Next, take the driver side bracket and slide the 1/2" notched portion of the bracket down over the 14mm frame bolt and hand tighten. Next, take a 3/8" x 4 1/2" hex bolt, 3/8" flat washer and start from the bottom side of the bumper bracket and go through until the bolt is through the light bar bracket on top. **Step 2:** Trim out a 1" slot in the plastic mesh on both sides of the bumper (see Figure 2). This will allow the light bar brackets to slide through and match up with the brackets on the bumper mount.

**Step 3:** Carefully slide the light bar through the 1" inch slotted hole in the bumper until the four brackets align. Next, start the two 3/8" x 1" hex bolts and 5/16" washers in each bracket and hand tighten. Then start the two 5/16" x 1" carriage bolts, 5/16" washers and 3/8" hex nuts in each bracket and hand tighten.

**Step 4:** After the final adjustment, torque each bolt location to 15-20 ft/lbs. This concludes the installation.
