

## The Versatility of The Mac's PiVOT-Now for Racing and Fuel-Injected Engines!

Out of the box, the Mac's PiVOT attaches to most 2 and 4 carburetor intake manifolds to make engine installation a breeze. Now, with Mac's PiVOT Engine Lift Adapter Plates, you can use your Mac's PiVOT on a wide range of engine that don't have a common carburetor base flange for attachment, from the Ford Flathead 8 to the GM LS9.

## Protect That Freshly Painted Engine Compartment!

Unlike using chains or other bulky engine lift solutions, Mac's PiVOT Engine Lift Adapter Plates are designed to fit compactly against the engine, significantly reducing the risk of contact with engine compartment surfaces and wires.

The small footprint of each adapter, coupled with the fine lift control of the Mac's PiVOT gives you unprecedented control during engine install, making even the most challenging installs a one-man job.

## One PiVOT-Multiple Engines

Each Mac's PiVOT Engine Lift Adapter Plate attaches to the Mac's PiVOT using the same 4 grade-8 bolts (included), so a single Mac's PiVOT with multiple adapters is all you need to work with the most popular engine families. You can use the Mac's PiVOT on its own to pull an old flathead, then attach the Ford Coyote 5.0L adapter to the Mac's PiVOT and you're ready to complete your install. It's that simple.

## Uniquely Designed for Each Engine

Constructed from 1/4" and 3/8" steel, we've designed each adapter to take advantage of the best attach location for that engine. Our "plate-style" adapters are designed to attach to the "intake valley", while "cradle-style" adapters attach to the cylinder head exhaust ports.

**Engine attach fasteners not included.** Bolts needed to attach the adapter to the PiVOT are included, but the fasteners needed to attach the adapter to the engine are not. Proper fastener selection to attach the adapter plate to the engine is the responsibility of the installer.

## Made in the USA

We manufacture the Mac's PiVOT right here in the USA. This allows us to control quality and support American jobs!
