OG Innovations (a Drake Automotive Group brand) delivers the most unique styles and highest quality vehicle graphics using Avery-Dennison adhesives. Unlike competitive brands that use other materials and require a wet installation, OG Innovations' micro-perforated materials provide customers a dry-application process that is easy to perform and takes the worry out of bubbles in the finish. With extensive hot weather durability testing in the Nevada desert, the OG Innovations graphics will remove easily with no risk to the vehicle's paint or finish.
