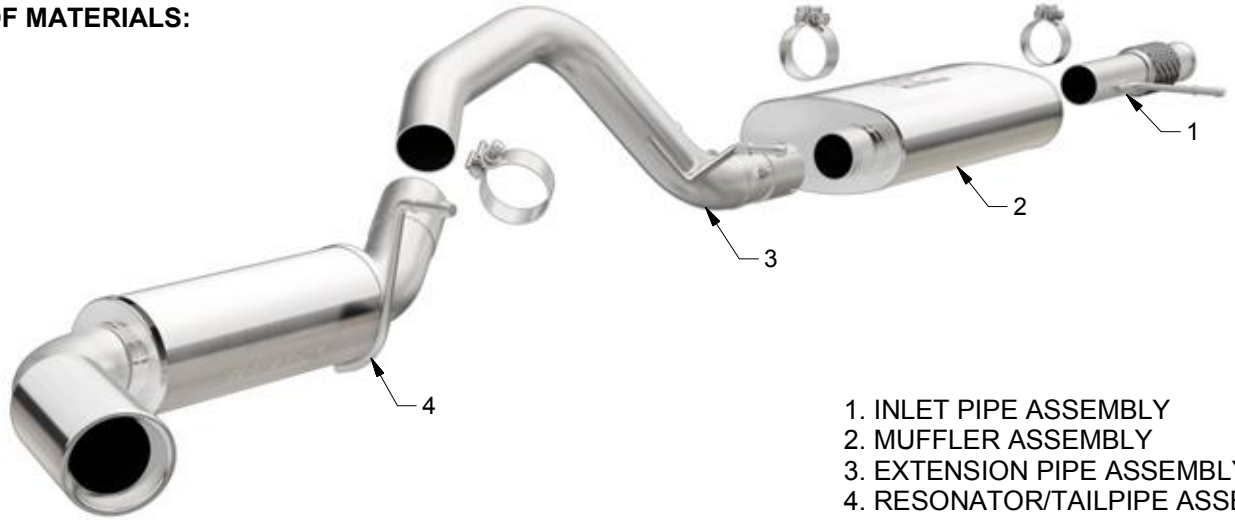
INSTALLATION INSTRUCTIONS

2015 CHEVY TAHOE/GMC YUKON 5.3L | PART NO. 15355

BILL OF MATERIALS:



1. INLET PIPE ASSEMBLY
2. MUFFLER ASSEMBLY
3. EXTENSION PIPE ASSEMBLY
4. RESONATOR/TAILPIPE ASSEMBLY

WEAR SAFETY GLASSES

READ INSTRUCTIONS THOROUGHLY BEFORE INSTALLING PRODUCT

SHOP SUPPLIES:

SPRAY LUBRICANT

To ease removal of existing exhaust components (especially on older vehicles) spray penetrating lubricant on all fasteners and hangers/insulators that will be loosened or removed and let soak before disassembly.

HARDWARE KIT:
1.[3] 3.00" Clamp

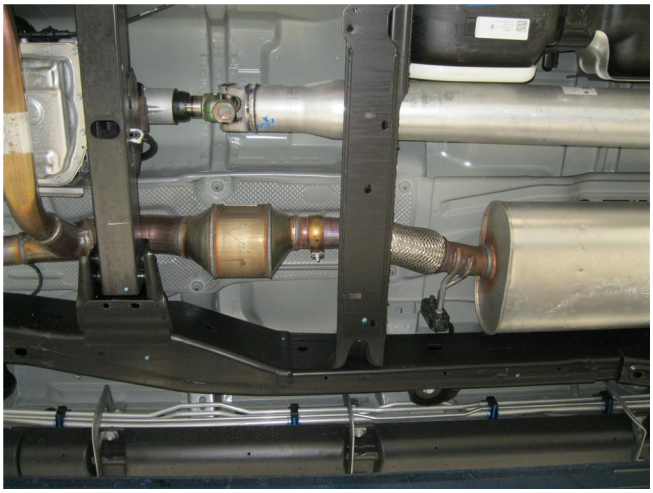
MINIMUM REQUIRED TOOLS:

13mm
15mm

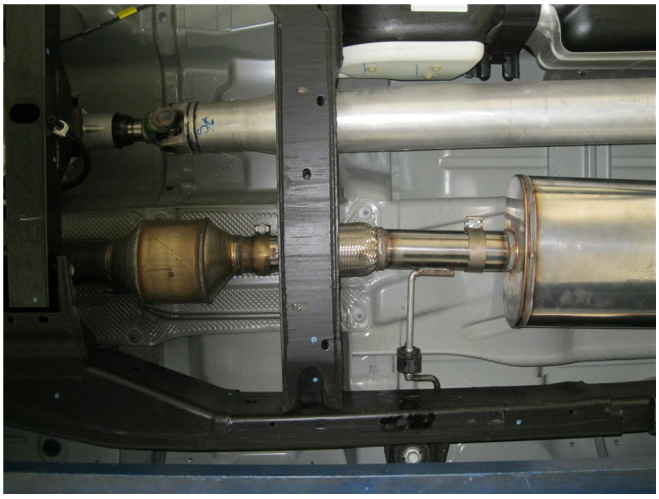
Hanger Tool
(Or Pry Bar)

Sawzall or other cutting device.

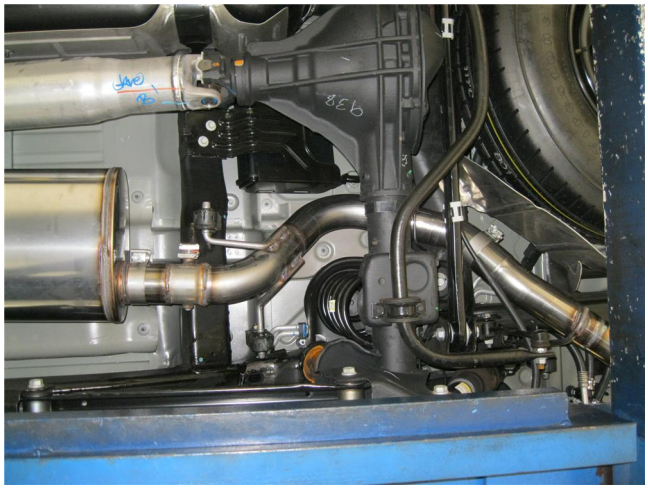
INSTALLATION INSTRUCTIONS



Step 1. To remove the OEM exhaust system, you will first need to cut the pipe behind the muffler before it goes over the axle. You can then disengage the welded hangers from the rubber insulators and remove the tailpipe. Unfasten the muffler inlet from the catalytic converter at the clamp junction. Do not damage or discard the OEM fasteners or rubber insulators, as they will be reused to mount the new system. Disengage the muffler hangers and remove it from the vehicle.



Step 2. Begin installation of the new system by attaching Inlet Pipe Assembly at the ball flare using the OEM clamp and fitting the hanger into the rubber insulator. Next attach the muffler to the inlet pipe using a supplied 3.00" clamp. Leave all clamps loose for final adjustment of the complete system.



Step 3. Complete the initial installation by attaching the Extension Pipe Assembly (containing the exhaust valve) to the Muffler and the Resonator/Tailpipe Assembly the Extension Pipe using the suplied 3.00" clamps.

Step 4. Once a final position has been chosen for the new exhaust system, evenly tighten all clamps from front to rear using the torque specifications on page one of the instructions. Inspect all fasteners after 25-50 miles of operation and re-tighten if necessary.
