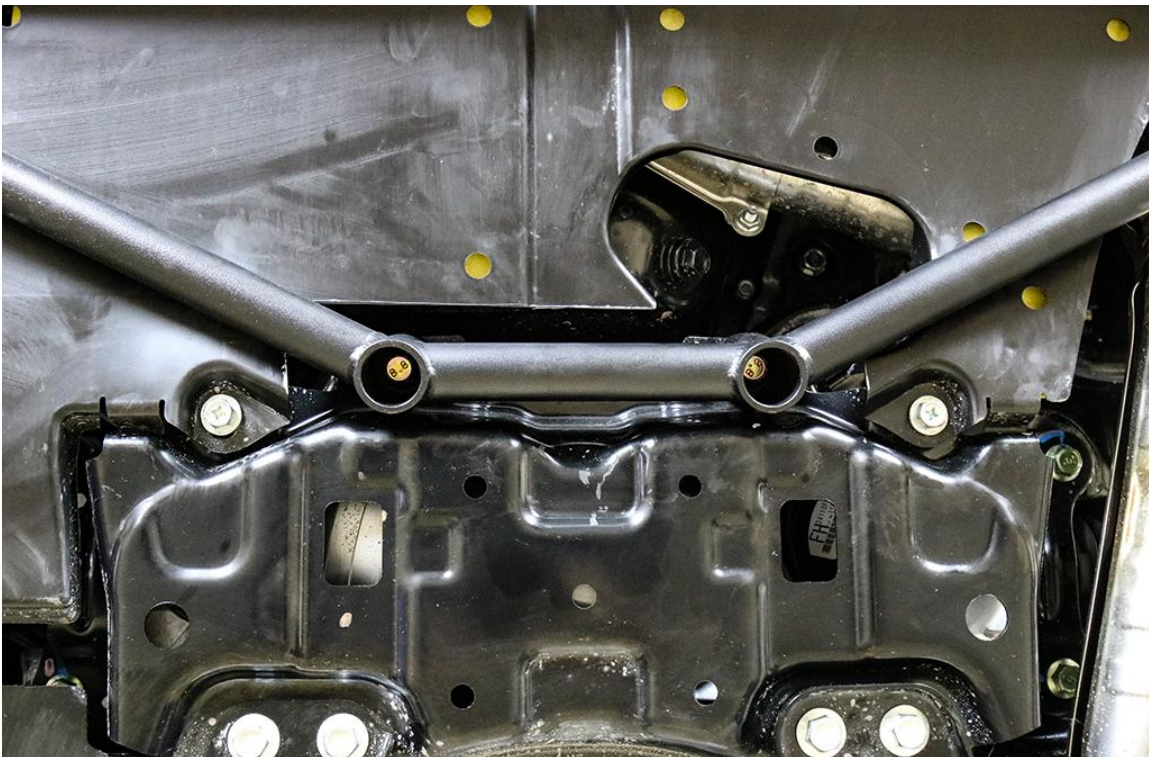

#6 : Attach the bumper guard to the bracket

***** Do not screw the bolts to the end (you can tighten these after step # 7) *****

#7 : Bolt up the rear section of the bumper guard

#8 : You can now completely screw the bolts of the bracket

You have finalized the installation!
