

Inverted Apex Surround

Creates higher volume displacement, higher SPL and higher displacement.

Progressive Suspension

Controls excursion at high power lowering 3rd order distortion.

MTX Reliability

Forty years of audio experience packed into this subwoofer family.

More Than You Expect

The 3512-04S is the ideal subwoofer for audio enthusiasts that don't want to sacrifice space in their vehicle, but still want their sound to bump. Designed for sealed enclosures, this subwoofer is perfectly deployed in pick up trucks, sports cars, or any daily driver that has a trunk full of life's stuff. A great value, this subwoofer continues the MTX tradition of getting More Than Xpected.

The MTX Inverted Apex Surround

This subwoofer features a new **Inverted Apex surround** that increases surface area allowing for more air movement and **higher SPL**, and a **progressive suspension** that **lowers distortion** resulting in improved sound quality. This subwoofer also incorporates **Spider Plateau Venting** which is a mechanical cooling process that **targets cool air** at the voice coil effectively managing the temperature for long term performance.

Great For Upgrades

35 Series subwoofers are ideal for improving the sound in any vehicle. Their low profile does not require a large enclosure so they are perfect for most vehicles.
