DISCLAIMER

- Please dispose of any liquids properly.
- Allow vehicle to cool completely prior to attempting installation.
- Mishimoto Performance is not responsible for any vehicle damage or personal injury due to installation errors, misuse, or removal of MP products.
- MP always suggests that a trained professional installs all MP products.
- Refill coolant system with 50/50 coolant, unless specified by the manufacturer.
- Do not run the engine or drive the vehicle while overheating. Serious damage may occur.
- Only raise vehicle up on jack stands or on a vehicle lift.

INSTALLATION INSTRUCTIONS

01 | INSERT FASTENERS

Insert plastic fastener through the fan mount holes.

02 | PUNCTURE FOAM PROTECTIVE PAD

Puncture the center of the foam protective pad with plastic fastener and slide through until adhesive side sticks to fan mounting holes.

03 | INSTALL SECOND PROTECTIVE PAD

1. Slide plastic fastener through the radiator fins and install a second protective pad to the radiator with the adhesive facing out.

2. Next slide the dampening spring onto the fastener with the large spring coil facing the radiator as shown.

3. Slide the fastening clip securely onto the spring and trim excess plastic.

NOTE

Be sure that all connections are firm and in place to ensure fan mount is installed properly onto radiator.
