Middle Monting
Bracket
(553196)

Rear Mounting
Bracket
(553199)

Before you begin installation, read all instructions thoroughly.

Make sure all required parts are on hand before starting the installation.

Socket, 1/2"	Ratchet
Wrench, 1/2"	Drill
Flat Screwdriver	Drill Bit, 3/8"
Marker	Drill Bit, 3/32
Putty Knife	

Step 1

Starting on the Passanger side, locate mounting locations as shown in Fig 1 and Fig 3.

Hold each bracket in its mounting locations and mark each hole on the rocker and pinch weld.

Step 2

From the under side of the plastic rocker molding use a flat head screw drive to release the bottom push pins.

NOTE: Do not remove plastic trim all the way only release the bottom push pins.

Step 3

Move to the 3rd & 4th mounting brackets, **models with factory studs** will use those as monting locations. **Models with out factory studs** will have holes pre drilled in the rocker panel and will use the 3.75" U-Bolts with the plastic bolt retainer.

Repeat steps 3&4 for the bottom mounting Holes.

Step 6

Continue along the side of the vehicle to the 5th mounting bracket repeat steps 3, 4 for the lower mounting holes.

Insert the 8mm T-bolt weldment with a plastic retainer clip to secure it in place.

Slide the rear mounting bracket on the T-Bolts and secure with (1) 8mm nuts and (2) 8mm bolts.

NOTE: Leave all brackets loose until the end

Step 7

Leave ALL brackets Loose at this time. Please Review the installation instructions that are included in your step assembly for specific details. Place step board on brackets tighten all brackets so the board is level.
