

## WHEEL STUDS

P/N 46140

## INSTALLATION INSTRUCTIONS

These Wheel Studs should be installed as shown in the diagram below with the tapered end of the shank towards the wheel.

Whether you use a thick or a thin wheel spacer depends on the type and thickness of the disc brake that you are using. Install wheel, then the correct spacer and the flange nut.

**NOTE:** Use thread Loctite on end that is threaded into flange.

### PARTS LIST
