A Legacy Like No Other

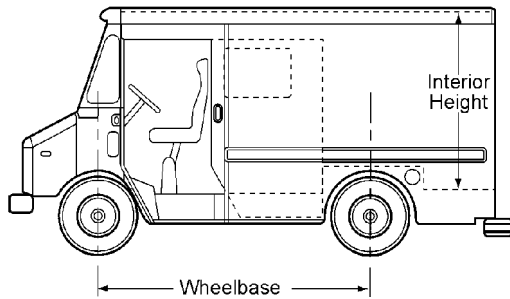

The "Route Star" Walk-In Van

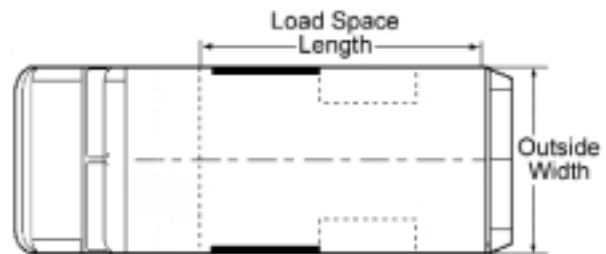

Truck Measurement Guidelines

For all trucks: Right side refers to the passenger side and left side refers to the driver side.

Walk-in Truck
Side View

Walk-in Truck
Viewed looking down on roof

For Walk-in trucks, when a part is being specified by:

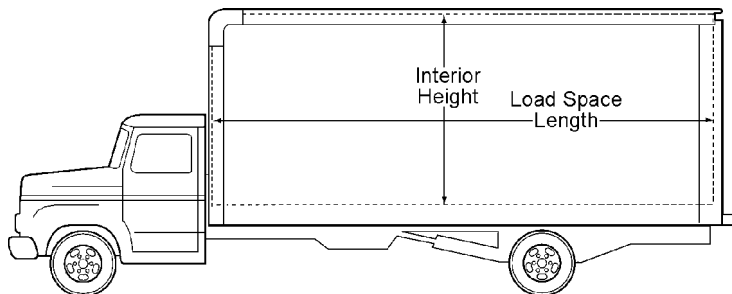

Truck Height - Measure the interior height of the truck as determined by the distance from floor to ceiling.

Wheelbase - The distance between the wheels, center to center.

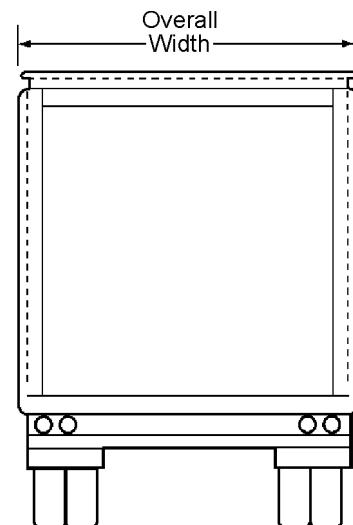

Truck Width - Measure the outside width as determined by the distance between the exterior side walls.

Truck Length - Measure the load space length as determined from the forward end of the cargo floor to the exterior face of the rear sill. Then, subtract 2.5 inches.

Dry Freight Van
Side View

Dry Freight Van
Back View

For Dry Freight Vans, when a part is being specified by:

Truck Height - Measure the interior height of the truck as determined by the distance from floor to ceiling.

Truck Length - Measure the load space length as determined from the forward end of the cargo floor to the exterior face of the rear sill.

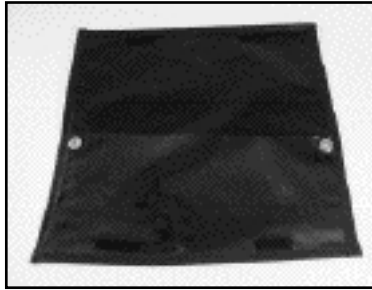

Truck Width - Measure the outside width as determined by the distance between the exterior side walls.
