

70-7903T

Mazda wire harness

2007-up

APPLICATIONS

MAZDA

CX-7	2007-2012
CX-9	2007-up
RX-8	2009-2011

When replacing the OEM radio with an aftermarket radio, the clock display above the radio is retained. However with the OEM radio removed there is no way to adjust the time on the clock.

70-7903T

harness will allow the user to plug in their OEM radio to adjust the time on the clock without disassembling the dash or having to remove the aftermarket radio already installed. When the clock adjustment is completed just unplug the OEM radio from the 70-7903T and tuck the harness behind the dash free of any moving parts.
