Alignment Adjustability Restrictions

Nissan Trucks/SUVs

PROBLEM:

No OE provision for front wheel alignment

Full and mid-size Nissan trucks and SUVs come with non-adjustable control arm bolts from the factory. If these vehicles require an alignment, then adjustable "cam bolts" must be installed in the lower control arm.

Camber that is out of specification will cause the vehicle to pull left or right and will create wear on the inside or outside edge of the tire.

Edge Wear**

**Camber/Toe
Wear**

Description	Years	Make/Model	Part Number
Cam Bolts	2005-2010	Nissan Titan, Armada, Pathfinder, Xterra, Frontier	K80276

SOLUTION:

MOOG® K80276 Cam Bolts

MOOG K80276 cam bolts easily install in place of the factory lower control arm mounting bolts and allow for 4 degrees of caster/camber adjustment (-2° to +2°).
