Yaris (sedan)	2012

*Note, these models, the OE steering wheel harness must be 20-pin. *Models needing a 28-pin harness must use the AX-TOY28SWC. This applies to the 2013-up models only.*

When installing an aftermarket radio, the 70-8114 will allow the user to retain their factory installed steering wheel controls without having to splice into the factory wiring (ASWC-1 required and sold separately). In addition, we include RCA's to allow the user to retain their factory installed 3.5mm AUX IN jack (aftermarket radio must have a audio AUX IN).

INSTALLATION:
1. Connect the **Red** wire to 12-volt accessory power.
2. Connect the **Black** wire to chassis ground (by itself).
3. Connect the 3.5mm jack to the steering wheel control input, in the aftermarket radio.
4. Connect the **White** RCA jack to the left audio AUX IN of the aftermarket radio (if equipped).
5. Connect the **Red** RCA to the right audio AUX IN of the aftermarket radio (if equipped).

NOTE:
1. Audio devices connected through the 3.5mm jack will be controlled from the audio device, not the aftermarket radio.
2. Please refer to the ASWC-1 programming instructions for programming of the ASWC-1.
