

PROTECTION FROM MOTHER NATURE'S MOST COMMON ELEMENT

39/50 STATES

Rain is greatest cause of driving fatalities

SUPERIOR WET PERFORMANCE

It doesn't take extreme conditions on the road for tragedy to strike. Surprisingly, factors to blame for the worst outcomes on the road are pretty common. According to statistics, rain is the leading cause of driving fatalities in 39 of the 50 states. Wet road conditions can cause decreased visibility, hydroplaning, and unexpected slowing, stopping and sudden maneuvering. Your vehicle needs to be equipped with a tire that can handle such an environment.

Introducing the N'Fera AU7 from Nexen Tire. The N'Fera AU7 is manufactured with an improved tread design that increases wet braking performance and handling with maximum grip to make sure your tire sticks to the pavement.

TAKING OVER THE MARKET

N'Fera AU7 covers 85% of the Luxury Sedan OEM replacement market.

3D NANO GRIP TECHNOLOGY

A combination of a chain end bonding system and highly-dispersing fine silica maintains elasticity in high-frequency braking and maximizes contact area.

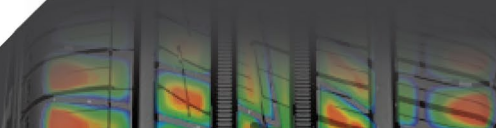

WET PERFORMANCE

Open lateral grooves maximize drainage capacity for superior wet performance while 3D kerf sipes reinforce block stiffness for improved wet handling.

IMPROVED BRAKING PERFORMANCE

Optimized tread profile technology improves braking performance through maximizing grip by equally distributing surface of road contact.
