

# LP AVENTURE - ENGINE - SKID PLATE - 2020-2021 OUTBACK

**The skid plate is an essential component to go into the off-road trails,**

## **ADVANTAGES:**

- **Aluminum construction of a 3/16 "thick.**  
It provides good protection to the components that are generally exposed under the car as the engine, oil pan and transmission.
- **Compatible with the 2.4L Turbo and 2.5L n/a engine**  
The design allows the installation of the skid plate on the Subaru Outback equipped with one or the other of the two engines.
- **The LP Adventure Skid Plate is compatible with the LP Adventure bumper guard.**  
Its design allows the installation of the skid plate with the bumper guard
- **Oil Holes**  
In order to facilitate oil changes, we have incorporated a hole specifically designed for this.
- **The LP Adventure Skid Plate is compatible with the LP Adventure bumper guards.**  
You must have a LP Adventure bumper guard (small or big) to install this skid plate. We have the concern to offer robust parts that will meet the high expectations of our customers. That's why we designed this skid plate in this way. We found that there were no strong points of attachment under the car to install the skid plate directly to it. The LP Adventure bumper guards allow you to install the skid plate securely and offer maximum protection.
