

**Physical Data:**

<b>Coverage per Oz.</b>	>20 sq. feet
<b>Solid Content by Wt.</b>	>30% ± 2%
<b>UV Condensation Exposure (ASTM D4587)</b>	>5,000 hours
<b>Salt Water 5%</b>	>3,000 hours
<b>Effective Film Thickness</b>	1-3µm
<b>Pencil Hardness (ASTM D3363)</b>	7-9H
<b>Adhesion (ASTM D3359)</b>	5B
<b>Heat Resistance</b>	798 °F
<b>VOC Content</b>	29.9994 grams/l

By using advanced inorganic diamond class carbon technology, **NANOSKIN MEGA TREND** is a hydrophobic, anti-static and weather-resistant nano coating that shines and protects your vehicle like nothing else! **MEGA TREND** works on the molecule level in 10 nanometers to transform the surface. **MEGA TREND** contains inorganic diamond class carbon, tungsten steel and basalt, which create an extremely hard finish that minimizes fine scratches and is durable. **Once treated with MEGA TREND, your vehicle will repel water and contaminants, and it will maintain a clear, reflective, showroom like shine.** **MEGA TREND** cannot be removed by water, alkaline or other detergents, or by pressure washers. **One application can last up to 3 years.**

Applies to clear coats, wheels, exterior glass & head lights.
