

Spider Plateau Venting

Cools voice coil to prevent overheating.

Linear Drive Systems

Cone always moves linear, preventing distortion.

The Terminator Sub

The terminator subwoofer is loaded with MTX engineering technology including **Spider Plateau Venting** that ensures trouble free performance and an **Assymetrical Linear Drive System** that limits distortion ensuring unbeatable performance.

If you are looking for a great subwoofer that won't break your bank look no further. The Terminator sub is still one badass bass pounder...
