Automotive Steering and Suspension Parts

# About OCAP

In 1975 Ivano Giordano created O.C.A.P. S.n.c., acronym of Officine Canavesane di Precisione (Precision Workshops of the Canavese area), specialized in the manufacturing of automotive steering and suspension parts for all vehicles with steering wheels.

OCAP started soon growing and expanding its activities, becoming more and more a point of reference in the field of automotive steering and suspension parts. The company enriched its product offer and market share also through some acquisitions and takeovers and strengthened its appeal on the market by adding many new applications for light commercial vehicles, trucks, construction machines and agricultural vehicles. At the beginning of the new millennium, OCAP reacted to the globalizing market changes and to the modified customer requirements with an ambitious strategic international investment plan.

In 2001 a new production plant was created in the Rajasthan State, in India: OCAP Chassis Parts Pvt. Ltd.

In 2004 a new plant was built in Oglianico near Turin, Italy, where O.C.A.P. International S.r.l. has its headquarter and where the aftermarket commercial and logistic activities are concentrated with a fully automated warehouse for the storage and distribution of all spare parts.

In 2007 OCAP expanded further with the foundation in China of OCAP Chassis Parts (Kunshan) Co. Ltd., in Jiangsu province, a plant dedicated mainly to highly technological components.

Today OCAP is a Group, managed by a holding company, O.C.A.P. S.p.A., with four operational plants.

A success story that continues its development worldwide in the OEM as well as in the IAM markets.

# R&D

Permanent innovation is amongst the competitive advantages of OCAP. Its strong R&D department is continuously enforced with its own innovative technologies and this permits OCAP to be above all a reliable manufacturer of quality products with a high performing content. New concepts and intuitions have led to many successful applications and to a consistent richness of technical and technological know how. The development of a new component starts with a deep functional, qualitative and cost analysis. The different possible solutions are implemented with 3D CAD and checked with kinematic and structural simulations by FEM/FEA tooling. Every step of the product development is planned, performed and monitored according to the APQP methodology with an interdisciplinary approach involving various OCAP departments. Every new part is tested in the Valperga plant on advanced test benches able to analyze the most complex steering and suspension systems, simulating various road and environmental conditions. Sometimes additional field tests are carried out.

## Production and Products

In the last years, OCAP has deeply renewed its machinery in order to increase its manufacturing capacity and production quality analysis and to better monitor its complete production process. Many automations linked to the installation of more anthropomorphic robots have been introduced and a major versatility has been obtained through semiautomatic work areas. Particular efforts are made in the field of World Class Manufacturing with lean production and total quality principles. OCAP covers a wide range of applications: passenger cars, light commercial vehicles, trucks and buses, construction and agricultural machines. OCAP is also active developing products for special vehicles (race, mini and electric cars, quads, snowmobiles, military vehicles, trailers, motorcycles). OCAP covers the complete steering and suspension parts offer with tie rods, tie rod ends, axial joints, ball joints, track control arms, silentblocks, stabilizers, steering boot kits, repair kits, engine mounts, torque rods, V links and king pin sets.

# Quality & Logistics

## Quality

Indeed, quality is part of the DNA of the whole staff in all the various departments of the Company. The claim "People guided by total quality concepts" is a reality with its imprinting from product design to production and from order management to logistic performances. All are focused on the same target: the full customer satisfaction. The ISO/TS 16949 and ISO 9001 certifications bear amongst others witness of this commitment.

An eco-friendly development is evident and solid at OCAP and its environmental efforts are confirmed by the ISO 14001 certification.

## Aftermarket logistics

OCAP International with its aftermarket headquarter in Oglianico has an impressive logistic centre. The various areas for product reception and warehouse allocation, order picking and shipment preparation are organized around the real heart of the centre, the vertical automated warehouse.

This structure, 27 meters high, 113 meters long and 22 meters wide, is equipped with 20.000 loading units moved by five S/R machines.

The ordered goods are prepared at four picking bays where they are packed and the parcels are strapped and wrapped. They are then transferred from there to one of the six shipment bays and loaded.

# OEM

Since its foundation, OCAP is an active supplier of steering and suspension parts to the vehicle manufacturers, first in Europe and now as well in America and in Asia.

OCAP supplies not only high volume parts but is particularly appreciated by its original equipment customers for the quick development, production and supply for smaller series vehicles with top performance needs.

OCAP is today one of the main OEM suppliers of chassis parts for luxury and upper class passenger cars.

Amongst others, we can find OCAP parts on the vehicles of following manufacturers:

- *car OEM customers:* Fiat Chrysler Automobiles, KIA, Lamborghini, Lotus, Maserati, McLaren, Nissan, Pagani, Peugeot, PGO, Renault Sport;
- *truck OEM customers:* DAF, DANA, Iveco, Leyland Trucks, Piaggio, SNVI, Streparava;
- *agricultural vehicles OEM customers:* BCS, Carraro, Case, Caterpillar, Claas, Comer Industries, Dana, Deutz-Fahr, Fendt, Iseki, JCB, John Deere, Landini, Liebherr, Lovol, Mahindra Tractors, Manitou, Massey Ferguson, McCormick, Merlo, New Holland, Same, Steyr, Terex, Terradrive, Valmet, Valpadana, Valtra, Yanmar.

# IAM

OCAP is a leading supplier of premium quality steering and suspension components to the vehicle manufacturers as well as to the Independent Aftermarket. OCAP continues to acquire market share in the car and truck sector as well as in the field of agricultural vehicles and construction machines.

The organization and efficiency of its worldwide independent aftermarket distribution network in the five continents with various hundreds of customers in more than 70 countries guarantee to OCAP an increasing market presence. Moreover, OCAP products can be found in the boxes of various relevant IAM players.

Thanks to its dynamic marketing staff the Company extends its product range up to even more than 50 new part numbers each month and assures a competitive price positioning on the IAM market for its quality products. Its wide range of products with more than 10.000 part numbers are well illustrated with many details in the various catalogues and CD/DVD as well as in Tec Doc.
